## Introduction

### Background

1.0 The Common Minimum Programme (CMP) of the present Government, *inter alia*, has recognized as one of its basic principles of governance the need to “enhance the welfare and wellbeing of farmers, farm labour and workers, particularly those in the unorganized sector and assure a secure future for their families in every respect.” The CMP further states that

*“The UPA government is firmly committed to ensure the welfare and well-being of all workers, particularly those in the unorganized sector who constitute 93% of our workforce. Social security, health insurance and other schemes for such workers like weavers, handloom workers, fishermen and fisherwomen, toddy tappers, leather workers, plantation labour, beedi workers, etc will be expanded.”*

1.1 In order to implement the above commitment, the Government of India, among other measures, constituted the National Commission for Enterprises in the Unorganised Sector (NCEUS) vide Ministry of Small Scale Industries Resolution No. 5(2)/2004-ICC dated 20<sup>th</sup> September, 2004 under the Chairmanship of Professor Arjun Sengupta the current composition of which is as follows (see Appendix 1 also):

Professor Arjun Sengupta, Chairman, Centre for Development and Human Rights, New Delhi	Chairman [From 20.09.2004 to 01.07.2005] [From 17.11.2005 till date]
Professor K. P. Kannan, Fellow and Director, Centre for Development Studies, Ulloor, Trivandrum 695011, Kerala.	Full Time Member [From 01.11.2004 till date]
Professor Ravi S. Srivastava, Professor, Centre for Studies in Regional Development, Jawaharlal Nehru University, New Delhi 110067.	Full Time Member [From 01.05.2006 till date]
Shri B.N. Yugandhar, Member, Planning Commission, New Delhi 110001.	Part Time Member [From 05.11.2004 till date]

Professor T.S. Papola,  
Director,  
Institute for Studies in Industrial Development,  
Vasant Kunj Institutional Area,  
New Delhi.110070

Part Time Member  
[From 06.04.2005 till date]

Shri V.K. Malhotra, IAS (Retd.)

Member Secretary  
[From 01. 03.2006 till date]

1.2 The Terms of Reference of the Commission are as follows:

- i. Review of the status of unorganized/informal sector in India including the nature of enterprises, their size, spread and scope, and magnitude of employment;
- ii. Identify constraints faced by small enterprises with regard to freedom of carrying out the enterprise, access to raw materials, finance, skills, entrepreneurship development, infrastructure, technology and markets and suggest measures to provide institutional support and linkages to facilitate easy access to them;
- iii. Suggest the legal and policy environment that should govern the informal/unorganized sector for growth, employment, exports and promotion;
- iv. Examine the range of existing programmes that relate to employment generation in the informal/unorganized sector and suggest improvement for their redesign;
- v. Identify innovative legal and financing instruments to promote the growth of the informal sector;
- vi. Review the existing arrangements for estimating employment and unemployment in the informal sector, and examine why the rate of growth in employment has stagnated in the 1990s;
- vii. Suggest elements of an employment strategy focussing on the informal sector;
- viii. Review Indian labour laws, consistent with labour rights, and with the requirements of expanding growth of industry and services, particularly in the informal sector, and improving productivity and competitiveness; and
- ix. Review the social security system available for labour in the informal sector, and make recommendations for expanding their coverage.

1.3 Even as the Commission was deliberating on its Terms of Reference including the one on Social Security (No. 9), a draft Bill titled 'The Unorganised Sector Workers' Bill, 2004' prepared by the Ministry of Labour and Employment of the Government of India, arising out of the recommendations of the Second Labour Commission, was sent to this Commission for its comments and possible revision. The background was that several stakeholders had expressed their opinion for a re-examination of the bill. The Bill had combined the issue of social

security with that of the conditions of work and contained provisions wherein the self-employed, who formed a majority of informal workers, had to pay a higher share of contribution to the proposed social security scheme. The coverage of the scheme was also intended to be very limited. There were also some issues of implementation that needed precise formulation.

1.4 Based on discussions within the Commission, interactions with its Advisory Board, the Ministry of Labour and Employment and other stakeholders, the Commission proposed to the Central Government the preparation of two bills, one on social security and the other on conditions of work and livelihood promotion for workers in the unorganised sector. To enable the government in its task of preparation of the two new bills, the Commission submitted two draft bills.

1.5 Following the submission of the two draft Bills, the Commission has further deliberated on the subject and is now putting forth a revised Bill on Social Security along with a report elaborating in detail its proposal for a national social security scheme to which all those in informal employment would be eligible.

1.6 The Commission will also be submitting another report in justification of the draft bill dealing with conditions of work and livelihood promotion for unorganised workers.

### **Procedure followed in preparing the Report**

1.7 The Commission began with consultations with the Advisory Board on the outlines of the proposed national social security scheme (**Appendix 2** to the Report contains the composition of the Advisory Board). Subsequently, a draft Bill was submitted to the Central government and placed in the public domain. Copies of the draft Bill were sent to several of the stakeholders including state governments, trade unions and other organisations working for and with the unorganised workers. The comments and suggestions received formed the basis for the preparation of this Report.

1.8 Most State governments responded to the Commission's request for comments and information on existing social security arrangements. In addition, some of the State governments stated their point of view at the 40<sup>th</sup> Session of Indian Labour Conference held in New Delhi during 9-10 December, 2005. The Commission had the opportunity to discuss the issue with some of the State governments during its visits to the states.

1.9 The Commission constituted a Task Force on Social Security for Unorganised Workers under the Chairmanship of Professor K.P. Kannan, Member of the Commission, to assist the Commission in the preparation of the Report as well as to act as a forum for discussion and deliberation of various

issues connected with the subject (**Appendix 3** to this Report gives the composition of the Task Force).

1.10 The background information on the subject was collated in the Commission. The India Offices of three multilateral organisations viz., the International Labour Organisation, the World Bank and the United Nations Development Programme made available their studies pertaining to both India and other countries. Several academic scholars also responded to the draft Bill with their comments and suggestions. The subject was also discussed in conferences; such as the Conference on Employment and Income Security in India during April 6-8, 2005, organised jointly by the Indian Society of Labour Economics, Institute for Human Development, New Delhi, Planning Commission and the National Commission for Enterprises in the Unorganised Sector; the 47th Annual Conference of the Indian Society of Labour Economics held at the Jawaharlal Nehru University, New Delhi during December 15-17, 2005; and the Global Labour Forum held during December 13-14, 2005 in New Delhi.

### **Framework of the Report**

1.11 The Report is divided into two parts. Part I contains the text of the Report which is organised as follows. Following this introductory Chapter, Chapter 2 deals with definition of informal sector, informal workers and the need for social security for this target group. Chapter 3 examines the main sources of insecurity of workers in the informal economy. Chapters 4 to 6 examine the existing protective social security arrangements initiated by the Central government, State governments and voluntary organisations, in that order. Chapter 7 is a review of international experience in social security. It highlights the initiatives of large Asian countries as China and Indonesia and also gives a brief account of some successful cases such as Tunisia and Brazil. Chapter 8 summarizes the existing models of social security and discusses, in detail, the salient features of the proposed national minimum social security that is inclusive of all workers in the informal economy. Chapter 9 discusses the organizational and implementation issues and the financial implications of the suggested national minimum social security proposal. Chapter 10 documents the responses of different stakeholders and outlines the duties and responsibilities of different stakeholders. Chapter 11 gives the main conclusions and recommendations.

1.12 Part II contains the revised draft “Unorganised Workers Social Security Bill, 2006.”

1.13 A subsequent section on Appendices contain a summary of existing social security schemes implemented by the Central and State governments as well as by various voluntary organisations, and responses received from various stakeholders.

## **Acknowledgements**

1.14 We place on record the advice, support and guidance given by Professor K. Jayashankar, Member of the Commission during the period 01.12.2004 to 09.03.2006 and Shri K.K.Jaswal, who was Member-Secretary during the period from 01.11.2004 to 18.02.2006.

1.15 The Commission benefited by the discussions in the Advisory Board as well as the suggestions made by several members. Some of them helped in organising conferences to discuss the draft of the Report.

1.16 The members of the Task Force contributed to the making of this Report in a significant manner through discussions, suggestions and written inputs.

1.17 Experts in the India Office of the International Labour Organisation and the World Bank assisted the Commission with information on different country experiences. The ILO Office in India also provided technical support by hiring a Consultant, Professor Jeemol Unni, to work for the Commission on a number of related subjects including social security.

1.18 The Secretary, Ministry of Labour and Employment of the Government of India and his officials as well all the State governments and the officials in the Departments of Labour assisted the Commission and provided relevant information. The representatives of trade unions, other organisations of the workers in the unorganised sector and social activists participated in discussions with the Commission in New Delhi and in the States visited by the Commission.

1.19 The Commission takes this opportunity to thank the above individuals and organizations that have contributed towards the preparation of the Report and the Bill.

1.20 It is our pleasant duty to place on record our deep appreciation of the valuable services rendered by the staff of the Commission. Shri Mahesh Kumar, Director, shouldered the main responsibility for coordinating all the activities related to the preparation of this Report and the functioning of the Task Force on Social Security. Professor Jeemol Unni, Consultant, provided valuable professional support. Dr. G. Raveendran, Consultant and Shri S.V. Ramana Murthy, Deputy Secretary provided excellent assistance on statistical issues. Smt. Manisha Shridhar, Director, besides providing overall administrative support, assisted the Commission in its visits to selected States as well as in discussions with various stakeholders. Shri J.D.Hajela, Director, Shri D.P. Singh, Under Secretary, Shri Suresh Kumar, Under Secretary, Ms Anna Mathew, Research Associate and Shri H.S. Chhabra, Section Officer provided excellent services in the functioning of the Commission in general and the preparation of this Report in particular.

## **Informal Sector, Informal Workers and Social Security**

2.0 According to the international definition accepted by UN Economic and Social Council the term 'informal sector' denotes (a) all private unincorporated enterprises (informal enterprises) owned by individuals or households engaged in the production and sale of goods or services, and (b) with employment size below a predetermined threshold (SNA, 1993). 'Informal workers' (or employment) is defined to include persons whose employment relationship is, in law or practice, not subject to labour legislation, social protection and certain employment benefits. Combining the two, the International Labour Organisation has coined the term 'informal economy' (ILO, 2002).

2.1 The term generally used in India to denote the informal sector is 'unorganised sector' and informal workers are referred to as 'unorganised workers'. In this Report, we therefore use the terms 'unorganised sector' and 'informal sector' interchangeably. Similarly, informal employment is referred to as unorganised employment in the Indian context. Whenever reference is made to the informal/unorganised sector and informal/unorganised workers conjointly, the term 'informal economy' is used.

2.2 The harmonization of the concepts of unorganised sector and unorganised employment with that of the internationally adopted concepts of informal sector and informal employment has been achieved by adopting a uniform definition for the unorganised sector and unorganised employment cutting across type of activity. Based on these definitions, estimates of the workers in the unorganised/informal sector as well as those in informal employment have been worked out by the Commission.

2.3 The term unorganised sector is used to denote the aggregate of economic units engaged in the production of goods and services with the primary objective of generating employment and income to the persons engaged in the activity. These units are typically small in size and not distinguishable from the households managing the activity. The units thus form part of the household sector as unincorporated enterprises. Though the contribution of these units in the economy of India has been very significant (around 60 per cent), there has not been any uniform definition of the sector reflecting its specific characteristics. For statistical purposes, however, different agencies have been using different definitions leading to varying estimates of its size. For example, the definition of organised sector used to estimate national income differed from that adopted for estimating employment. The definitions were primarily based on data availability rather than on the characteristics of the sector. It has, therefore, become necessary to evolve and use a proper definition of the unorganised sector. The Commission deliberated on the issue extensively and considered the available

international definitions. It also analysed the existing data sets available through enterprise surveys conducted by the NSSO. It is noted that the certain legislations e.g. Factories Act, 1948, The Payment of Gratuity Act, 1972 are applicable to enterprises employing ten or more workers. The characteristics of these enterprises in terms of legal status, productivity and other economic parameters are also distinctly different from those units employing less than ten workers as revealed by different surveys. A size criteria in terms of numbers of workers in addition to the ownership criteria is therefore found to be appropriate in defining the unorganised/ informal sector. Therefore, the Commission has adopted the following definition:

**“All unincorporated private enterprises owned by individuals or households engaged in the production and sale of goods and services and operated on a proprietary or a partnership basis and employing less than 10 persons”.**

2.4 Though the above definition does not make any distinction between agricultural and non agricultural enterprises, the concept of enterprise is generally being used in India only in the context of non-agriculture sector. The use of such a restrictive meaning of enterprise would lead to the exclusion of a large number of workers in the agriculture sector, unless a corresponding unit of enterprise in agriculture is specified and used. The Commission, therefore, believes that in the case of agriculture, each operational holding in crop production, animal husbandry, fishing etc. need to be considered as an enterprise for the purpose of applying the definition.

2.5 In the rural areas, the unorganised/informal sector mostly comprises landless agricultural labourers, small and marginal farmers, sharecroppers, persons engaged in animal husbandry, fishing, forest workers, toddy tappers, workers in agro-processing and food-processing and artisans such as weavers, blacksmiths, carpenters and goldsmiths. In the urban areas, it comprises mainly of manual labourers in construction, carpentry, trade, transport and small and tiny manufacturing enterprises as well as those who work as street vendors and hawkers, head load workers, garment makers, rag pickers and others.

2.6 In Table 2.1, the estimates of employment in organised and unorganised sectors as on 1.1. 2000 (55<sup>th</sup> Round of the National Sample Survey) based on the above definition of unorganised sector are presented.

**Table: 2.1. Estimates of workers in the organised and un-organised sectors  
(in million)**

	Grand Total	196.74	104.02	300.75	77.05	18.96	96.01	273.78	122.98	396.76

Note: In the absence of data on employment-size in operational holdings, all employment other than those in plantations are included as unorganised agricultural sector.

Source: Computed from unit level data of NSS 55<sup>th</sup> Round, 1999-2000, Employment-Unemployment Survey.

2.7 The unorganised sector is an enterprise-based concept and it does not reflect the characteristics of the jobs or employment relationships. It is possible that some workers in the organized sector do not enjoy any job security, work security or social security. In order to identify such categories of workers, it is necessary to complement the definition of unorganised sector with a definition of unorganised/informal employment. All the casual workers and unpaid family workers in all enterprises irrespective of the sector are being considered as unorganised workers. Similarly, self employed persons in the unorganised sector and private households and other employees not eligible for paid sick/annual leave or other social security benefits given by the employer are also being considered as unorganised workers. Thus the Commission has adopted the following definition of unorganised employment for the purposes of this Report:

**“Unorganised Workers are all those who are working in the Unorganised Sector defined earlier and the workers in the formal sector without any employment security and social security provided by the employer”.**

2.8 Estimates of formal and informal employment as on 1.1. 2000 based on the above definition of informal employment are given in Table 2.2.

**Table: 2.2. Estimates of workers in formal and informal employment (in million)**

Source: Computed from unit level data of NSS 55<sup>th</sup> Round, 1999-2000, Employment-Unemployment Survey.

2.9 As per the definitions adopted by the Commission and the corresponding estimates of employment, the interrelationship between sector of employment and type of employment can be depicted as given in Table 2.3. Viewed from the point of the sector definition 85.8 per cent of the total employment in the Indian economy during 1999-00 was accounted for by the unorganised/informal sector. This was around 340 million including 4 million workers whose job status can be characterised as formal. From the point of type of employment, 91.3 per cent of the total employment was in the category of informal employment of around 362 million of which nearly 26 million was accounted for by the organised/formal sector.

**Table 2.3: Interrelationships between definitions, 1999-00 (in million)**

Sector	Employment Category		
	Formal	Informal	Total
Organised	30.66	25.79	56.45
Un-organised	4.02	336.29	<b>340.31</b>
Total	34.68	<b>362.08</b>	396.76

Source: Computed from unit level data of NSS 55<sup>th</sup> Round, 1999-2000, Employment-Unemployment Survey.

2.10 In most States the share of informal workers is around the national average; however many smaller States have a lower share than the national average. Only five States show a share that is around 80 per cent or below. These are Delhi (70 per cent), Goa (72 per cent), Nagaland (74 per cent), Sikkim (79 per cent) and Kerala (80 per cent). The relatively more industrialised States do not show significantly lower share of informal workers. In fact, it is closer to the national average with Tamil Nadu at 90 per cent, Gujarat with 92 per cent and Maharashtra at 88 per cent. In Table 2.4, we present the estimates of informal workers in the States and Union Territories.

**Table 2.4 Distribution of Informal and Total workers by State, 1999-00 (In million)**

Source: Computed from unit level data of NSS 55<sup>th</sup> Round, 1999-2000, Employment-Unemployment Survey.

2.11 Since the focus of this Report is on social security for informal workers, the Commission is of the view *that 'informal employment' should be taken as the target group for provision of social security as recommended here.* However, the Commission is keen on the registration of all informal workers as well as of all informal enterprises to enable them to receive all forms of support and assistance from the government.

2.12 The social security problems of workers in the unorganised/informal sector may be divided into two sets of problems. The first one arises out of **deficiency** or **capability deprivation** in terms of inadequate employment, low earnings, low health and educational status and so on that are related to the generalised deprivation of poorer sections of the population. The second arises out of **adversity** in the sense of absence of adequate fallback mechanisms (safety nets) to meet such contingencies as ill health, accident, death, and old age. The fact that majority of workers from socially backward communities find themselves in the unorganised/informal sector imparts a certain social dimension to the characteristics of these workers. A measure of social security in that sense should also be seen as a form of social upliftment.

2.13 Absence of a meaningful social security arrangement is not merely a problem for individual workers and their families. It also has wider ramifications in the economy and society. From an economic point of view, it debilitates the workers' ability to contribute meaningfully to his/her efficiency and thus to increase production and productivity. Low earning power coupled with vulnerabilities lead to poverty that reduces the aggregate demand in the economy. Socially, it leads to dissatisfaction and disaffection especially when a small segment of the society is well endowed and seen to be prospering. The indirect costs of the absence of social security might well be increasing social costs through policing and management of crimes and illegal activities, widespread ill health and a variety of related social problems. The social costs of managing such problems are often not appreciated in discussions on designing social security arrangements.

