How to read tables

- Estimates are provided state-wise/sector-wise/ gender-wise/social group-wise.
- All the tables except table 1 to 4 are for persons of age 15 years & above.
- It may be noted that as the tables are generally presented as 'per 1000 distribution' or 'estimates per 1000', the figures are rounded off. Accuracy of the ratio/rates of these derived aggregates will be limited to the number of significant digits available.
- In case the indicator is shown as '0' in any table, it implies that the estimate is less than 0.5.
- In case the indicator is shown as '-' in any table, it implies that no sample case is reported under such category.
- The row/column totals may not exactly be equal to 1000 due to rounding off the estimates.