2.14 The focus of this Report is on the protective social security for workers in the informal economy but we do realise the complementarity of promotional social security that should form a part of an overall and integrated social policy. From a comparative perspective, there are a number of promotional social security programmes compared with protective social security. The promotional programmes include the Integrated Child Development Scheme (ICDS), the Public Distribution System (PDS) targeted on the households Below Poverty Line (BPL), the Mid-Day Meal Scheme for children in primary schools, housing schemes such as Indira Awas Yojana (IAY) and so on. A qualitative shift to the provision of promotional social security that has historic significance is the recent enactment of legislation to guarantee employment (up to 100 days) to all rural households, on demand. This National Rural Employment Guarantee is a right-based one in that the State is obliged to provide employment on demand or pay

specified compensation. The proposed national minimum social security should be seen as complementary, but protective one, to this promotional social security.

### **Articulating a Social Security Policy Framework**

2.15 India is yet to evolve a comprehensive national social security policy with regard to its entire working population. Currently social security entitlements such as provident fund, gratuity, health cover, etc. that are legally binding are available for the majority of formal workers in the organised sector. Formal social security arrangements for workers in the unorganised sector are confined to a small minority in the form of Welfare Funds for selected categories of workers sponsored by the Central and a few State governments. As may be noted from the following chapters, the coverage under these schemes as well as those initiated by a number of voluntary organisations does not exceed 5 to 6 per cent of the workers in the informal economy.

2.16 The Commission believes that social security is an important component of any social development agenda and is as relevant as physical security in the evolving concept of human security. The objective conditions in India are considered favourable to a meaningful societal transition in terms of human security. This could begin with the extension of the concept and coverage of social security through an inclusive agenda that will ensure a modicum of social security to the hitherto excluded sections of the work force.

2.17 Recent studies show that the informal sector has been registering dynamism in terms of output and earnings. The discussion on informalisation of the economy has so far only emphasized the employment aspect. However a recent study examined whether the informalisation has been accompanied by an increase in real informal wage, capital investment and value added in manufacturing at the all India level. The study found that as compared to pre-reform period (1984-85 to 1989-90), the post-reform period (1989-90 to 1999-00) witnessed an increase in informal wage (in manufacturing) accompanied by a real increase in fixed assets (proxy for capital investment) and value added. These results hold good for most of the States and Union Territories. The main message thrown up by the study is that to understand the impact of reform on labour markets, one has to look at the working of the capital market as well (Marjit and Kar 2004-05).

2.18 How does this compare with the trend in wages for agricultural workers who constitute the single largest segment of informal workers? Recent studies by many scholars (e.g. Srivastava and Singh 2005, Himanshu 2005 and Nadhanael 2005) have reported that the real wages for agricultural labourers continued to increase during the post-reform period compared to the pre-reform period but at a reduced rate. This is perhaps explained by the decline in public investment in agriculture during the post-reform period. However, the real wage

rates for non-agricultural occupations in rural India witnessed a higher growth rate during the post-reform period (1993-94-1999-00) compared to the pre-reform period (1983-1993-94) (Himanshu 2005).

2.19 While scholars have identified a number of factors that determine the agricultural wage rate, it is pertinent to note that, in general, wage rates as well as their growth rates, are lower in those States that have a high incidence of poverty in different manifestations. This is the case with the States of Assam, Bihar, Madhya Pradesh, Orissa, Uttar Pradesh and West Bengal during the post-reform period. These are also the States with very little of social security for informal workers. *There is, therefore, a critical need to improve the larger social and economic conditions governing work and workers in the informal sector and a strategy for “levelling up”.*

2.20 The proposal for extending the social security cover to the informal sector should be seen in this background. In any case, the fiscal burden of the proposed scheme is likely to be minimal since it is based on the principle of ‘collective care arrangement’ under which all the stakeholders – workers, employers (wherever identifiable or their proxies in the form of beneficiaries of services), and the State – contribute. There will be legitimate ground for internalising the cost of social security to the society as a whole in the case of certain segments of working poor (agricultural labourers, home-based workers and independent workers like street vendors/artisanal workers, etc.). In such cases, the government will have to contribute a part of the cost of social security.

2.21 Social security to the hitherto excluded workers in the informal sector as envisaged in this proposal is not a stand-alone one. Although the country does not have a formal social policy, it does have a long-standing and universal social development agenda arising out of the Directive Principles enshrined in the Constitution. In addition, it also has several target-oriented and long-standing programmes with the explicit objective of eradication of poverty and deprivation. There is need to locate the evolving/proposed national social security system within the framework of the existing (and also evolving) national social/human development programmes for the poor and the larger framework of universal social/human development programmes. This may be seen at three different levels.

2.22 **Universal Programmes:** At the first level is the universal programmes and schemes for basic social/human development such as the mission for literacy, schooling, health care services, drinking water and sanitation, technical training, etc. that should be viewed as foundational to any sound social and economic development policy. These programmes address the issue of creation and enhancement of human capabilities through creating entitlements to all citizens funded by the public exchequer. The effectiveness and advancement of these functions of the State are often a pre-requisite for the effectiveness of

specific protective social security policies and schemes such as the one proposed here.

**2.23 Targeted Programmes for the Poor and the Vulnerable:** At the second level is the social/human development schemes that are intended to provide a measure of socio-economic security to the poorer citizens irrespective of their status as working or non-working poor. The underlying idea here is to meet both promotional and protective needs of some sections of the population in their basic social security needs. Over time, a number of programmes have come to stay in the country. As mentioned earlier, a recent major initiative to address the deficiency in basic social security of the poor is the National Rural Employment Guarantee which differs from all the others because it is sought to be embedded in the notion of 'right to work' and hence guaranteed by the State. *As a complement to these programmes the National Rural Employment Guarantee will go a long way in meeting the deficiency in basic social security of the working poor in India.*

**2.24 Social Security for Workers in the Unorganised/Informal Sector:** At the third level, we bring in the social security system for the workers in the unorganised/informal sector. This could be to address both deficiency and adversity. The latter one arises out of various contingencies and it is this issue that has not yet been systematically addressed. The most important ones here are social security cover for ill health, accidents/death and old age. These fall under the category of protective social security. To this could be added the social security concerns arising out of deficiency such as access to credit/finance (especially for the self-employed), loans for upgrading skills, loans for housing, children's education, etc. The distinctive feature in this case is that these are tailored to meet the social security concerns of workers *qua* workers in the unorganised/informal sector. This may be seen as complementary to the Universal and Targeted programmes, which are based on citizenship and not work status.

**2.25** However, in a developing country context such as India, social security arrangements to the working poor have wider ramifications to the economy and society. From a macro economic point of view, it helps to develop a healthy and contented work force capable of enhancing their contribution to national income and thus enhance the capacity of the economy to grow. When more than 90 percent of the workforce is in the unorganised/informal sector, the urgency is so much greater for sustaining a higher rate of growth of the economy. A workforce with higher capability and security could contribute to higher growth, which in turn would enhance the aggregate demand in the economy through higher purchasing power of this vast mass of workforce. The mutually reinforcing nature of this relationship needs to be recognised and capitalised.

2.26 Given this background, the Report makes out a case for a national minimum social security to all workers in the informal economy to be covered in a phased manner over a period of five years. To this universal scheme State governments and trade-specific welfare boards may also further contribute resources to provide additional benefits, over time and in different regions. The Commission considers that an effective implementation of this scheme will go a long way to correct the imbalances, where a high rate of economic growth and prosperity of a section of its population co-exists with poverty, deprivation and adversity among vast masses belonging to its informal economy.

## Sources of Insecurity

### Security Needs of Informal Workers

3.0 The International Labour Organisation's notion of social security as expressed in the International Convention No. 102 includes nine core contingencies that lead to stoppage or substantial reduction of earnings. These are sickness, maternity, employment injury, unemployment, invalidity, old age, death, the need for long-term medical care and supporting families with children.

3.1 There are a few studies in the Indian context which have analysed the impact of various sources of social security and the need for social security for informal sector workers. A recent study in Karnataka used a participatory method to derive the felt social security needs of unorganised sector workers. Among the workers surveyed 92.3 percent felt that benefits towards old age, unemployment, death, sickness and employment injury were relevant for them. Women in the reproductive age groups also felt that maternity benefits were important (Rajasekhar, et. al. 2005). By showing various pictures of these six types of needs, each respondent was asked to assign priority to these needs. Priorities were assigned more or less in the same order. Workers in the informal sector were not homogeneous and various segments among them had different priorities. Among the informal workers, agricultural labourers felt that old age was a major concern followed by unemployment. Among construction workers, unemployment followed by old age and employment injury was assigned priority. Among domestic workers too old age security was the major concern followed by unemployment and sickness. Among the women who gave priority to maternity were newly married women, pregnant women and those planning to have a male child as they only had girl children.

3.2 An interesting aspect of this study was that about 7.7 percent of the sample workers were unwilling to rank their priorities for security. It was found that these were the highly vulnerable category of households for whom obviously all these insecurities were not important enough since their basic entitlements had not been satisfactorily met.

### Health Security

3.3 Health security can be thought of as having low exposure to risk and having access to health care services with the ability to pay for medical care and medicine when necessary. Such health security should be equally available and accessible to all citizens.

3.4 A number of studies show that risks and crisis situations due to low level of health security is endemic for informal sector workers. A field study in India (Nojonen and Kantor, 1996) observed that among the stress events that households faced, which placed their income and resources under great strain, illness episodes were the most important. Stress events associated with health, dominated the outflows comprising 48 percent of annual household expenditure, while rituals and marriages account for 30 percent.

3.5 In a compilation of studies conducted on the poor working women of SEWA, Chen (2005) noted that the most common risks include illness and loss of job. Members of SEWA who were all poor self-employed women, emphasize that 'health, is their only wealth'. Poor health status affects their productivity forcing them to spend their hard-earned money on expensive healthcare (Sinha, 2003).

3.6 In a study of people's security concerns at the household level it was reported (Unni and Rani 2002) that nearly half of the workers felt that the nature of their work had an adverse effect on their health. While this may be based on perception of the individual workers, poor working environment and low income status, along with a high proportion of chronic addiction, and illness leads to insecurity of the households working in the informal sector. The vulnerability of the poor informal workers increases when they have to pay fully for their medical care with no subsidy or support. The study found that about 79 percent of the workers paid for the entire cost of medical care without any support. The precarious existence of these workers seemed quite evident. There was not only a loss of income among the workers due to sickness or ill health, but they also had to bear the entire cost burden of health care. Further, less than five percent of the workers had some medical insurance. Even this was mainly because the sample consisted of some SEWA members, a trade union providing some medical insurance cover.

3.7 *Minor and Major Incidence of Illness:* The risk of health insecurity needs to be distinguished into kind of illness that can be treated with medication at home and major illness necessitating hospitalisation. This latter can be termed as 'catastrophic' risks. Catastrophic risks have been categorised as those where the household health expenditures exceeded a certain fraction of total household expenditures or of their ability to pay (Garg and Karan, 2006). Household expenditure above 5 percent of total and non-food expenditure of the household was taken to be catastrophic.

3.8 Two studies found that illness requiring hospitalization were often 'catastrophic', costing more than 10 percent of the annual incomes of the household (Chen and Snodgrass, 2001). It is not difficult to see why the poor are among the most vulnerable in any society. A shock that has a relatively small impact on the non-poor can be a cause for great concern for the poor, since even marginal downward fluctuations in income can push them irreversibly below destitution levels (Nojonen and Kantor 1996).

3.9 It has been observed that countries where there was higher share of out of pocket expenditure on health, greater proportion of households were likely to face catastrophic risk. In India, a WHO (2005) study estimated that out of pocket expenditure was over three quarters of total health expenditures. A micro study found it to vary from about 55 percent in Punjab and 75 percent in Karnataka (Garg and Karan, 2006).

3.10 In 1999-2000 (NSSO data), about a quarter and 48 percent of total households in the country spent more than 5 percent of their total and non-food consumption expenditure respectively on out of pocket expenditure on health. More than 3.4 percent of households, approximately 6 million, faced catastrophic risk of spending more than 40 percent of their total non-food expenditure on out of pocket expenditure (Garg and Karan, 2006).

3.11 *Risk of Untreated Morbidity among Poor:* A number of studies observed that the lack of resources to pay often leads to the poor foregoing health care or becoming indebted or impoverished trying to pay for it. On an average, the poorest quintile is 2.6 times more likely than the richest to forego medical treatment when ill (quoted in Devadasan et.al., 2004). A study of slums in the two metropolitan cities of Chennai and Delhi found that 89 percent of sick individuals did not obtain treatment when ill (Sunder et. al. 2002). The relatively rich were more likely to obtain treatment.

3.12 According to the NSS data, the extent of untreated morbidity (always higher among the poor), showed a steep gradient between the lower and upper ends of the economic spectrum (Iyer and Sen, 2000). In 1995-96 the NSS reported 180 per 1000 cases of untreated illness episodes among men in the bottom decile group, which dropped to 38 in the top decile group in urban areas. Among women, the incidence of untreated morbidity was 193 per 1000 in the bottom decile and 67 in the top decile group. Women in the poorest households were least likely to receive medical attention. Obviously, poverty was a major factor contributing to households not seeking treatment during illness.

3.13 *Cost of Treatment:* The cost of treatment includes medical fees, cost of medicines and diagnostic facilities, hospitalisation and the cost of travel, boarding and lodging. The NSS reports the cost of treatment including direct payment to the hospital, the cost of medicines, investigations and tests. According to the NSS data, there has been a steep rise in the cost of health care during 1985-86 to 1995-96. The cost of out-patient treatment rose by 132 percent in rural and 146 percent in urban areas during the period. The cost of in-patient care rose by 436 percent in rural (Rs.3202 per episode in 1995-96) and by 320 percent in urban (Rs. 3921 per episode) areas during the period (Iyer and Sen, 2000).

3.14 The average cost of total expenditure for hospitalisation per hospitalised treatment, varied considerably across states and across rural and urban areas. In 1986-87, the lowest reported total expenditure for treatment in rural and urban

sectors was in Kerala. The highest average total expenditure was Rs. 2053 and Rs. 1821 for rural and urban Delhi compared to a low of Rs. 464 and Rs.487 in rural and urban Kerala (Krishnan, 1999).

3.15 There could be various reasons for the low cost of treatment in Kerala. However, the most important cause is the high density of government health facilities in rural areas and a high competition between the public and private sector in health care. Thus, the availability of public health infrastructure is crucial in helping to lower the cost of treatment.

3.16 Further, the difference in cost of treatment between private and public hospital is large. There was variation across states for such treatment as well. The lowest cost reported by the NSS was for rural patients in Kerala treated in government hospitals. A rural patient in Kerala would have to pay three and a half times more for treatment in a private hospital, while in other states they would have paid four to five times more for treatment in private hospitals. In general, urban patients paid more for treatment in both government and private hospitals. Compared to the base of hospital payment made by a rural Kerala patient, the urban hospital payments were higher by 1.7 to 6 times (Krishnan, 1999).

3.17 *Burden of Treatment:* There is a difference between the 'cost of treatment' and 'burden of treatment' as pointed out by Krishnan (1999). The latter includes the cost of treatment (depending on the nature and duration of illness) plus 'the loss of income of the patient and others during the period of illness'. The burden of treatment for an individual or family is defined as the ratio of total cost of illness to the income of the individual or family. Using NSS 1986-87 data Krishnan (1999) estimated the relative burden of treatment, including only direct costs, as the ratio of treatment cost to the annual per capita expenditure of each monthly per capita expenditure decile group to capture the extent of burden faced by different socio-economic groups.

3.18 The burden of treatment in government hospitals in rural sector is below 30 percent in Kerala, Tamil Nadu and West Bengal, while it varies between 100 to 230 percent in Bihar, Assam, Punjab, Rajasthan, Haryana and Uttar Pradesh. The burden of treatment in private hospitals in the rural areas exceeds 100 percent in all states except Assam, West Bengal, Kerala and Tamil Nadu. This implies that health care in these states had to be financed by incurring debt or forgoing overall consumption in the household. Such reduction in consumption, often of food intake, could increase the risk of infection and morbidity in the society. Women and children are likely to face higher risks in this regard.

3.19 The burden of treatment appeared lower in urban areas in spite of the higher cost reported earlier. This may be partly due to somewhat higher levels of consumption expenditure even for the urban poor. In 1986-87, excluding Uttar Pradesh, the burden of treatment in government hospitals in all other states was

below 100 percent. For treatment in the private hospitals in urban areas, however, the burden exceeded 100 percent in all states except Assam, Haryana, Karnataka, Kerala, Gujarat and West Bengal.

3.20 The Commission is aware that none of the poverty alleviation programmes make allowance for the burden of treatment. Sickness is a random event and hence income transfer is not a solution. We are convinced of the argument that a comprehensive health policy of the future should be built on strengthening the public health care infrastructure and a comprehensive insurance plan for hospitalisation.

### **Maternity Needs**

3.21 India has a high maternal mortality rate even judged by the standards of developing countries as a whole not to speak of the Asian region. The National Human Development Report prepared by the Planning Commission (GOI 2002) states that, as of 1999 the maternal mortality rate (MMR) was 407 (indicating deaths per 100,000 delivery based on the Sample Registration System, SRS). The National Family Health Survey (NFHS) I and II however recorded a higher MMR and worse still an increase in MMR from 424 in 1992-93 to 540 in 1998 (Priya, 2006).

3.22 The national average however conceals the considerable regional variation within India with Kerala registering a maternal mortality rate of 198 and Uttar Pradesh 707. Even after half a century of independence, one of the most frequent causes of death among women is maternal mortality. Abortion, haemorrhage, toxæmia and anaemia account for the large majority of all maternal deaths. This cause of death suggests that a large number of maternal deaths are preventable. While nutrition and adequate spacing between births are important, the crucial factor very often is the availability of professional help during delivery. If institutional delivery is taken as an indicator, then Kerala shows, as of 1999, almost complete coverage (94 percent of births taking place in health care institutions) as against 42 per cent for the country as a whole and less than 30 per cent for many states including the large ones such as Uttar Pradesh, Bihar and Madhya Pradesh. The need for adequate health infrastructure is urgent. However, a security cover such as an insurance is also likely to increase the chances of institutional delivery, with consequent decline in maternal deaths.

3.23 Among poor women with the additional burden of economic activity in the informal sector where the conditions of work are strenuous, the chances of maternal mortality would be higher, particularly if proper health facilities are not obtained. Another concern expressed by the poor informal women workers is the loss of income during advanced period of maternity and immediately after child birth, when they are not able to work for sometime. Maternity and childbirth also require a lot of risks and expenses that could plunge a poor household into a

crisis of borrowing and high interest expenditure. This would result in reduction in incomes and savings (Sinha, 2003).

### **Life and Accident Security**

3.24 The death of a breadwinner is a tragic event, but in the case of the informal workers it is also a question of survival for the family left behind due to the permanent loss of income. Further, death entails additional expenses for which the family has to borrow money, often on onerous terms, spend savings or sell assets.

3.25 An accident either during the course of work or otherwise is a major crisis for the informal workers since it leads to loss of income. It further implies additional expenditure of medicines, hospitalisation etc. If the accident leads to partial and/or permanent disability, the loss is much greater.

### **Old Age Security**

3.26 The share of the aged (60+) in India is lower than its Asian neighbours in East and South East Asia. However as the demographic transition picks up in India, the share of the aged is likely to increase. Projections indicate that the current share of 7.47 per cent is likely to increase to 9.8 per cent by 2021. What is important from a social security point of view is the institutional mechanism for taking care of the aged former informal workers in general and the poor in particular.

3.27 The study by Rajasekhar, et. al. (2005) mentioned earlier, brought out that old age was a major concern of the workers. Agricultural labourers and construction workers in the study reported the fear of not being able to work during old age. Insecurity with regard to old age was perhaps due to the breaking up of the joint family system and also because the poor were more likely to be in nuclear families.

3.28 For the large proportion of old aged persons expected in the future, the insecurities will arise due to various reasons. First, adults in poor households themselves face insecurity of work and income to lead a life of security and some dignity. Successive Population Censuses have shown a declining work participation rate among the elderly. This may be a positive feature implying that they are able to retire early. For the informal workers, however, this could be a source of risk, since their earnings during their working life are unlikely to support their needs in the old age. Second, In India the aged are generally dependent on their children for support. The presence of the poor aged adds to the burden and further deprivation of the family as a whole. The insecurity of the household is further exacerbated by general poverty, greater morbidity among the aged. Thirdly, inadequate public health care facilities, and increasing cost of private

health care facilities of the aged can throw the household into a major crisis (Alam, 2006).

3.29 In the Karnataka study cited earlier, most of the workers who reported old age insecurity as the most important were those who were above the age of 41 years (Rajasekhar, et. al. 2005). The younger workers showed less concern for old age. About 35 percent of the workers are in the age group of 31 to 40 years and less than 12 percent were above the age of 50 years. The travails of the immediate day-to-day survival keep the younger workers preoccupied and only after some of their needs are met does the issue of longer term security arise.

### **Unemployment Insecurity**

3.30 The micro studies quoted earlier indicated that another source of insecurity reported by the informal workers was unemployment. In India, poor workers were unlikely to remain unemployed for long and this was reflected in low rates of open unemployment. In 1999-2000 the unemployment rate by daily status was 7.3 percent and there were 26.6 million unemployed workers in the country. Even this becomes a large number, but a greater proportion of these workers are likely to be urban educated youth. For the informal/unorganised workers, underemployment and low productivity employment with the consequent risk of low incomes and high levels of poverty is the greater source of insecurity.

3.31 In a People's Security Survey conducted in Ahmedabad district, a direct question on whether they were able to get work on a regular basis on most days they wished to work was canvassed. About 23 percent of the workers reported irregularity of employment. This percentage was the largest for casual workers, 44 percent (Unni and Rani, 2002). Underemployment in the form of irregularity of work is a source of insecurity for the informal workers.

3.32 In India, the newly enacted National Rural Employment Guarantee Act is an attempt to provide employment security through guaranteeing at least 100 days of work in the most backward districts of the country. The Employment Guarantee holds the promise of significantly alleviating the problem of under employment of those sections of the labouring population who can perform manual labour. However, informal workers who are varied by nature and location would continue to face the risk of loss of employment for a variety of reasons. Hence the provision of unemployment allowance to informal workers in the face of certain types of contingencies needs to be considered.

## 4

### Central Government Initiatives

4.0 The Central Government has over the years taken a number of initiatives to extend social security cover to workers in the unorganised sector. However, the social security entitlements backed by legislation have been mainly for workers in the organised sector. The legislation backed entitlements for the unorganised sector are limited for workers in certain occupations. Their coverage would roughly be around fifteen million (around five million covered by Central government schemes and the remaining by State government schemes). To this we may add the National Old Age Pension Scheme under which around six million old age and women are covered. This makes the total 21 million that is equivalent to a mere six per cent of the total unorganised/informal workers of around 362 million as in the year 2000.

4.1 The model for social security that has so far been adopted by the Central as also the State governments is that of Welfare Funds. Typically, this model is a tripartite one consisting of the representatives of workers, employers (wherever identifiable) and those of the government. A Board appointed by the government manages it, the chief executive of which is a government functionary. Defined social security cover is given to the worker-members of the Funds for which contributions are collected from the workers, from the employers (usually through a cess) and, in most cases, from the government. Apart from the Welfare Fund Model, there are a few "Schemes" implemented by Central Government through public sector insurance companies and a few others directly implemented by departments. Most of the social security benefits consist of life insurance (natural or accidental), compensation for disability and some assistance for health related problems.

4.2 A detailed table highlighting the main features of the Central Government sponsored social security schemes are given in **Appendix 4**.

4.3 The various Central government initiatives are delineated forthwith. While our focus is on social security for unorganized workers, the protective social security programme provided to the very poor citizens without any reference to their status as workers is mentioned to begin with. This is the National Social Assistance Programme (NSAP). However, most of the beneficiaries of this programme might have been workers in the unorganised sector. After a brief review of the NSAP, we focus on the protective social security for workers in the unorganised sector provided by the Central Government for selected occupations.

## **National Social Assistance Programme (1995) (NSAP)**

4.4 The NSAP is considered the first national programme of a cash-transfer nature in the country. Many, if not all, State Governments have initiated such a programme much before the NSAP. The programme intends to protect poor and destitute persons in events of insecurities during old age, death of breadwinner and maternity. The scheme is hundred percent centrally funded to ensure that a measure of social protection, albeit limited, is available to the poor and old persons throughout the country. The programme was launched to cover three benefits:

- a) **National Old Age Pension Scheme (NOAPS):** The applicant should be a destitute in the sense of having little or no regular means of subsistence from his/her own sources of income or through support of family members or other sources who is of age more than 65. A financial assistance of Rs 75/- p.m. per beneficiary was given which has now been increased to Rs 200/-p.m. The coverage is 72.8 lakhs as in 2005-2006. The expenditure reported by various States upto February 2006 is 195.66 crores.
- b) **National Family Benefit Scheme (NFBS):** The scheme is targeted at households Below Poverty Line on the death of the primary breadwinner. The applicant should be of the age group of 18 to 65. A lump sum financial assistance of Rs. 10,000/- is given. The coverage of the scheme is 2.11 lakhs as in 2005-2006. The expenditure reported by various States upto February 2006 is 80.62 crores.
- c) **National Maternity Benefit Scheme (NMBS):** Provided to pregnant women of BPL households for up to first two live births provided they were of age 19 and above. It gave a lump sum assistance of Rs. 500/-. It covered 11.52 lakhs beneficiaries as in 2000-01. The scheme has been transferred from the Ministry of Rural Development to the Department of Health and Family Welfare with effect from 2000-01 and has been redesigned as Janani Suraksha Yojana in which cash benefits up to Rs.1300 in rural areas and Rs.800 in urban areas to women in BPL households for ante-natal care and institutional deliveries are provided.

4.5 The Gram Panchayats and Municipalities play an important role in the identification of beneficiaries, its monitoring and disbursement of funds. The State Government communicates the targets for NOAPS and other schemes to the Gram Panchayats / Municipalities so that identification can take place in the gram sabhas by the Gram Panchayat and in the neighbourhood/ mohalla committees by the Municipalities in line with these targets.

4.6 NSAP has been transferred to the State Plan from the Year 2002-03. The funds under the scheme are released as Additional Central Assistance (ACA) to the States/UTs by the Ministry of Finance. In order to ensure that a

minimum level of expenditure is incurred on the Welfare schemes, ACA is an additionality over and above the normal allocation of the State for Welfare schemes as reflected in the State's Budget. The States therefore have to provide for Mandatory Minimum Provision (MMP) for these schemes in their own budget. This consideration would be taken into account while determining the level of Central assistance. The parameters for determining the Central assistance are the population of the State, poverty ratio in the total population, proportion of 65+ age group in total population, proportion of 18-64 age group in total population, age specific mortality in the 18-64 age group, crude birth rate, proportion of first two live births in total births. Audit report coupled with the Utilisation Certificate by the State Government are used to monitor the progress of the scheme and release of further funds. The total allocation of funds for NOAPS, NFBS and Annapurna scheme by the Ministry of Rural Development for the year 2005-06 has been 1190 crores of which 880.39 crore has been released upto December 2005 and the total expenditure reported on the three schemes upto February 2006 is 290.22 crores. As mentioned earlier, cash-transfer based social assistance programme for the old aged poor, widows and handicapped has been in existence in a number of States for quite some time. The national scheme by its very character has made it possible to extend to States, which did not have one so far. Many State governments have contributed an additional sum and thus provide a pension that exceeded the national minimum of Rs.75 per month. For example, the States of Tamil Nadu, Punjab and Haryana provided a pension of Rs.200 per month per beneficiary including the contribution of the Central government. States like Kerala and Orissa paid a sum between Rs.140-150. However, there are States which did not make any contribution of their own and that includes the relatively richer State of Maharashtra.

4.7 By launching this scheme, the government recognised that a social security measure of this nature demands national attention and initiative. In fact, the Central Government has enhanced the benefit under the NOAPS from Rs.75 to Rs.200 per month from 2006-07 thereby providing half the amount required to cross the officially determined poverty line per person per month.

### **Central Welfare Funds**

4.8 Separate legislations have been enacted by the Parliament to set up five Welfare Funds to be administered by the Ministry of Labour to provide housing, medical care, social security, education and recreational facilities to workers in selected mining operations, beedi-making and production of feature films (called cine workers). All these funds are financed out of proceeds of cess levied under respective Cess/Fund Acts on manufactured beedi, feature films, export of mica, consumption of limestone & dolomite and consumption and export of iron ore, manganese ore and chrome ore. The Funds are created by the following Acts:

- a) The Mica Mines Labour Welfare Fund Act (1946),
- b) The Lime Stone and Dolomite Mines Labour Welfare Fund Act (1972),
- c) The Iron Ore, Manganese Ore and Chrome Ore Mines Labour Welfare Fund Act (1976),
- d) The Beedi Workers Welfare Fund Act (1976), and
- e) The Cine Workers Welfare Fund Act (1981).

4.9 These schemes provide for medical assistance of Rs. 150/- for the purchase of spectacles, reservation of bed in T.B hospitals, treatment and subsistence allowance not exceeding Rs. 750/- p.m. in case of tuberculosis, reimbursement of expenditure up to Rs. 10 lakh for heart disease and kidney transplant. The annual expenditure under these funds is around Rs. one hundred crore. The coverage, presently, according to the Ministry of Labour and Employment, is more than 40 lakh workers and their families.

4.10 The current rates of cess levied on the products are (i) 4.5 percent *ad valorem* on export of mica (with effect from 1 November 1990), (ii) One rupee per metric tonne of limestone and dolomite (with effect from 27 December 2000), and (iii) Re. one, four and six per tonne respectively for iron ore, manganese ore and chrome ore. The relatively active Fund among all these is the one relating to beedi workers.

a) ***The Beedi Workers Welfare Fund Act (1976)***

4.11 A premium of Rs. 18/- per member per annum is shared equally by the Labour Welfare Organization and Social Security Fund. In addition to the benefits given to mine workers, Beedi workers are insured under the General Insurance Scheme. It provides Rs. 3,000 in case of natural death and Rs. 25,000/- in case of accidental deaths or total permanent disability and Rs. 12,500 in case of partial permanent disability. There is an Integrated Housing Scheme for beedi workers, which has recently been liberalised, and the amount of housing subsidy has been increased from Rs.20 thousand to Rs.40 thousand per tenement.

4.12 Apart from the provision of individual claim-based benefits, a new scheme was started during 2004-05 to improve the supply side of health care benefits to the beedi workers. Under this scheme all the State Governments/ESIC/Beedi workers housing cooperative societies/reputed NGOs/Central or State Government recognised private hospitals intending to construct or expand its existing infrastructure exclusively for providing both indoor and outdoor medical facilities to beedi workers and their dependents shall be eligible for one time grant-in-aid of up to Rs.200 lakh (2 crores) or 75 percent of the actual cost of construction of hospital building or including the cost of medical equipments, whichever is less. One time grant-in-aid would also be available for purchase of ambulance/mobile van equipped with medical/ laparoscopic equipments and accessories up to a limit of Rs.4 lakh or 75 percent of the total cost whichever is less. They will also be eligible for an amount equivalent to the medicines supplied

to beedi workers and their dependents upto an amount not exceeding Rs.10 lakh per annum or 75 percent of the actual cost, whichever is less. The current rate of cess levied is Rs.4/- per one thousand beedies with effect from 1<sup>st</sup> April 2005.

b) **The Cine Workers Welfare Fund Act (1981)**

4.13 Cine workers, whose income ceiling is Rs. 1600/- p.m., are included in the scheme. The premium of Rs. 30/- annually per member is fully paid by the Welfare Fund. Benefits include Rs. 5000/- in case of natural death and Rs. 10,000/- in case of accidental death under Group Insurance Scheme.

4.14 The current rate of cess is Rs.20,000/- per feature film in Hindi and English and Rs.10,000/- per feature film in regional languages with effect from 20<sup>th</sup> April 2001.

4.15 As per the Annual Report 2005-06 of Ministry of Labour & Employment the achievement of Welfare Funds is reflected as under:

**Table 4.1 Achievement of Welfare Funds (Rs in Crore)**

	2004-05	2005-06 *
Utilisation of Welfare Funds	108.59	51.11
Cess collection	97.80	51.27
Expenditure on Health Care facilities	44.51	21.02
Assistance sanctioned for housing	13.16	68.75
Expenditure on educational assistance	44.38	21.45
Expenditure on recreational facilities	0.69	0.26

\*2005-06 figures are up to September 2005.

4.16 As regards the extent of coverage of the various Welfare Funds administered by the Ministry of Labour & Employment, the Ministry Vide letter No. Z-2005/17/05-W.11 dated 10th August 2005 has inter-alia informed the Commission that *“So far as number of workers actually receiving the benefits (along with amounts) is concerned, it is intimated that the actual number of workers receiving the benefits under different schemes are not maintained”*.

**Varishta Pension Bima (2003)**

4.17 The scheme is exclusively for unorganized sector workers of age 55 and above which is fully financed by the investment of the beneficiary with an annual return of 9 per cent in the form of monthly pension. The amount of pension benefit vary according to the amount invested from a minimum of Rs. 33, 335/- to a maximum of Rs. 2, 66, 665/-. The minimum and maximum monthly pension per month would be Rs. 250/- and 2000. The scheme is implemented by LIC. The Government provides subsidy to the LIC to the tune of the difference of actual pension payout @ 9% and the amount actually earned by the LIC on the corpus. The amount of subsidy received by LIC from the Government for this scheme

which guarantees pension of 9% payable monthly during 2005-06 was about Rs.250 crores.

### **Janashree Bima Yojana (2000)**

4.18 The Janshree Bima Yojana, is targeted at the urban and rural poor who live below the poverty line or on the margin. The premium for the insurance cover would be Rs.200 a year of which 50% would be borne by the Central Govt. through the newly set up Social Security Fund. The balance premium would have to be paid by the individual or some nodal agency or the State Govt.

4.19 The scheme provides for payment of Rs. 20,000 to the nominee in the event of death of the policyholder due to natural causes. In case of accidental death or permanent disability, the benefit will be enhanced to Rs.50,000 and in case of partial disability, the policy holder would get Rs.25,000. The scheme will be administered by the LIC and will be applicable to groups of at least 25 members. The groups will be identified and notified by the LIC in consultation with the designated nodal agency in specific areas. The nodal agencies could be panchayats, non-governmental organizations, self-help groups or any other institutionalized arrangement.

### **Unorganized Sector Workers Social Security Scheme (2004)**

4.20 As an outcome of the recommendations of the Second National Labour Commission, the Central Government launched the Unorganized Sector Workers Social Security Scheme (2002) on a pilot basis in 50 districts. It is available for unorganized and self- employed workers drawing pay/ wage/ income not more than Rs.6500/- per month. The scheme is financed by contribution at Rs.50/- per month from workers in the age group of 18 - 35 and Rs 100/- per month for the age group of 36-50. The employers contribute Rs. 100/- per month and the government at 1.16% of the monthly wages of the workers. The scheme includes three benefits like:

- a) **Old-Age Pension Scheme:** A minimum pension of Rs.500/- per month at the age of 60 years or permanent/total disablement and family pension in case of the death of the worker.
- b) **Personal Accidental Insurance:** It has the provision of giving accidental insurance of Rs. 1 lakh.
- c) **Medical Insurance:** It gives a medical reimbursement of hospitalisation expenses up to Rs. 30, 000/- in a year and Rs. 25, 000/- for accidental death.

4.21 So far only 3,500 workers have been enrolled under the scheme. This scheme is virtually closed as it has no statutory backing, is voluntary in nature and no contribution from the employers is forthcoming.

### **Universal Health Insurance Scheme (UHIS), 2004**

4.22 The community based Universal Health Insurance Scheme was launched by the four public sector general insurance companies in July 2003. The UHIS was redesigned in 2004-05 made exclusively for persons and families below the poverty line with a premium of Rs.165 for individuals, Rs.248 for families of five persons and Rs. 330 for a family of seven. The benefits under the scheme were reimbursement of medical expenses up to Rs.30000 towards hospitalization, an insurance cover for death due to accident of Rs.25000 and compensation due to loss of earning at the rate of Rs.50 per day up to a maximum of 15 days. However UHIS excludes maternity benefit and outpatients care. The coverage is around 1 crore persons in the current year.

### **Scheme for Handloom Weavers and Artisans**

4.23 The programme includes a number of benefits like:

- a) **Thrift Fund Scheme:** Every member contributes 8 paise per rupee of wage earned and Central and State governments contribute 4 paise each to the fund. The scheme is implemented by the Weavers Cooperative Societies/ Corporations. It provides temporary advance, partial and final withdrawal.
- b) **New Insurance Scheme:** This is a scheme implemented by the United India Insurance Company and financed by the Central government (Rs.60/-), State government (Rs. 40/-) and handloom weavers (Rs. 20/-) to share an annual premium of Rs. 120/-. The benefits include Rs.1000/- in case of loss of dwelling due to natural calamities or fire, Rs. One lakh in case of accidental death, reimbursement of hospitalization charges up to Rs. 2000/- and maternity benefits.
- c) **Group Insurance Scheme:** Under this scheme an assured sum of Rs. 10,000/- will be given.
- d) **Pension Plan Scheme:** A sum of Rs. 1000/- per month is given to master crafts person unable to work due to old age.
- e) **Insurance for Powerloom Weavers:** The scheme insures workers in the age group of 18 to 60 and with an income of Rs. 700 p.m. the Central and the State government equally share the annual premium of Rs. 120/-. Benefits are given in case of natural death (Rs. 10, 000/-) and accidental death (Rs. 20,000/-). In addition, the accumulated amount in the beneficiary's running account earns an interest at 11% per annum.

**Krishi Samajik Suraksha Yojana (started on 1<sup>st</sup> July 2001 and closed on 24.02.2004)**

4.24 This scheme was carried out in 50 identified districts to cover about 10 lakh agricultural workers. The Life Insurance Corporation of India implemented the scheme which covered the agricultural worker within the age group of 18-50. The worker was required to pay Rs. 1/- per day and the contribution of government was Rs.2/- per day. Benefits included life-cum-accident insurance, the lump sum amount of Rs. 4,000/- as money back after 10<sup>th</sup> year and to be doubled after every next 10 years till the age of 60; pension ranging from Rs. 100/- to Rs. 1,900/- per month depending upon the age of entry. However, due to paucity of funds the Ministry of Finance took a decision to close this scheme while retaining the scheme for the workers registered till 24.02.2004.

4.25 More than 2.53 lakh agricultural workers were covered under this scheme in 50 select districts in 28 States. There was a demand from other districts for extension of the scheme to the agricultural workers in their areas, which was not agreed upon. The scheme was implemented either through the Gram Panchayats or through the nodal agencies. Where nodal agencies were involved they expected some amount of reimbursement of administrative expenses which was not agreed to by the Ministry.

**Umbrella Legislation for the Welfare of Construction Workers (1996)**

4.26 One of the notable initiatives in regulating conditions of work and provision of a measure of social security relates to the group of construction workers who form one of the largest segments of workers in the unorganised sector. Two umbrella legislations have been passed by the Parliament on the basis of which the States are expected to enact State-level legislations. The two Central Acts are:

- a) The Building and Other Construction Workers (Regulation of Employment and Conditions of Service) Act, 1996; and
- b) The Building and Other Construction Workers Welfare Cess Act (1996).

4.27 Following these Acts, the Building and Other Construction Workers (ECS) Central Rules, 1998 have been notified on 19 November 1998. The Act is applicable to every establishment that employs 10 or more workers in any building or construction work, where the project is more than Rs.10 lakh. The Welfare Funds proposed in the Act are to be financed by contributions from beneficiaries, levy of a cess on construction works at a rate between 1 to 2 % of the construction cost incurred by an employer and non-mandatory grants by State/ Central Governments. Benefits like support in the event of accident, old age pension, housing loans, payment of insurance premium, children's education, medical and maternity benefits are to be given.

4.28 Under these umbrella legislations, all State Governments are expected to enact their own legislations. So far only 6 States have enacted such legislations. Most of the other States are still in the process of adoption and implementation of these Acts. The State of Kerala was the first to bring about legislation on social security and welfare for construction workers, even before the Central legislation, and it perhaps acted a precursor to such a national level legislation. The State of Tamil Nadu also brought about legislation in 1997 under which one of the employment included was 'Employment in Construction Work'. The Boards and Funds set up for providing a measure of social security for construction workers were set up in 1990 in Kerala and 1997 in Tamil Nadu.

## 5

### State level Initiatives

5.0 Apart from the Central government initiatives on social security described in the previous chapter, there are a number of social security initiatives at the state level. These initiatives, however, have been found to be uneven both in terms of coverage of states as well as workers.

5.1 As regards statutory provisions, Kerala is the leading one with a number of Welfare Funds that have covered, as per available figures, 54 percent of informal workers in the State. Tamil Nadu also has a system of Welfare Funds aimed at providing some social security to the workers in the unorganised sector. A relatively well functioning Welfare Board/Fund for headload workers (Mathadi workers) exists in Maharashtra that is yet to be extended to other workers in the unorganised sector. A few other states such as Gujarat, Karnataka, Andhra Pradesh and Madhya Pradesh have also established Welfare Boards/Funds for selected categories of workers. West Bengal has recently introduced a statutory provision of social security for the unorganised workers in the form of a Provident Fund. This model has now been followed by the State of Tripura. Apart from these statutory provisions, a number of schemes also operate in many, if not all, states.

5.2 With the exception of a few, most initiatives do not cover sickness. They mostly cover such requirements as accidental death and injury, maternity and some financial assistance for education of children. As we have noted earlier, one of the major insecurities of workers is frequent incidences of illness and need of medical care and hospitalization of the workers and other family members.

5.3 Even in states with statutorily backed Welfare Boards and Funds, there is considerable scope for rationalisation of contributions and benefits. There is also the need for bringing down the costs of administration. Professional management systems are also required for management of funds and strengthening the delivery mechanisms. A table highlighting the main features of the social security schemes at the State level is given in **Appendix 5**.

5.4 Given the number of provisions (both in terms of Welfare Funds and schemes) addressed to specific categories of workers, there is a case for establishing a state-level board that will, inter alia, extend social security coverage to all the workers. At the same time, such a state-level body can also take care of the implementation of national level schemes. It is with this in mind that the Commission has proposed an authority at the national level as well as at the state level. They are designed in such a way as to include the existing

arrangements while ensuring a national minimum for all unorganized workers in the country, the details of which are discussed later in the report.

5.5 In the following part of this chapter, brief reviews of the existing schemes in selected states are given. In assessing the social security for workers in the unorganised sector, our focus is mainly on the protective forms of social security. Two kinds of social security measures that have a large coverage are described here. The first covers social security for the citizens as a group while the other covers workers in the unorganised sector.

## **KERALA**

5.6 As the recent Human Development Report for Kerala indicates, the State shows, unlike most other States in India, very little disparity in several social development indicators as between rural and urban areas as well as between male and female population (Centre for Development Studies, 2006). This is because the government in Kerala has been providing, in response to sustained public action, a range of promotional and protective forms of social security, albeit in a limited measure, covering an overwhelming majority of the population, especially those in the poorer households. This has helped Kerala in raising its level of human development for the population in general and the poorer sections in particular (Kannan and Francis 2001). It has been argued that the earlier investments in human development, that includes protective social security measures, have now started paying off in terms of economic growth (Kannan 2005).

### **Old age Pensions to Destitutes and Rural Labourers**

5.7 Pension to the poor old aged persons cover all those above 60 years and who are destitutes, widows, people with disabilities, and leprosy and cancer patients. A special pension is given to unmarried women above fifty years. In addition the state government disburses pension as per the norms of the National Social Assistance Programme of the Government of India to destitutes above 65 years of age. During 2003-04, Kerala government spent around Rs.150 crores by way of old age pensions to the above mentioned categories of poor through budgetary support. This included budgetary support of an amount of Rs.4.5 crores for payment of pension to old aged agricultural labourers (about 3.7 lakh persons) since the Welfare Fund of the agricultural labourers did not have the capacity to pay. Such budgetary support is also extended to a few other categories of workers such as coir workers and fishermen whenever their Welfare Funds fall short of the required financial resources.

5.8 A number of Welfare Funds in Kerala have instituted old age pension for their members. They include toddy tappers, headload workers, cashew workers, khadi workers, coir workers, fishworkers, handloom workers, liquor shop assistants, beedi workers, tailors and construction workers. In most cases the

monthly pension varies from Rs.100 to Rs.200. The details are given in **Appendix 6.**

### **Welfare Funds for Unorganised Sector Workers**

5.9 The successive Governments in Kerala found that the problems facing workers in the informal sector were due to lack of definite employee-employer relationships and insecurities arising out of the fluctuations in their income. The Welfare Funds were an attempt to resolve these issues through institutional innovations.

5.10 At present, there are 23 Welfare Boards for the unorganised/informal workers functioning in Kerala (in addition to the centrally administered fund for Beedi and Cigar Workers). They cover a wide range of occupations and have come to be seen as an important institutional arrangement for providing a measure of social security to the informal workers. These are given in **Appendix 7.**

5.11 Some of these Welfare Funds are statutory and others are non-statutory. The contributions are made by the workers, employers and the government. The current organisational model is one in which a government officer is deputed to function as the Chief Executive with staff also deputed from various government departments. A Board, consisting of representatives from government, employers and employees, acts as a catalysing force ensuring dynamic functioning. However, the state continues to yield enormous power on crucial policy decisions.

5.12 The contribution of employers and employees is determined after taking into account a number of factors, both specific and common. Therefore, the contribution of employers, employees and government varies across Funds, as there is no uniform or fixed pattern applicable commonly for all the Funds. The diverse nature of occupations and differential earning opportunities and risks associated with them may be leading to such differences in contribution. It seems that state contributes relatively high in the funds in which workers seem to have a lower ability to pay and vice versa. As we can see from Table 5.1, in some cases a cess is levied on the product. In other cases, employers directly make contribution to the Funds. Thus, varying rates of contribution prevail depending on the nature of occupations.

**Table 5.1: Details of contributions under different Welfare Funds in Kerala**

<b>Fund</b>	<b>Government</b>	<b>Employer</b>	<b>Employees</b>
Toddy	—	13 % of workers wages	8% of the wages
Labour	Varies from year to year till now Rs. 40 lakh in total	Rs. 8 per half year per worker	Rs. 4 per half year per worker
Head-load	—	25 % of workers wages (including gratuity of 5%)	10 % of wage
Transport	—	13% of workers wages	8 % of workers wages
Advocate Clerk	Rs. 90 per year per member	—	Rs. 60 per annum per member
Artisans	Rs. 2 per every Rs. 10 contributed by the worker	—	Rs. 10 per month per worker
Cashew	Twice the amount contributed by the employer	Re. 1 per worker per working day	50 ps per worker per working day
Khadi	10 % of workers wage	10 % of workers wage	10 % of workers wage
Coir	Grant which is twice the amount contributed by workers	1 % of the turn over	Re. 1 per month per worker
Fishermen	Govt. contribution for pension and group insurance	Dealer - 1% of turn over, vessel owner – Rs. 1 to Rs. 7 per month for 9 months. Net owner – Rs. 1 per month	3 % of value of fish caught or 3% of wage and Rs. 30 per worker per year
Handloom	Twice the workers and self employers contribution	1 % of annual turn over and an amount equal to workers contribution	Re. 1 per month Rs. 2 per month by self employed
Abkari	Re. 1 lakh for pension purpose	15 % of workers wage	10 % of workers wage
Construction	10 % of initial members contribution per annum	1% of construction cost yearly contribution made also by contractors (Rs. 100 to Rs. 1000)	Monthly contribution per member slabs of Rs 10, 15 and Rs. 25
Agricultural	—	Land owners contribution 0-1 ha. Rs. 10 per year and above 1 ha. Rs. 15	Rs. 2 per month per worker
Lottery	20 % of members contribution	—	Category A/B Rs. 15/10 per month
Document	10% of members contribution	—	Category A/B Rs. 15/10 per month
Auto-rickshaw	10 % of members contribution	Rs. 10 per month per worker	Rs. 20 per month per worker
Anganwadi	10% of members contribution	—	Rs. 20 per month Rs. 10 per helper per month
Tailors	10% of the workers contribution	Rs. 5 per month per worker	Rs 10/worker and Rs 15/self employee per month

Source: Government of Kerala, Economic Review 2004.

5.13 The coverage of workers across the Welfare Funds varies. Female workers outnumber males in cashew, tailoring, coir and beedi industry. In Cashew Workers Welfare Board, 96 per cent enrolled workers are female, and in Coir Workers Welfare Board, 81.6 per cent. In Boards like Toddy Workers, Head Load Workers and Abkari Workers, above 90 per cent of the workers are male. The details are given in Table 5.2. The total coverage comes to 54 percent of informal workers in Kerala as on 2000.

5.14 The benefits vary across funds. However, they seem to cover a number of aspects. Some of the major benefits are: provident fund, gratuity, monthly pension (old age), disability and accident cover, health cover, unemployment relief, educational allowance, housing assistance, marriage assistance and funeral expenses.

5.15 As we can see from Table 5.2 the average size of Welfare Funds varies enormously in terms of number of workers and financial capacity. The latter is influenced by variations in the capacity to pay. Some of the financially large Welfare Funds are that of construction workers, headload workers and toddy tappers. The weaker ones include those of agricultural labourers, khadi workers and handloom workers. During 2003-04, the total expenditure of 22 Welfare Boards was reported to be Rs. 175.13 crore that included Rs. 68 crore of the toddy tappers' welfare board, Rs. 33.4 crore of the headload workers' welfare board and Rs. 24 crore of the construction workers' welfare board. The administrative expense was around Rs. 23 crore or 13 per cent of the total expenditure.

**Table 5.2 Coverage of workers under different Welfare Funds in Kerala (2003)**

Name	Workers (in 000') covered under the scheme
1. Anganwadi workers	40.7
2. Toddy tappers	41.3
3. Cashew workers	175.1
4. Abkari	2.0
5. Fish workers	220.6
6. Labourers*	508.5
7. Construction workers	1070.9
8. Khadi workers	14.6
9. Lottery workers	3.9
10. Motor Transport workers	52.4
11. Coir workers	200.0
12. Handloom workers	24.9
13. Beedi & Cigar Workers WF	39.0
14. Auto-rickshaw workers	18.5
15. Head-load workers	80.7
16. Tailoring workers	299.3
17. Bamboo workers	11.5
18. Artisans	211.8
19. Traders	61.4
20. Ration dealers	12.5
21. Co-operative employees	20.6
22. Agriculture Workers	1840.9
Total Informal workers covered	4951.1
Total Informal workers	9130.0
Percentage Covered	54.2

## TAMILNADU

### Old Age Pensions

5.16 Old age pension is available to (a) those who are 65 years and above and are destitute (b) destitute and physically handicapped persons (c) destitute widows (d) destitute agricultural labourers and (e) destitute/deserted wives. Presently the total number of beneficiaries under the various pension schemes works out to 11.8 lakhs. Besides pensions the beneficiaries also get clothing and food grains.

## **Annapurna Scheme**

5.17 Under the Annapurna Scheme, food grains are distributed to the destitutes/senior citizens covered under National Old Age Pension Scheme. The beneficiaries are supplied with 10 kgs of rice per month free of cost. The Government of India has fixed a target of 71,974 beneficiaries for Tamil Nadu under the scheme.

## **Welfare Funds/Boards for Workers in the Unorganised Sector**

5.18 Apart from various social assistance schemes mentioned above, the State of Tamil Nadu has also set up Welfare Boards for providing social security to selected categories of workers in the unorganised sector. These are:

### **The Tamil Nadu Construction Workers Welfare Board**

5.19 The number of construction workers who have registered with this Board is 6.31 lakhs as on 31.12.04. During the period from 1.1.2004 to 31.12.2004 a sum of Rs. 26.31 crores has been received as contribution to this Board. A sum of Rs. 27.76 lakhs was collected as Registration Fee at the rate of Rs.25/- per worker. Identity cards are issued to all registered construction workers free of cost. A number of schemes are being implemented under the Board which *inter alia* cover:

- (a) **Group Personal Accident Insurance Scheme:** All registered construction workers have been insured under Group Personal Accident Insurance Scheme. Every year, the Board pays the renewal of premium to the insurance company. In the event of death of a registered construction worker in an accident, a sum of Rs.1 Lakh is paid to the nominee of the deceased. For loss of limbs, eyes, etc., compensation is paid upto Rs.1 lakh depending upon the percentage of loss.
- (b) **Assistance for Education:** Assistance for education of the son/daughter of a registered construction worker is given ranging from Rs.1,000/- to Rs.10,000/- per annum depending on the course of study and whether the student was a day scholar or lived in a hostel.
- (c) **Assistance for Marriage:** Assistance of a sum of Rs.2,000/- is paid to meet the marriage expenses of son or daughter of a registered construction worker and also for the marriage of registered construction worker.
- (d) **Assistance for Maternity / Abortion / Miscarriage:** Assistance of a sum of Rs.2,000/- is paid to a registered woman construction worker for delivery of a child or for the miscarriage of pregnancy or for the termination of pregnancy.

- (e) **Assistance to Family in case of Natural Death:** In the event of death of a registered construction worker, a sum of Rs.10,000/- is paid as assistance to his/her nominee.
- (f) **Assistance for Funeral Expenses:** In the event of death (either natural or accident) of a registered construction worker, the nominee is paid as assistance, a sum of Rs.2,000/- to meet the Funeral Expenses.
- (g) **Assistance for Reimbursement of Cost of Spectacles:** A sum of Rs.250/- is paid to 1000 workers every year towards reimbursement of cost of spectacles.
- (h) **Old Age Pension:** Pension of Rs.200/- per month will be paid to workers who have been members of the Board continuously for five years and completed the age of 60.

### **Tamil Nadu Manual Workers Social Security and Welfare Board**

5.20 A number of Welfare Boards for various categories of unorganized sector workers were constituted in Tamil Nadu over the years. For the purpose of securing proper management of Boards, the Government amalgamated nine Boards with the Tamil Nadu Manual Workers Social Security and Welfare Board with effect from 21.07.2004. These Boards were specifically for the welfare of auto rickshaws and taxi drivers, washer men, hairdressers, tailors, palm tree workers, handicraft workers, foot wear and leather goods manufacturers and tannery workers, artists, and handloom and handloom silk weaving workers.

5.21 The manual workers who were already registered with the amalgamated Boards would continue to get the benefits under the Tamil Nadu Manual Workers Social Security and Welfare Board. The Tamil Nadu Manual Workers Social Security and Welfare Scheme 2001, is applicable to 60 employments out of 67 employments included in the Schedule to the Tamil Nadu Manual Workers (Regulation of Employment and Conditions of Work) Act, 1982.

5.22 Benefits similar to the construction workers board were available for Group Personal Accident Insurance. In the event of death of a registered construction worker in an accident, a sum of Rs.1 Lakh is paid to the nominee of the deceased. For loss of limbs, eyes, etc., compensation is paid up to Rs.1 lakh depending upon the percentage of loss.

5.23 Assistance for education of the son/daughter ranging from Rs.1,000/- to Rs.10,000/- per annum depending on the course of study and whether the student was a day scholar or lived in a hostel. Assistance for marriage is a sum of Rs.2,000/- and assistance for maternity is a sum of Rs.2,000/- .

5.24 A manual worker has to pay a one time contribution of Rs.100/- at the time of registration and has to pay Rs.10/- once in two years for renewal of registration. The number of workers registered from 01.01.2004 to 31.12.2004 is 58,959. The total number of workers registered so far is 7.02 lakhs.

### **Integrated Beedi Workers Housing Scheme in Tamil Nadu**

5.25 The State Government is giving Rs.5,000/- per house as State Government's subsidy for the "Integrated Housing Scheme for Beedi workers" of the Government of India. As per this Scheme, the Government of India is providing a subsidy upto a maximum of Rs. 20,000/- or 50 per cent of the cost of construction of a house whichever is less.

## **MAHARASHTRA**

### **The Mathadi Workers Welfare Board**

5.26 The Maharashtra Government brought out a legislation in 1969 called "The Maharashtra Mathadi, Hamal and other Manual Workers (Regulation of Employment and Welfare) Act, 1969", to provide a range of social security measures to the manual workers engaged in loading and unloading of goods. This legislation was a culmination of series of demands and representations made by the trade unions for a number of years.

5.27 Since 1969 Mathadi labour market is regulated by the Mathadi Tripartite Boards. Today there are around 50,000 registered employers with almost 150,000 workers registered under 39 different Mathadi Boards in the State of Maharashtra. Each of these Boards (sometime group of smaller boards) is headed by a Chairman appointed by the Government of Maharashtra and in addition there is equal number of representatives from the workers' unions and employers' associations. Each Board has its own staff including secretary, personnel officer, chief accountant, inspectors and clerks. All the staff gets paid out of the levy, which is negotiated every 3-4 years, charged on the employers.

5.28 Some of the main features of two of the Mathadi Workers Boards are presented in Table 5.3.

**Table 5.3: Main Features of Two Mathadi Boards**

	<b>The Goods Transport Unprotected Workers (1971)</b>	<b>The Cloth Market and Shops, Mumbai (1971)</b>
As on	MAY 2005	MARCH 2005
Registered Employers	4558	30505
Actual Workers	10499	4489
Number of Tollies	2000 (Size 2 to 200)	Variable but very small
Average Monthly Wages for all workers (Rs in lakhs)	4,88.72	1,13.95
Wages + Levy (Rs in lakhs)	6,84.21	1,69.27
Average monthly wages of workers (Rs.) (Inclusive of benefits)	6,516 (including levy)	3770
Total annual Turnover (Rs. crores)	90.00	22 .00
LIC Policy holders	3,523	473
Income Tax-payers	200	None (Prof. Tax paid in Rs. 1,98,490)
Administrative staff	80	24
Administrative expenses(Rs lakhs)	14.35	2,48.94
Unions	10 +	2
Membership fees (Rupees per annum)	101	51
Dearness Allowance	CPI linked	CPI linked
P.F. contribution by workers	8.33%	8.33 %
Hospital contribution by workers (Rs. Per month)	50	50
Profession Tax (Rs. Per month)	15-30	15-30

Source: Ramesh C. Datta, 2005.

### **Benefits Provided By the Boards**

5.29 The various benefits provided by the Boards are discussed as under:

- (a) **Regulation of conditions of work:** Main functions of a Board are to settle disputes between the Union(s) and the Employers, arrange meetings for negotiations, get new employers and workers registered, and distribute wages and social security benefits. At the workplace site *Mukadam's*

direct *tolli* workers, distribute work and allocate workplace, coordinate between the employers and the board, tally and gives 'daily work sheets' to the board, etc. They also have to handle disputes between the workers. The Boards also undertakes long term 'wage and work description' agreements between some major large companies including some MNCs and specific 'tollies of workers', under the Maharashtra Mathadi, Hamal and other Manual Workers (Regulation of Employment and Welfare) Act, 1969.

- (b) **Health:** One of the major achievements of the Mathadi workers has been of starting hospitals and health care facilities for most of its workers including their families. In 1976, Anna Patil started a dispensary under a trust on a part-time basis. By 1978 it started working full time. Today, there are two hospitals with an annual budget of Rs. 4-5 crores which are run by 6 Mathadi Boards. In addition to this there are 12 dispensaries. The hospitals have 75 beds facilities. Each of the six boards contributes 2 percent each of their levy and each worker contributes Rs. 50/- per month. These hospitals provide a range of diagnostic services like Radiology, Pathology and Sonography to around 1.1 Lakh workers and their families. In addition to this, 5907 workers have availed the indoor- medical facilities in the two hospitals in the year 2003-04.

In the last few years some of the *Mathadi* Boards have been able to get the workers insured against accident, injuries and the death. For example, *Mathadi* Boards in Pune are paying Rs. 152/- per annum as premium out of the Board's administrative account to cover worker for a benefit of Rs. 25,000/- in case of injury and Rs. 2,00,000 in case of death. This scheme has been worked out by the *Mathadi* Board with the General Insurance Corporation

- (c) **Housing:** Mathadi workers with the help of Mathadi Boards have been able to get housing facilities on ownership basis for about 4000 of them. For this purpose they have taken loans from GIC, HDFC, and also drawn from their provident fund.
- (d) **Education:** The Boards are also trying to promote formal education among Mathadi families. Since 1982, they have instituted quite a few scholarships for the children of Mathadi workers. More than one hundred children have been given scholarship in 1997.

## Financial Resources

5.30 A 2 per cent levy is deducted from each of the employers' total contribution given to the *Mathadi Boards* every month. Each worker pays an annual payment of Rs. 600/- from his wages towards health care for himself and his family members. Further details are given in the table below:

**Table 5.4: Income (in Lakhs)**

Item	Year 2002-03	Year 2003-04
Workers Contribution	190.16	179.14
Board's Contribution	304.72	322.38
Employees' & Employer's Contribution	6.24	6.25
Interest on Bank S/B & F.D. A/c.	78.28	75.52
Sundry Receipts	0.45	0.36
Non <i>Mathadi</i> Patients receipts (Investigation)	0.76	1.94
Total:	580.63	585.62

### **Maharashtra Security Guards Boards**

5.31 The Maharashtra Security Guards Boards were set up under the Maharashtra Private Security Guards (Regulation of Employment and Welfare) Act, 1961. They work on the same lines as the Mathadi Boards. Under the Act the employer as well as security guards is to be registered with the Boards. The registered guards are assigned to the various employers. Through a single window system the Boards provide training and benefits such as provident fund, gratuity, leave with wages, uniform , ex-gratia and ESI.

### **Financing**

5.32 The Boards on the basis of the negotiated settlement between the workers and the employers fix wage rates. If there were no agreement between them the board would fix the rates by itself. The current rate fixed by the Boards for a security guard is Rs. 2.750, which is much higher than the minimum wages fixed by the state government. The employers have to deposit the wages earned by the guards with the Boards together with a premium of 46.75 per cent for covering social security and other benefits.

## **KARNATAKA**

### **The Karnataka Labour Welfare Board**

5.33 The Karnataka Labour Welfare Board was constituted under the Karnataka Unorganised Workers Welfare Act, 2002 to administer welfare schemes for these workers. It applies to 68 employments in the unorganized sector under a specified schedule. This includes labour in agriculture, horticulture, floriculture, sericulture and arecanut gardening. Beedi, Ports and Mines workers are not eligible under the Scheme.

5.34 Almost all the benefits are in the form of financial assistance for specified purposes. These are (a) Medical assistance scheme, (b) Financial assistance for purchase of Spectacles, (c) Financial assistance for purchase of Hearing–Aid,

(d) Financial assistance for purchase of artificial organs of the body for disabled, (e) Financial assistance to the pregnant woman workers, (f) Financial assistance to the workers in case of accidents, (g) Financial assistance to the family of the deceased workmen to perform last rites, (h) Supply of Tri-cycles to disabled workers, (i) Financial assistance for Self employment schemes, and (j) Scholarship Scheme to the children of employees studying in eighth standard and above.

## **ANDHRA PRADESH**

### **Andhra Pradesh Labour Welfare Fund**

5.35 Andhra Pradesh introduced the Labour Welfare Fund Board in 1998. The aim of the Board is to enrol factory workers, workers in shops and other establishments and motor transport workers. The Board has initiated Andhra Pradesh Unorganised Labour Welfare Fund. As of 2002, it has enrolled about 10 lakh members and the annual collection from workers and employers is estimated around Rupees 72 lakhs. The amount of contribution from employees is Rupees 2 per year and Rupees 5 from employers.

5.36 Since 1990-91, the state government has given an annual grant of Rupees 20 lakh. However, it has not contributed any grant during the last two years. The current corpus of the Fund is around Rupees 10.5 crores. The benefits offered to members and their dependants include scholarships for children, medical aid to workers, funeral expenses and emergent economic amelioration schemes. There is no provision for old age pension to the informal workers registered in the Fund.

## **GOA**

### **The Goa Employment (Conditions of Service) and Retirement Benefit Act**

5.37 The State of Goa has enacted *The Goa Employment (Conditions of Service) and Retirement Benefit Act, 2005*. According to this Act, the employer is required to issue Social Security Cards to the workers engaged by him in both the organized and unorganized sectors. Detailed information of the worker is embossed on the chip of the card.

5.38 **Coverage:** The Act covers all workers in all establishments in every industrial activity, including services and construction, and plantations. Only establishment engaged in agriculture and self-employed professionals are excluded from the Act.

5.39 **Benefits:** The Social Security Scheme under the Act consists of retirement benefits to the unorganized sector workers who have completed 240 days of continuous employment. The contribution is to be made by the employer

at the rate of 5 percent of the gross wages of the workers and deposited in the Retirement Fund to be maintained by the Government. The contribution made by the employer in the workers account is deposited with the Government along with the interest at 6 percent or as fixed by the Government to be paid to the worker when he reaches the age of 50 years, or to his dependent/heirs in case of death of the worker before the age of 50. This scheme allows for portability of the benefits of the scheme if the worker changes his employer. The Registered Number on the Social Security Card does not change in case of a change of employer and is valid within the State of Goa.

## **WEST BENGAL**

### **Provident Fund for Unorganised Workers**

5.40 The West Bengal Government introduced a State Assisted Scheme of Provident Fund for Unorganised Workers under the Labour Department in 2001 through a Government Resolution.

5.41 **Coverage:** All wage and self-employed workers between the ages of 18 to 55 years in the unorganised sector in the state and with an average family income of not more than Rs.3500 per month are eligible to be covered by the scheme on a voluntary basis. Workers employed in nearly 50 industry groups and 16 self employed activities listed in a schedule of employment will be eligible for the provident fund scheme. As on September 2005 there were about 6.45 lakh subscribers of whom nearly 3.8 lakhs were women. The amount collected from subscription was nearly Rs.26 crores by September 2005 and the government contribution upto March 2005 was about Rs.20 crores. Each subscriber-worker contributes Rs.20 per month with a matching amount contributed by the State Government.

5.42 **Benefit:** The worker receives the total contribution along with the interest on attainment of the age of 55 years. In the event of death of the worker, the total amount, contribution plus interest, is paid to the nominee. In the event of prolonged default for consecutive six months, the accrued amount is refunded to the workers. The account is revived if the contributions are made up to date. The State Government may prescribe provisions for loans and withdrawals from the fund as and when deemed necessary.

## **Building and Construction Workers (Regulation of Employment and Conditions of Service) Act, 2004**

5.43 The above legislation is in accordance with the umbrella legislation under the Building and Construction Workers (Regulation of Employment and Conditions of Service) Act, 1996 of the Government of India. Subsequently, a West Bengal Building and Other Construction Workers Welfare Board was set up to provide the following benefits to the registered beneficiaries:

5.44 **Benefits:** A registered beneficiary, who has been working, as a building worker for not less than five years, after registration as beneficiary, shall on completion of 60 years of age, be eligible for pension at Rs.150 per month. An increase of Rs.10 may also be sanctioned by the Board on the completion of every year of service beyond five years. The Board may sanction a maximum amount of Rs. 2000 per annum to a registered worker towards medical expenses for the treatment of the beneficiary or his dependents suffering from TB, cancer, heart disease, kidney disease, leprosy etc. Where an operation is involved for the treatment of such diseases, a maximum amount of Rs.15,000 may be sanctioned. The Board may also sanction financial assistance for the education of children of such beneficiaries. The Board provides maternity benefit to a female beneficiary not more than twice.

5.45 Financial assistance to the beneficiaries may be sanctioned for hospitalization for a period of five days or more due to accident at Rs.200 for the first five days and Rs.20 per day for the remaining days subject to a maximum of Rs.1,000. In case of disability the Board may sanction up to Rs.10,000. The Board may sanction an amount of Rs. 10,000 to the nominee of dependents of a beneficiary towards death benefit. If the death is due to an accident during the course of employment the nominee or dependent of the beneficiary may be paid Rs.30,000 towards death benefit.

## **TRIPURA**

### **Assisted Scheme for Unorganised Workers (Asanghatita Shramik Shayika Prakaalpa)**

5.46 The Government of Tripura introduced an Assisted Scheme for Unorganised Workers (Asanghatita Shramik Shayika Prakaalpa) in 2001. The Scheme is very similar to the Provident Fund Scheme of the West Bengal government. All wage and self-employed workers between the ages of 21 to 55 years in the unorganised sector in the state and with an average family income of not more than Rs.3500 per month are eligible to be covered by the scheme on a voluntary basis. Workers employed in 15 industry groups and 17 self-employed activities listed in a schedule of employment will be eligible for the benefits under the scheme. At the time of enrolment of the worker under the scheme, an identity card cum passbook will be issued to the worker under the signature of the

authorized officer on deposit of Rs.5 only. Each subscriber-worker will contribute Rs.25 per month with a matching contribution by the State Government.

5.47 **Benefit:** The worker receives the total contribution along with the interest on attainment of the age of 55 years. In the event of death of the workers, the total amount, contribution plus interest is paid to the nominee. In the event of prolonged default, not paid for six months, the accrued amount will be refunded to the workers after a lock-in period of three years. The account is revived if the contributions are made up to date.

### **Tripura Beedi Shramik (Old Age pension) Scheme (2001)**

5.48 A person who is fully engaged and dependent on manufacture of beedi for his/her livelihood and has attained the age of 65 years is eligible to get Sa pension of Rs 125/- per month.

## **GUJARAT**

### **The Gujarat Rural Workers Welfare Board**

5.49 The Government of Gujarat has raised a social security fund of Rs. 5 crores under the poverty alleviation programme. The Gujarat Rural Workers Welfare Board administers four insurance schemes under this programme for rural workers. These are (a) Group Insurance Scheme for Landless Agricultural Labourers, (b) Group Insurance Scheme for Fisherman and Forest Workers, (c) Group Insurance Scheme for Salt Workers, (d) Shramik Suraksha Scheme for both rural and urban unorganized workers. There is another Financial Assistance Scheme for the welfare and development activities to agriculture labour and rural workers.

### **Welfare Scheme for Salt Workers**

5.50 State Government has implemented following various scheme for the 45,801 salt workers located in 35 Talukas of 13 Districts of the state through Gujarat Rural Workers Welfare Board. These are (a) construction of welfare centres such as *Balvadi*, primary health centres, libraries, etc., (b) children's crèche at worksites, and (c) financial assistance for housing. Identity cards are also issued to the salt workers.

## **PUNJAB**

### **Old Age Pension**

5.51 The old age pension scheme was started rather early in the State of Punjab in 1964. The eligibility for the pension scheme is the attainment of the age of 65 years for men and 60 years for women. There is an economic limit of

monthly income of Rs.1,000, if applicant is single and up to Rs.1,500 per month for a family of two. Further, he/she should be a bona-fide resident of Punjab and should have been residing in Punjab for at least for 3 years. A pension of Rs.200 per month per beneficiary is paid on a quarterly basis through designated banks.

### **Financial Assistance to Widows and Destitute Women**

5.52 A similar pension scheme for destitute women and widows was started in 1968. The eligibility for this pension was on attainment of 60 years of age and the applicant should be a bona-fide resident of Punjab and residing in the state for the last three years. If her income is less than Rs.1000 per month, any widow or woman deprived of husband's support, for any reason whatever, and unmarried women of 30 years age and above, resulting in her leading a life of destitution, is eligible for financial assistance. A monthly pension of Rs.200 per beneficiary is paid on a quarterly basis.

### **Financial Assistance to Dependent Children**

5.53 The benefit of another similar scheme was also available to orphans and destitute children below the age of 21. This was also started in 1968. The criterion for eligibility is that the income of the mother or father/guardian should not exceed Rs.1000 per month. Where parents are alive, and income of both mother and father does not exceed Rs.1500 per month in a family, financial assistance is restricted only up to 2 children. Relaxation in income limit to the extent of Rs.300 per child for 2 children is admissible. The pension amount is Rs.200 per month per beneficiary, which would be paid quarterly.

### **Financial Assistance to Disabled Persons**

5.54 The people handicapped with severe disability or permanently infirm due to blindness, retardation or chronic illness are eligible for a pension of Rs.200 per month since 1982 and the income of the person and the spouse or parents, is not more than Rs.1000 per month.

### **Punjab Labour Welfare Board**

5.55 The Punjab Labour Welfare, Board, a statutory body, was created in 1974 under the Punjab Labour Welfare Fund Act, 1965 headed by a Welfare Commissioner, Punjab. The board is running various welfare schemes for the benefit of industrial workers and their families.

## **HARYANA**

### **Old Age Pension Scheme**

5.56 The scheme aims to provide social security to old persons who are unable to sustain themselves from their own resources. Applicants have to be residents in

Haryana and aged 60 years or above. A monthly pension of Rs.200/- is provided to each of the beneficiaries.

### **Pension to Widows and Destitute Women**

5.57 To provide social security to widows and destitute women or married women who have been deprived of the financial support from their husband and their income from all sources is less than Rs.10,000/-per annum, a monthly pension of Rs 200/- per beneficiary is provided. A pensioner should be 18 years of age or above and a Haryana domicile.

### **Pension to Physically Handicapped Persons**

5.58 This scheme is for people with a minimum of 70% disability including the blind, deaf & dumb, very low IQ, and the mentally retarded. The pensioners should be of Haryana domicile and of 18 years of age or above. Their income should not exceed Rs.10,000/ - per annum. A monthly pension of Rs.200/- is provided to all the beneficiaries.

### **Financial Assistance in the event of Accident**

5.59 This scheme is run by the Haryana Labour Welfare Board since 1992, wherein financial assistance is provided to workers who meet with an accident during the duty period. The application should be received within a year of the accident. Financial help varies from Rs 5000/- to Rs 10000/- on the basis of disability percentage fixed by the Government hospitals/ESI Board. In addition a sum of Rs 5000/- is provided in case of fatal accidents.

### **Haryana Labour Welfare Board**

5.60 Haryana Labour Welfare Board was constituted under the Punjab Labour Fund Act 1965. This Board is running various welfare programmes for the workers which include cash award to the children of Industrial workers, Mukhya Mantri Shram Puraskar Yojana, Financial help to workers on daughter's marriage, reimbursement of computer education expenses, incentive under family welfare scheme, excursion cum study tours to workers etc. The Haryana Labour Welfare Board also runs a scheme of financial assistance in the event of accident whereby financial assistance is provided to workers who meet with an accident during the duty period. The application should be received within a year of the accident. Financial help varies from Rs 5000/- to Rs 10000/- on the basis of disability percentage fixed by the Govt. hospitals/ESI Board. In addition a sum of Rs 5000/- is provided in case of fatal accidents.

## **UTTAR PRADESH**

5.61 The State of Uttar Pradesh is the largest state in India but with a lower per capita income than the national average. Except a couple of social assistance

schemes for the poor aged and the disabled with very limited cover, no scheme has been reported for providing social security to the vast number of workers in the unorganised sector.

### **Old Age Kisan Pension Yojana**

5.62 The beneficiaries under this scheme receive Rs.125 per month on reaching the age of 60 years. Also under the scheme grant to destitute widows for marriage of daughter is available.

### **Viklang Pension Scheme**

5.63 A pension of Rs.125 per month is given to destitute handicapped having a monthly income of below Rs.225 per month.

### **Welfare of Handicapped**

5.64 For the welfare of the handicapped a number of schemes were in operation in the state like, grant-in aid for maintenance to destitute handicapped, scholarship to the handicapped students and to the children of handicapped persons, grant-in-aid for purchase of artificial limbs, hearing aids etc., award for marriage between disabled and normal persons, grant to handicapped for construction of shops is available. Also, as a welfare measure 12 schools for handicapped children are functioning where free education, boarding and lodging are provided. Of these, 4 are for the visually challenged, 4 for the hearing and speech challenged, 2 for physically challenged and 2 for the mentally challenged. Seven workshops cum production centres for imparting free vocational training with free boarding and food facilities for the handicapped have been opened.

## **MADHYA PRADESH**

5.65 The Government of Madhya Pradesh constituted an Unorganised Sector Workers Committee in 2001 to study the conditions and make recommendations for improving the working conditions and social security needs of the workers in the unorganised sector. It presented its Report in 2002 and recommended legislation to provide a measure of social security to the workers in the unorganized sector.

### **Two Welfare Boards/Funds for Urban and Rural Areas**

5.66 Based on the powers conferred by the Madhya Pradesh Unorganised Welfare Act, 2003 the State Government made the Madhya Pradesh Unorganised Welfare Rules, 2005 relating to the constitution of a Welfare Board, its functions and other matters. This Act is applicable to all the employments specified in the schedule and includes agricultural and allied workers, quarry and brick kiln workers, manual workers engaged in loading and unloading in markets,

shops, markets under the control of the Madhya Pradesh Krishi Upaj Mandi Adhinyam, 1972, public transport and food godowns, workers in Khadi, handloom, powerloom, dyeing, printing and tailoring, workers making agarbatti, embroidery, ready made garments, food products like pickles and papads, cooking food and making toys, workers in leather and footwear and in cleaning and scavenging, rag-pickers and door-to-door collection of old newspapers, raddi and kabadi, motor transport workers under the Motor Transport Workers Act, 1961, workers plying cycle-rickshaws, auto-rickshaws and taxis, workers in flour, rice and dal mills, private security services, plastic industries, wood works, utensil making, artisans, fireworks and match-making, and cartons and other packaging.

5.67 Two separate Welfare Boards for Unorganised Workers were constituted for the rural and urban areas. Each of them consisted of the Minister for Labour as the Ex-officio Chairman, Secretary to Labour Department and Finance Department, Labour Commissioner, six members appointed by the Government representing employers of unorganised sector and six members representing unorganised workers, two of whom were to be women, one of Scheduled Caste, Scheduled Tribe and Backward Caste each. Two separate Madhya Pradesh Unorganised Sector Welfare Funds were constituted for the rural and urban areas to vest in and be administered by the Board.

5.68 The benefits to be extended to all the members who have contributed are: old age, family and disability assistance and pension, loan for purchase or construction of house, interest subsidy for housing loan taken for a Housing finance institution, assistance for education like scholarship, loan, interest subsidy for education loan, cash award for meritorious students, loan for tools and small machines, interest subsidy for loans for supplementary income generating activities, marriage assistance, medical assistance, maternity assistance, group insurance, assistance for payment of insurance premium, funeral assistance and ex-gratia payment in case of death. These benefits will normally be credited into the bank account of the member.

5.69 There is also provision for the registration of the establishments to which the Act applies and the contribution of the employer based on the number of workers. Similarly, there is also a provision for contribution by the workers. No amount has been specified in the Act.

## **BIHAR**

### **State Social Security Pension**

5.70 Under this scheme, old persons, widows, destitute, handicapped persons and Bonded Labour are covered. Old persons, whose age are 60 years and above and their annual income is Rs. 5,000/- in rural area and Rs. 5500/- in Urban areas get Rs. 100/- per month as pension. There is relaxation of the age limit for widows, handicapped persons and bonded labourers. The source of funding for the scheme is 100% by the State Government.

## 6

### NGOs' Intervention in Social Security of Unorganized Sector Workers

6.0 A large number of voluntary and people's organizations are involved in providing a measure of protective social security to workers and their families in the unorganised sector in the country. However, such provision is often part of a larger package of services that include promotional social security such as access to micro credit, housing, preventive health care and employment. For the purposes of this report, we have selected those organisations in the voluntary sector, which provide protective social security in one way or another.

6.1 Given the absence of a single data source on the voluntary organisations, we had to rely on available information compiled by international organisations, especially the International Labour Organisation's New Delhi Office, and information that were directly made available to the Commission. The observations in this report are based on data obtained for 54 organisations.

6.2 The total number of individuals covered by various social security schemes of NGOs comes to around 33.51 lakh individuals. In addition schemes covering households as beneficiary units comes to around 1.06 lakh. In addition community schemes cover around 40 villages. If all these are converted into individual coverage, it would be around 48 to 50 lakhs. This is around 1.5 percent of the estimated workforce in the unorganised sector. Even if we reckon that a number of small organisations might have been left out of the data set, it is quite unlikely that that the voluntary sector coverage would be more than two to three per cent of the total workforce in the unorganised sector. **Appendix 8** gives a profile of the organisations.

6.3 The low coverage as a proportion of the total workforce by no means should be used to underplay the contribution of the voluntary sector. In fact it highlights a variety of best practices as well as contributes to building up, albeit slowly, institutional models that are closer to the requirements of the people at the local space. A few large organisations have in fact come up covering several districts in more than one state and have established themselves as people's organisations managed by highly dedicated as well as educated persons who have emerged as catalysers of socio-economic change in the country.

6.4 The geographical coverage of organisations show that they are concentrated in the three southern states (Andhra Pradesh (16), Karnataka (8) and Tamil Nadu (12)) and two western states of Gujarat (5) and Maharashtra (10) and one eastern state West Bengal (5). As described in the earlier chapter, Kerala (5) has a well developed state-initiated and supervised protective social security system in the form of Welfare Funds/Boards and hence the low

presence of the voluntary sector is an indication of the limited space there. However, the absence of the voluntary sector in most other states, especially in the large states of Uttar Pradesh (3), Bihar (1), Chattisgarh (1), Madhya Pradesh (1), and Orissa (3), is in the context of the low presence or absence of any state-initiated social security system. This indeed should be viewed as a matter of concern.

6.5 It should be emphasised that most social security schemes in the voluntary sector were started since the early nineties. Out of the 43 schemes for which data were available, 70 per cent were started since the early nineties and 50 per cent between 2000 and 2003. This indicates that protective social security as an agenda of the voluntary sector is of recent vintage.

6.6 Out of the 45 schemes for which data were available, 45 per cent had coverage of less than 10,000 members, 40 per cent had coverage between 10 and 100 thousand members and the remaining 10 per cent with a coverage of more than 100 thousand members. This includes a scheme with a coverage of 100 thousand households.

6.7 Covering for health related risks was the predominant form of social security provided by these organisations. 34 schemes provided health insurance services. The next item with the most coverage was insurance cover for death under 28 schemes followed by 13 schemes providing cover for disability. Maternity benefit (2 schemes) and old age pension (4 schemes) were quite low in the order of priority. Most of the schemes dealt with single risk (38), mostly health insurance. 9 schemes covered two risks, 8 schemes three risks and only one covering four risks.

### **Health Insurance**

6.8 The market for health in India prices out the poor although they are often compelled to go to the market with disastrous consequences on ensuing economic status of the household. The public system is supposed to provide free health care services but that is seldom realised for a variety of reasons including the poor state of much of the public health care system especially in rural India. This state of affairs may explain the popularity of community based health insurance systems initiated by the voluntary organisations. The health insurance schemes run by NGOs take different forms and each of these forms may be suitable depending on the characteristics of the target population, their health profile and health risks to which community is exposed.

6.9 There are two ways of providing health insurance in the voluntary sector. In the first case, which is the popular one, the organisation acts as an intermediary between a formal provider and the insured community (like the two large organisations such as the SEWA in Ahmedabad, ACCORD in Nilgiris). In the second case, the organisation itself provides insurance to the targeted

community. The formal providers in the first case are mostly insurance companies in the public sector such as the National Insurance Company, New India Assurance Company, United India Insurance Company, and Oriental Insurance Company, and the Life Insurance Corporation of India. Two private sector companies that have now made their presence in the schemes sponsored by the voluntary organisations are ICICI and HDFC.

6.10 As mentioned earlier, most of the social security package consists of health insurance. Majority of the schemes cover assistance to treat illness such as consultation, outpatient treatment and hospitalisation. However schemes vary from one another. Presently the coverage is around 28.91 lakh people along with a number of families and villages are provided with health care. 13 organisations club health care with life, and disability covering 7.23 lakh beneficiaries including 4000 families and 1200 couples.

### **Life and Disability**

6.11 Next to health care schemes come schemes for 'life', which includes natural and accidental death. Some 22 organisations include life in its package, in which 19 schemes are clubbed with other packages. Organisations like Cooperative Development Foundation (Andhra Pradesh), Sangamitra (Karnataka) and Grameen Development Service (Uttar Pradesh) offer package for life alone. About 13 organisations provide disability allowance.

6.12 **Link with Insurance Company:** Out of the reviewed 54 organisations, half of them (28) already work in collaboration with a formal insurance company for providing the insurance package. The Trivandrum District Fishermen's Federation is the only organisation that has secured finance from a non-insurance company: it takes loan from *Rashtriya Mahila Kosh* to provide social security to fishing folks and their families. It is noted that out of 21 organisations offering health care alone, only 3 have link with any insurance company while rest of the schemes provide benefit from their own premium collected/fund. However out of 33 organisations providing other benefits (this include schemes clubbed also with health care), 27 are in collaboration with one of the insurance companies.

6.13 **Premium:** In most of the schemes, the premium ranges from Rs. 50 per year to Rs. 200 per year depending on the income of the beneficiary. There are higher premium rates also to the range of Rs. 3000 (as in the case of Voluntary Health Service meant for rural villagers and urban dwellers), Rs. 1000 (Cooperative Development Foundation in Andhra Pradesh meant for primary agricultural workers) and Rs. 500 (Activists for Social Alternatives meant for villagers engaged in animal husbandry and trade and craft). Since most of the organisations offer different packages for different benefits, the premium also has to be paid separately. But SEWA's Integrated Insurance scheme is an exception where one can avail all these benefit by paying a single premium of Rs. 100/-.

6.14 **Benefits:** The benefits included under health insurance schemes are mainly reimbursement of hospitalisation and out patient treatment. It ranges from a low of Rs 250/- to Rs 30, 000/-. Remuneration for hospitalisation covers a wide range of illness but mostly excludes congenital and already existing diseases. Most of the NGOs pay a higher remuneration in the case of natural or accidental death; SEWA offers up to 65, 000 for accidental death. Even compensation for disability is given up to Rs. 50, 000 by NGOs like ANKURAM (Andhra Pradesh) and NIDAN (Bihar). However the benefit range varies according to the premium paid.

6.15 Even though the schemes offer such benefits, in most of the cases they are operated in such a way that the beneficiary has to pay out of pocket at the time of illness and is later reimbursed through the provider, mostly some insurance company. Because of this reason, there is a good chance that people may avoid hospitalisation and getting treated in the fear that all the cost may not be covered. On the other hand, assistance to funeral expenses and disability are instances where they don't have an option and whatever the provider gives is a boon to the beneficiary and their family.

6.16 Studies have shown that even if the poor are insured under any scheme, they may fail to use it because they do not understand what the insurance is supposed to do; they may not have the confidence to use the service they paid for, or they may simply forget that they are insured. So the first time buyers of the insurance services need to be nursed even after they have made the purchase.

### **Old Age Pension**

6.17 There is little involvement of the voluntary sector in providing pension schemes to the unorganised sector workers. This is perhaps understandable in view of the fact that this requires a long planning horizon involving collection of contributions, management of funds and assurance of a predetermined pension during the old age period. However, there are three organisations which have come up with pension schemes- SEWA (Gujarat), DHAN (Tamilnadu) and Anna Purna Mahila Mandal (Maharashtra).

6.18 The Self-Employed Women's Association (SEWA) plan for social security is widely regarded as one of the premier examples of success in this regard. SEWA established a bank daily collection initiative that brings a collection post to women on a daily basis. These are women who work between 14 and 16 hours a day, who cannot make time to travel to the local bank and make deposits. Most members of the social security scheme earn less than Rs100 daily and do not have any formal education. SEWA Bank initially guaranteed a nominal return of 12 per cent, and upon maturity money is returned in either a lump sum or annuity format. As of 2002, the group moved to a new plan offering only 7 per cent return with lower minimum contributions and the removal of early withdrawal options.

Already the bank has over 5,000 accounts managing almost Rs7.5 million. The SEWA Bank scheme serves as an example to many Self-Help Groups around India.

6.19 The women members of Annapurna Mahila Mandal mobilize their small savings and once the amount reached Rs. 5000, the amount is invested in LIC pension scheme. Savings amounts, invested by LIC in sound securities, doubles every six years and after 20 years, amounts to Rs. 50,000. On this principal amount, a fixed amount of Rs. 500 per month is paid to the woman as old age pension. The principal can be paid to her nominee at the time of her death and the nominee is not eligible for the amount if the death is not natural.

### **Others**

6.20 SEWA has a social security scheme to women workers in the event of their becoming widows. They give an amount of Rs. 15, 000/- on widowhood on various premium levels of Rs. 85/- Rs. 200/- and Rs. 400/-.

6.21 SEWA and WWF are the only two NGOs who provide maternity benefit. SEWA Gujarat gives Rs. 300/- per child birth.

6.22 Bharathi Integrated Rural Development Society (Andhra Pradesh) is the only NGO coming up with a provision for funeral expenses. It gives an amount of Rs. 500/- for immediate funeral expenses that cover both member and spouse at a premium of Rs. 50 per client per year.

### **Distinctive Practices Among NGOs**

6.23 In its special project of Reproductive Health Care for women in partnership with United Nations Population Fund, the Working Women's Forum India (WWF) selects and trains women cadres from the poorer neighbourhood communities to perform marketable skills in the field of health care to the poor as advocates at the grassroots. WWF's health care programme conceptualises the dimension of human centred approach covering a wide spectrum of women from birth to adolescence, reproductive age groups and even beyond reproductive stage among the older age group of women as well. The health care system of WWF has impacted a population of about 1 million in 720 slums and 340 villages through 960 health cadres from the grassroots.

6.24 Further the WWF has evolved a comprehensive Social Security Programme for its members by networking several insurance companies. Presently about 5 lakh members are covered under the scheme for insurance for life, full/partial disability, accidents and crisis management towards rehabilitation during natural calamities. An innovative Health Insurance Programme provides maternity benefits, reimbursement of hospitalization expenses etc., and also organizes preventive health check-ups.

6.25 For protective social security, Self Employed Women's Association (SEWA) offers a risk-cover to its members in an integrated manner. For a premium of Rs. 60, an individual member is covered for illness, accident and disability, natural death, loss of assets due to fire or flood and also receives a maternity benefit. The accidental insurance for members and their spouses is carried out in collaboration with New India Assurance (NIA), and natural death and accident is still done by LIC. An annual premium of Rs. 60 entitles an individual SEWA-member to all the benefits like risk coverage for maternity, natural and accidental death of the member and spouse, loss of assets during riots, flood, fire or theft. For additional Rs. 15 annually the husband of the member is also covered for the life insurance component with LIC. The other products are only available to SEWA members. SEWA has designed another method to enable members to pay the premium. For the Lifelong Insurance Scheme or Fixed Deposit Scheme, the members pay a fixed deposit of Rs. 500 to the SEWA-Bank and the premium is paid from the interest rate, which amounts to exactly Rs. 65. If the husband is to be covered under the life insurance scheme the fixed deposit has to be Rs. 700. The Fixed Deposit customers get the maternity benefit as bonus.

6.26 Recently, SEWA has renegotiated the scheme with the insurance company as SEWA PACKAGE 2006 wherein two options are made available to its members. Under option 1, the woman member pays Rs 100 as premium and avails benefits for natural death (Rs 5000/-), Mediclaim (Rs 2000/-), fire insurance (Rs 15000/-), and accidental death compensation of self (Rs 35000/-) and death of spouse (Rs 15000/). Under option 2, on payment of a premium of Rs 225, the benefits are for natural death (Rs 10000/-), Mediclaim (Rs 6000/-), fire insurance (Rs 30000/-), and accidental death compensation of self (Rs 45000/-) and spouse (Rs 15000/). SEWA does all the premium collection, promotion, education, servicing, claim processing, accounts and record keeping. In other words all the functions of the insurance company are undertaken by SEWA except taking on the risk.

6.27 To meet the health care requirements of *adivasis*, ACCORD working exclusively in Nilgiri District in Tamil Nadu started with a hospital in December 1990. Later, ACCORD in collaboration with the Adivasi Munnetra Sangam (AMS) and Association for Health Welfare in the Nilgiris (ASHWINI) launched a Community Health Insurance (AAA-CHI) in 1992. The premium (each member paying on an average of Rs. 22 per annum) is not adequate to cover the entire cost. This is taken care of by a subsidy on premium funded by a Dutch donor agency (called CEBEMO) and the rest comes in the form of cross-subsidy from non-tribal population. While AAA insured tribals in mass with a formal insurance company (Royal Sundaram Alliance [RSA] Private Ltd) by paying the total premium for five years, the tribals repay this premium on an annual basis. The premium gathered as well as the details of those insured is handed over to the hospital accountant once a month. There are two benefit packages – a package provided by the insurance company to AAA and package provided by AAA to

*adivasis*. RSA assures hospital care with an upper limit of Rs. 1000/- per patient per year which included most common ailments but excluded psychiatric illnesses. AAA thus offers a more comprehensive package to the adivasi community.

6.28 Further any claim for hospitalisation for an excluded illness is not taken up by ASHWINI and claims are made only to a maximum of Rs 1,500. The insurance company in turn reimburses ASHWINI on a regular basis, usually after a lag time of three to six months. The reimbursement rates have been in the range of 95-100 per cent. The scheme could overcome the issue of affordability by adopting a reduced premium rate. As insurance was a new concept, ACCORD paid Rs. 65 per adivasi in the first round. Later the members were asked to repay at a rate of Rs. 4 per person initially, then gradually it was raised to Rs. 6, Rs. 8 in the subsequent years. In this way within 5 years the whole premium is repaid by the adivasis.

6.29 The Karuna Trust (KT) in Mysore along with the National Insurance Company (NIC) offers the following insurance package in a Public-Private Partnership initiative. For a premium of Rs. 30 per person per annum, the insurance company would pay, in the event of hospitalisation, Rs. 100 per day per patient (Rs. 50 per day given directly to NGO for drugs and Rs. 50 per day given to patient for loss of wages) with the maximum cover of Rs. 2, 500 for all inpatient care at public health facilities. The package includes all kinds of illness and diseases and neither any exclusion nor any waiting period involved. The premium was subsidized fully for poor (defined as Below Poverty Line households) SC/ST population, partially for BPL non- SC/ST households and no subsidy for above poverty line (APL) households. The scheme faces the problem of sustainability as UNDP cannot be expected to continue to subsidize the premium.

6.30 Another Public-Private Partnership Initiative is evident in the Vivekananda Foundation that signed a Memorandum of Understanding in 1996 with the government of Karnataka. The Thithimathi Primary Health Centre (PHC) was handed over along with the assets and equipment to the Foundation for a period of 10 years. It was decided that 25% of the personnel cost would be met by Foundation and the government will pay Rs. 75,000 per annum for drugs. The government has a policy of not collecting user fee at the PHC level. Gradually the health centre was converted in to a 10-bed hospital which can provide secondary health services also. Presently, the Thithimathi PHC covers about 13,569 people.

## International Experience

7.0 The Commission feels that it is important to examine, albeit briefly, the international experience in the provision of social security especially of a protective nature so as to draw some lessons for India, keeping in mind its own level of income, structure of the economy and the need to provide a measure of social security. With this objective in mind, the Commission has made a quick *de tour* into (a) the historical experience of western countries, (b) the contemporary experience of developing countries with a record of extending social security beyond those working in the organised sector, and (c) the recent experience of countries, especially in Asia, in extending social security.

7.1 The notion that social security, especially of a protective kind, is not affordable to countries at low levels of income is quite widespread including some sections of scholars in the field. Atkinson and Hills (1991), for example, even argue that there is very little for the developing countries to learn from the experience of the developed countries especially that of Britain, France and the USA. Both the level of development and the structure of the economies in developing countries are thought to be so different.

“As a result, the institutional assumption that social security schemes can be introduced for the bulk of the population, while a reasonable goal of twentieth-century reformers in Western countries, has little applicability to developing countries” (p.104).

7.2 However, such opinions do not take into account the long-term evolution of social security in the present-day developed western countries as well as the impressive gains made by the developing countries since decolonisation as well as the demonstration of the feasibility of both promotional and protective social security arrangements in selected countries and regions despite low levels of income and a structure of economy that has a sizeable informal sector (e.g. Costa Rica, Tunisia, State of Kerala in India, and Sri Lanka). Many countries are in fact following a model that combines social security arrangements while striving to enhance aggregate economic growth.

7.3 In his magnum opus *In Care of the State* (de Swaan 1988), the Dutch political scientist Abram de Swaan gives a detailed account of the evolution of social policy and social security in western countries. It should be noted at the outset that the Mosaic Law, the socio-political systems of classical Greece and the Roman Empire, the edicts of Asoka, the simple rules of early Christian communities, and the institutions of family, village, and caste in India, to mention a few instances, all contained elements of what is today known as social security.

In Europe it was the Church, beginning with the ninth century, which sought donations from the settled farmers and general public to feed and maintain the 'vagrants', 'beggars' and the 'sick', i.e. those who faced acute deficiency in meeting minimum access to resources to maintain their life. A compulsory levy for the upkeep of the poor was not common in those times. When the modern period began, rights to private property and use were well established in Europe and those who did not own land, worked on other people's property to eke out a living. By the 16<sup>th</sup> century, long before the beginning of the industrial revolution, large cities in Europe had well established 'poor houses' where thousands of poor were looked after so that the local communities could live peacefully. It was the Elizabethan Poor Laws, which for the first time in 1601, stipulated the standards for looking after the poor; and the Church levied sufficient 'poor rates' on the landowners in order to finance the whole set up. Poor relief in the United States in the 17<sup>th</sup> and 18<sup>th</sup> centuries followed the broad framework of the Elizabethan Poor Law. Around that period the responsibility of looking after the poor was shifted from the Church to the locally elected 'overseers of poor'. As time went by, these societies were gradually getting more and more involved into a system of direct administration of the poor. In those times – as it indeed is in our own times among large sections of the rich and the middle class – the general notion was that the poor are so, because they are lazy. Within the framework of this logic in the 17<sup>th</sup> century 'work houses' were established to provide work and shelter to all able-bodied unemployed, vagrants and other poor.

7.4 The industrial revolution, unlike many other revolutions, shook the very foundations of the agrarian system in rural areas and the commercial/mercantile system in the urban centres in Europe. However, even during the dawn of the industrial revolution, orphanages, old age asylums, insanity wards and maternity houses were run by local governments and a system of social security supported by the state was gaining more and more importance in Europe. Collective action was the spontaneous answer by the elite sections of European society to the threat posed by crime, cholera, anarchy and squalor resulting from large numbers of unemployed, vagrants and the sick. The shift from individual action to collective action (as represented by the state) occurred not out of any philanthropic motive, but due to the threat these posed to the established social order as thousands migrated into the cities each day in search of work and a better living during the period of the industrial revolution. By the last decade of the 19<sup>th</sup> century, the social security system, as we know it now, was well embedded in the social fabric and governments were having well-established systems for the care of the destitute and the poor.

7.5 This interpretation emphasises the self-interested nature of the privileged classes in promoting a measure of social security for the poor who were seen as *les classes dangereuses*. But there is also the other side of the story in the evolution of social security as a result of the initiatives and demands generated by the labouring classes. This had happened, even prior to the emergence of trade unions, in the form of mutual benefit societies of workers in many countries,

most prominently in Western Europe. But could not sustain itself because they were limited forms of collective care (through mutual help) without the internalisation of costs to the society at large. However, they could be interpreted as the precursors for wider notions of social security especially those based on work to take care of contingencies (see, e.g., Linden 1996).

7.6 Given the irresistible influence of socialism by the late 19<sup>th</sup> century in the European Continent, it was in fact the organised strength of the working class that stood to facilitate the evolution of social security in terms of 'welfare state' policies. Here the emphasis was to secure a minimum of social security arising out of one's status as worker but bargained and fought collectively. The state, out of the necessary urge of its 'legitimation function', initiated public policies to woo working class away from the Social Democrats, preaching socialism. The first of these tactics came from 'Bismarckian socialism' of Germany in 1883 in the form of a comprehensive scheme of social security, offering the workers insurance against accident, sickness and old age. Though it represented the paternalist function of the state that Bismarck, as a conservative, had always held, its prime function no doubt was as a weapon against the social democrats. This, however, directly brought the concept of social insurance into the realm of public policy and responsibility of the state. Of course, the motivation did not come from an overwhelming concern for the plight of the working poor. It was, as already remarked, the outcome of a nationalistic agenda of an activist state and was opposed by the workers movement as well as the parliament.

7.7 However, the Bismarckian model of social security survived many vicissitudes and came to be adopted with variations by many other European countries in the next half century. The British experience was characterised by compromises both by workers unions and employers and mediated by the state. The later advent of social insurance in France was based on a tripartite coalition among the state, sections of the workers movement and big industrialists. In the United State social policy of the state was slow to catch up with Europe although it remained as a local agenda through mutual benefit societies. The dramatic spread of social security in the sense of social insurance in The Netherlands is a post-war phenomenon, as in many other European countries. A Workmen's Compensation Act came into force in 1901, Invalidity and Old Age Pension in 1919 and "implementation of a sickness insurance law, also enacted in 1913, was delayed until 1930" (de Swaan 1988:210). Compulsory state unemployment insurance came into effect only in 1952.

7.8 The experience of Europe in the matter of evolution of social policy for providing a comprehensive measure of social security took place in a historical context as first time industrialising countries. This does not however mean that such a historical experience is not relevant to the contemporary concern for social security in developing countries. The dynamics of social and economic change were certainly different, but it throws up important questions that are pertinent to the institutionalisation of social security in poorer countries. Some of

these are spelt out below since they deserve to be kept in mind and thought through for a global perspective on this important social issue.

7.9 First of all, the division between 'promotional' and 'protective' social security fits neatly with the European experience. The first one was met through a long process beginning with charity, community service, and philanthropy but later transformed into a collective concern to be addressed by the state. Thus poor relief, basic education and health care started with collective charitable arrangements first at the local (parish) level, then at the city level and finally at the national level. Later housing was added to the basic social security arrangements organised and implemented by the state. These were added and extended to all deserving citizens in the post-war era. Social security to meet contingencies were introduced through the work status of individuals but those who could not meet the minimum requirements were taken care of by the state in terms of old age pension and unemployment allowance. But what needs to be noted is their continuing relevance in many rich countries despite considerable increases in the per capita income.

7.10 Secondly, the evolutionary trajectory of social security in European countries suggests the increasing and also effective role of the state from an early stage. This interventionist role of the state predated full-scale industrialisation. This lesson is an important one from the contemporary perspective where many would be persuaded to think that the state in the developing countries is not yet in a position to address the whole range of issues relating to social security. It is in this context that considerable attention is being given to the role of non-state actors in taking care of some aspects of social security. This might seem attractive in the present-day conditions. But historical experience suggests that there is hardly an effective alternative to the role of the state in providing a modicum of social security especially to the poorer sections of the population.

7.11 Thirdly, there is the role of demand from below. Workers movements played an important role in forcing the state to institute social policies that addressed both the 'promotional' and 'protective' social security. This underlines the crucial nature of the social dynamic that contributed to the evolution of a public policy on social security issues. This is perhaps absent in many developing countries. But it would be an underestimation if we were to conclude that many developing countries did not go through the required social dynamics. National liberation movements often emphasised not only the political emancipation but also the social emancipation of the people. The achievements during 1950-80 of a number of developing countries point to this.

7.12 Fourthly, a process of industrialisation and an increasingly urbanised economy and society accompanied the process of evolution of social policy in Europe. State capacity to manage social issues had grown enormously especially after the experience of managing war time situations. However, this is

not the case with most of the developing countries. The process of industrialisation is slow and given the pace of technological change, fewer and fewer people are needed to produce more and more industrial output. Most of these countries are still rural in character. This therefore poses new challenges to the state in these countries in meeting the requirements of providing a broad range of social security.

7.13 Despite very different economic structure and stage of development, the expectations of people in the developing countries are perhaps much higher than they were among the people in Europe in an era when social security concerns were just beginning to be addressed as a collective issue. This is because of the increasing integration of countries through the technologies of transport and communication as well as the power of transmission of ideas from one place to another. The challenge of social security in developing countries is therefore also one of meeting the gap between expectations and reality.

### ***Experience of developing countries***

#### **China**

7.14 The experience of China in providing some social security to those who are outside the formal sector of the economy is of particular relevance to India in a number of ways. First of all, China is a large – in fact larger – country by size and population with a number of provinces. It has increasingly liberalised its economy, both internally and externally, and has moved away from a comprehensive system of basic social security, including employment and income, for all its population. This has resulted in enhanced sense of vulnerability and urgency for providing alternative systems of social security consistent with its market-oriented economic policies.

7.15 China's social security system needs to be understood in terms of (a) urban social security, and (b) rural social security. The social security system for urban areas is rather well developed and institutionalised compared to the system in place for the rural areas. Like the case of India, social security in China includes both the promotional ones, directed to meet problems of deficiency, and protective ones, directed to meet contingencies. However, the former has received far more attention than the latter, something that is also the case with India.

#### **Urban Di Bao**

7.16 The social security for the poor in urban China is based on household income and other indicators of the quality of living. What is provided is a Minimum Living Allowance called Di Bao in Chinese. Until the late 1990s, the urban di bao was a subject of various urban local governments. However, the di bao programme was adopted as national policy in the late 1990s. Eligibility is determined whether the per capita household income is below the so called "di

bao level". Stringent tests are administered, including quality of housing and the type of school where children are sent to determine eligibility giving considerable discretion to local authorities. There is no single di bao for all urban areas. Considerable variation exists as between different urban areas depending on the financial condition of the local government. Some rich urban local governments do not get any financial assistance from the central government while some backward regions get 100 percent central financial assistance. The urban di bao varies from around 300 to 320 yuan per person per month in Guangzhu and Shenchuan to 150 to 180 yuan in cities in poorer regions such as Huhehaote (Inner Mongolia), Taiyuan (Shanxi), Guiyang (Guizhou) and Lanzhou (Gansu). This works out to Indian rupees (approximately) 1,710 to 1825 and 855 to 1,025. Apart from the cash component, there are also other benefits like preferential access to such services as health care and education of children.

7.17 Ever since the introduction of the urban di bao as a national policy, there has been a steady increase in the beneficiaries. By end of 2003, it was around 22 million with a total expenditure of 15 billion yuan. The central government share was 61 per cent while the local government contributed the remaining 39 per cent. Most of the beneficiaries were workers including those on the job, laid off workers, those who have left their jobs (although formally holding their posts), unemployed and dependents.

### **Rural social security system in China**

7.18 It must be mentioned at the outset that the incidence and intensity of poverty and human deprivation is far lower in China than in India. The policies followed immediately after the 1949 socialist revolution as well as the growth-oriented policies followed since the early eighties are both responsible for such a state of affairs. The outcome of the socialist period was that it resulted in a 'levelling up' of the bottom sections of the population in terms of employment, income, health and education. Population policies followed since the late seventies resulted in reducing the population growth by limiting the number of children per couple to one to two. The situation today is such that population stabilisation is round the corner. This should be viewed along with a low Infant Mortality Rate of 30 in 2003 as against India's 63. The incidence of absolute poverty is also low in China even going by alternative estimates. The official estimate is less than three per cent (28 million people) in 2002. The incidence according to international poverty line (one dollar per capita per day) is 17 per cent (in 2002-03) or around 200 million. The official estimate of incidence of poverty in India is 26 per cent or 260 million (in 2000) and the incidence as per international poverty line is 35 per cent or 350 million in 2002 (UNDP 2005). China has a poverty reduction programme concentrated on 28 percent of its county-level administrative districts. But the limitations of an area-based programme, like the backward districts programme in India, is being realised. For one thing, only 38 per cent of the total poor were found to be living in these counties.

7.19 We divide, broadly speaking, China's rural social security system into promotional and protective and see its coverage and related aspects. Our main interest in this report is to examine the protective social security cover that corresponds to the proposed social security cover for the workers in the informal economy.

### ***Old Age Pension***

7.20 Counties in all provinces have some form of rural pensions. The contributions come from beneficiaries, local governments as well as the central government. The amount of pension given is not available mainly because it varies across counties. While various schemes are reported to be in operation, the main scheme was launched by the Ministry of Civil Assistance in 1991 and transferred to the Ministry of Labour and Social Security in 1997. In 1997, it had 82.8 million subscribers on a voluntary basis. However, the scheme is reported to have stalled since 1999 when central government support was reduced. By 2003 only 54.3 million people were on the rolls.

7.21 In addition to the above, the Town and Village Enterprises (TVEs) provide pension schemes to its workers through commercial insurers. It has been reported that in some rural areas TVE pension schemes have been gradually unified and merged with state pension schemes.

7.22 In some provinces, "pensions" are provided to parents of old child or two daughters as a social assistance measure (non-contributory).

7.23 Given a plethora of schemes with varying levels of benefits across counties, the central government has been working on a scheme called rural *di bao* or Minimum Living Allowance (discussed later).

### ***Disaster Relief***

7.24 Another protective cover is to meet the contingency of natural disasters. This is given to the affected population in the form of cash or kind and consists of (a) a temporary home, (b) 7-10 days worth of food, (c) a minimum of two pairs of exchangeable clothes/garments, (d) a bed or cot, and (e) clean drinking water. The expenditure in 2003 was over 8 billion RMB.

### ***Wubao or Five Guarantees Programme (Social Assistance to the Destitutes)***

7.25 This should be counted as protective social security since it is given to those who find themselves unable to work and without any source of income including family support. The beneficiaries are provided with five guarantees of food, clothing, housing, medical care, and funeral expenses. Educational expenses of orphans are also covered under the scheme. The *Wubao* scheme

aims to guarantee a living standard equivalent to the local average. Close to 3 million people were covered under the scheme by 2002 with 84 percent living in the community and the remaining in old age homes or similar arrangements.

7.26 Given the eligibility criteria and the nature of benefits it would appear that this scheme is in the nature of social assistance to destitutes. In India, the equivalent to this scheme is the old age pension under the National Social Assistance Programme plus the Antyodaya Anna Yojana under which the chronically poor are given adequate foodgrains at a highly subsidised price. However the *Wubao* is more comprehensive in terms of meeting the basic requirements of such destitute poor. It has been reported that around 30 per cent of rural people eligible for *Wubao* are not yet covered under the scheme. The per capita benefits have been estimated to be equivalent to one-half to two-third of the per capita average provincial rural income.

### ***Health insurance through Community Medical Schemes (CMS)***

7.27 Rural health care in China till the commune system was disbanded were taken care of by the local institutions (communes, village and town bodies). The public care system today has, by and large, given way to semi- or fully private systems. While people buy health insurance products on a voluntary basis, that leaves out the relatively poor. To take care of this problem, CMS are being encouraged and the government is providing a part of the contribution. In fact, the contributions are in the nature of “10+10+10” i.e. equal contributions of ten yuans by the beneficiary, local government and the central government. The scheme is reported to be taking shape with the government seriously considering this risk pooling mechanism.

7.28 It is a coincidence that the contribution under the CMS resembles our proposal for a national minimum social security for workers in the informal economy. This perhaps reflects the similarity of situation and the risks associated with such a basic need as health care.

7.29 There are a number of promotional social security measures in China that are directed to reduce rural poverty as in the case of India which are not dealt with here. However, the emerging experiment of instituting a Minimum Living Allowance in rural areas (since urban areas have a similar and well-established social security system) is a step towards extending the coverage of protective social security. This is called *Di bao* (Minimum Living Allowance).

### **Rural Di Bao**

7.30 First of all, it needs to be noted that social security schemes in China vary across regions since they set the standards and often fund the schemes. The benefits under the rural *di bao* scheme is a combination of (a) monetary assistance, education fee waivers, additional educational subsidies, lower utility

fees, lower medical fees, lower house rental fees, etc. The system is broadly modelled on the urban *di bao* scheme which has been implemented nationally since 1999.

7.31 The eligibility is determined by a set of income, assets and living conditions tests. Rural households with a combined annual income of less than the regional *di bao* standards are eligible for di bao subsidies. Selection is done by local farmers' committee which has to be approved by the Ministry of Civil Assistance.

7.32 The floor level for the rural di bao has been set by the central government at RMB 637 per annum per beneficiary and the provincial governments are encouraged to top it with their own contributions based on local fiscal capacity and economic conditions. The variation in 2004 is between RMB 1000 and 3,120. In Indian terms this works out to Rs.6,000 to 18720 per annum or Rs. 500 to 1,560 per month per beneficiary. This is a valid comparison since price differences for wage-goods is not very different as between India and China.

7.33 The coverage by 2004 was reported at 4.38 million beneficiaries that is equivalent to 4.4 per cent of the poor (as per international poverty line) or 10 per cent of the poor (as per official poverty line).

7.34 Given the stringent eligibility conditions and the coverage of the poor, the idea seems to be to provide a minimum of social protection to the most vulnerable in the rural society. The coverage is expected to increase as more provinces increase their efforts to extend the di bao system.

## **Indonesia**

### **The Current Indonesian Social Security System**

7.35 As with most other developing countries, the social security system for workers in Indonesia mainly covers those in the organised/formal sector of the economy. This covers only 10 to 15 percent of the total workers. Although community schemes for health care were initiated they did not succeed partly because they were left to the administration of local governments.

7.36 The current thinking in Indonesia is towards a universal social security system for all workers including those in the informal sector. While the market for various social security cover run by private agencies will continue for those who have the purchasing power, the proposed national social security will be a statutory one based on contributions. As of now, the Commission understands, the proposal is in the stage of a draft bill which is expected to be enacted soon. The main features of this scheme are given below.

## **The Proposed Indonesian National Social Security Reform Bill**

7.37 Because of the major drawbacks of the current social security system, Indonesia has come out with a National Social Security Reform Bill. This new Indonesian National Social Security System called Jamsosnas, will be established in accordance with what is called 'the three pillar approach'. These are: (1) Social Assistance for citizens who lack the financial means or access to their basic needs (like natural disaster, social unrest, illness, old age or loss of employment). It will be financed by state budget or by community funds; (2) A compulsory social insurance scheme, financed by employers and employees; and (3) A voluntary private insurance, in which a person may opt to take out additional insurance.

7.38 The new scheme is based on the following principles:

- a) Mutual assistance: Wealthier participants will assist those who are less fortunate; those with low risks will help those with high risks and those who are healthier will help those who are sicker.
- b) Compulsory membership: All Indonesian residents, in stages, will be required to participate in the Jamsosnas scheme.
- c) Trust funds: the funds collected from participants will be managed by the National Social Security Provider Agencies in a trust fund which will be used optimally for the welfare of all participants.
- d) Not-for profit: the management of this trust fund should not be profit oriented and the funds should be used to meet the needs of all participants.
- e) Openness, risk aversion, accountability, efficiency and effectiveness: these management principles will become the basis for the national social security programme.
- f) Portability: participants will continue as members of the National Social Security Scheme regardless of their income and employment status, and will continue to receive benefits as long as they fulfil the eligibility criteria for receiving these benefits.

7.39 The scheme proposed by government is comprehensive and will consist of retirement benefits, health care benefits, death benefits and worker disability benefits that cover all Indonesian citizens, regardless of whether they are formal workers, informal workers or self-employed. Though the official contribution rates for the different Jamsosnas schemes are still unknown, it is estimated that the total cost of the program for formal sector workers will vary from 17.29% to 18.80% of base salary. A National Social Security Board consisting of members

of government, employers' organisations and labour organisations will be set up to over see the program. The scheme consists of (a) The Old-Age Pension Program, (b) The Old- Age Saving Programme and, (c) The National Health Insurance Scheme.

### **The Old-Age Pension Programme**

7.40 This is a long-term program where participants make regular contributions for availing old-age pensions, disability pension, widow/widower pensions and child pension. The fixed minimum pension under the proposed old age and disability pension plan has been set at 70% of the minimum wage; Widows/widowers (until they re-marry or start working full time) and children (until they start working full time or reach 23 years) will receive a minimum pension of between 40% to 60% of the local minimum wage. A worker who has contributed for minimum 15 years and worker who dies before retirement age (55 years) will receive a monthly pension; those workers who retire before 15 years contribution will be given only the accumulated amount and the investment returns and not a monthly pension.

7.41 The contribution level for the pension program will be set differently that the contribution from formal sector workers (will be shared with their employers on a 50:50 basis) will subsidize the pension received by informal sector workers. The latter will contribute a flat rate amount to be determined later. The government plans to cover pensions for those who are too poor to contribute to the scheme through subsidies from the state budget.

### **The Old-Age Savings Programme**

7.42 This is a long term compulsory saving programme in which participants will be entitled to receive benefits before or upon reaching retirement age and will be run by a public social security agency. In the event of the death of a participant, his or her spouse, children or official inheritors will be entitled to receive the benefit. The benefits will be provided as a lump-sum payment (accumulated contribution plus the investment returns on the contribution) if a worker dies, becomes permanently disabled, or retires. At the earliest, workers may start withdrawing money from their account five years before they reach the retirement age and may even use a portion of the money saved in their account as a loan after they have made contributions for a given period. The contribution rate is the same as the Old-age Pension Programme.

### **The National Health Insurance Scheme**

7.43 This scheme theoretically covers health expenditure for all Indonesian residents, including upper income Indonesians and foreigners working in Indonesia. Formal sector workers must pay 6 percent pay roll tax, split equally with their employers. Retirees will also pay the 6 percent tax and this will be

deducted from their pension. Contribution rate of informal sector workers and self-employed will be decided later. Government will pay contributions for low-income groups and unemployed. The programme will be implemented in stages, first for formal workers and then for informal and self-employed workers.

7.44 The programme is designed to provide comprehensive health benefits like primary health services, referral health services, in-patient services and other health services. Services will be delivered by both public and private hospitals and health clinics, as long as they agree to the terms and conditions stipulated in the service contracts they sign with the National Health Insurance Provider Agency. The programme will be administered by the National Health Insurance Provider Agency, which will be supervised by the National Social Security Board. The agency's management will be appointed for a period of 5 years at the agency's shareholders meetings.

## **Tunisia**

### **Development of Social Security in Tunisia**

7.45 The experience of Tunisia in providing a modicum of social security to a great majority of its working population is not widely known but something that we feel needs to be highlighted. A recent ILO study (Chaabane 2002) has brought out the main features and functioning of this system that should be counted as one of the best practices in developing countries.

7.46 After independence, social assistance for destitute and vulnerable classes was organized by the State within the framework of social solidarity fund, which was financed in part by individual and corporate donations. In addition, a medical assistance system was established to give care to destitutes in public health establishments free of charge. The public sector came up with social security schemes such as provident society (1898) for civil servants and employees, family allowance (1918), supplementary benefit for single-income households (1944), Provident scheme (1951).

7.47 Until the 1960s, social security in the private sector was mainly confined to the formal sector in industry, trade and services. However, major developments took place since the 1960s to extend the coverage to larger groups of workers including agricultural labourers and the self-employed. The first scheme in the private sector set up in 1960 for employees in industry, trade and the services. The scheme was extended to students in 1965 (health care and family allowance component), full time agricultural labourers in 1981, self employed agricultural and non agricultural workers in 1982 and Tunisian workers abroad who have not been covered by any social security agreement in 1989.

## **Current Social Security System**

7.48 The system is structured around two components: **(1) Social Security**, which is gaining importance and currently applies to 83<sup>1</sup> per cent of the employed population and **(2) Social Development Schemes**, which are intended for persons who do not have social security coverage.

### **Social Security**

7.49 Entitlement to benefits under these schemes is also open to a spouse and dependent children in addition to the insured person himself. As far as survivors' pensions are concerned, benefits are paid in the event of death and health care to dependant relatives in the ascending line, provided that they are not covered by any social security scheme and that they are effectively dependent on the employee. There are two funds under state supervision which manage the statutory social security schemes: National Pension and Social Contingency Fund for the public sector and the National Social Security Fund for the private sector. The boards of administration of these funds are composed on a tripartite basis (State, employers and employees).

### **Two Categories of risk covered**

#### **Core benefits found in all schemes**

7.50 The core benefits of the social security system are (a) health insurance to cover sickness, (b) maternity cover, (c) old age pension, (d) life insurance, (e) disability cover, and (f) employment injury.

7.51 The sickness allowance in the public sector amounts to full pay during the first two months and half pay for the following periods; maternity benefit is granted at the full wage/salary rate for the first two months and can be complemented by four months post-natal leave on half pay.

7.52 In the private sector, sickness allowance amounts to two-thirds of the declared wage or income within the limit of the ceiling of twice the inter-trade minimum wage in most cases. Maternity benefit is granted for one month and can be renewed fortnightly on the basis of a doctor's certificate. It is calculated on the same basis as the sickness allowance.

7.53 As regards benefits in kind, the social security schemes provide a full range of health care for the insured person and dependent family members (non-insured spouse, dependent children and parents), including costly care such as haemodialysis, cardiovascular surgical operations or organ transplants. Insured

---

<sup>1</sup> This rate is obtained by expressing the number of persons liable to contribute to a social security scheme as a percentage of the population in employment.

persons in the public sector have the choice between either receiving a refund of expenses incurred for health care (limited to long-term illness and surgery or extended to all illnesses), or receiving free care provided in hospital and health institutions under the responsibility of the Ministry of Health. In the case of insured persons in the private sector, health care is provided in the hospital and health institutions under the responsibility of the Ministry of Health or in the polyclinics of the National Social Security Fund.

7.54 The branch responsible for granting disability and old age pensions or survivors' pensions in the event of the death of the insured persons involves certain qualifying ages and periods. These are determined according to how long the insured persons have been paying contributions and the amount of declared wages or incomes, with a guaranteed subsistence minimum, as the case may be. The replacement rate varies from 35 per cent for 15 years to 90 per cent for 40 years of contributions in the public sector, and from 40 per cent for ten years to 80 per cent for 30 years of contributions in the private sector.

7.55 Employment injury and occupational diseases insurance covers all categories of income earners without any restriction whatsoever, including those who are not covered by the other classes of insurance such as seasonal agricultural workers or domestic workers. It also covers other categories, which are not considered to be income earners such as students in technical and vocational training and apprentices. Self-employed workers can subscribe to the employment injury insurance voluntarily. This system of compensation for employment injury and occupational diseases makes provision for the granting of a number of benefits including health care, daily allowance for temporary incapacity, artificial limbs, pension in the event of permanent incapacity or survivor's benefit in the event of death.

### **Social security insurance of limited scope**

7.56 This category covers family allowances, which concern only public employees, income earners in the non-agricultural private sector, and income earners in the formal sector (agricultural enterprises and cooperatives and large farms). Family allowances comprise in particular:

- a) Allowances granted exclusively for the first three children. The amounts of these allowances are tapered on a sliding scale depending on the position of the child and ranging from 7,320 DT ( 1 DT = 0.7 US\$) per month for the first child to 5,693 DT per month for the third child.
- b) Supplementary allowance for single-wage households (only one income from an occupational activity). The amount of this supplementary allowance varies according to the number of children qualifying for family allowances – from 3,125 DT per month for one child to 7,815 DT per month for three children.

- c) The death allowance, which is a non-recurrent benefit paid once to the eligible survivors of a deceased insured person and can amount to 30 times the monthly wage/salary. This benefit is provided for public employees, income earners in the non-agricultural private sector and self-employed workers.

### **Contribution**

7.57 The social security schemes are financed almost exclusively by the employers' and workers' contributions, whose rates vary from one sector to another depending on the consistency of the benefits guaranteed and the ability of the populations involved to pay contributions. This rate thus amounts to 23.25 per cent of wages/salaries in the case of income earners in the non-agricultural private sector, whereas it does not exceed 6.45 per cent of a flat-rate wage in the case of agricultural workers.

7.58 The contributions of workers and employers are paid by the employers. In the case of self-employed workers the contributions to the respective social security fund is made directly. In the case of workers the recovery rate for contributions has been reported at 90 per cent while for self-employed it ranged from 47 to 66 per cent.

7.59 It has been reported that the Tunisian social security system is still generating surpluses although a deficit is reported in the scheme for agricultural workers.

### **Social Development and Social Assistance Programmes**

7.60 These programmes are intended for low-income categories and persons who are not covered by any social security schemes; they are run essentially either by the State or by associative bodies. They are financed through the State budget and by donations. State intervention takes the following forms:

- a) A programme of aid for needy families, which targets families below the absolute poverty line (currently 109 DT) and makes provision for the granting of permanent aid of 109 DT per quarter;
- b) A similar programme targeting the elderly and disabled persons in need;
- c) An allowance to families who agree to take in an elderly person;
- d) Free medical assistance intended for underprivileged groups of the population who are not covered by any social security system (old people without support, the unemployed, seasonal agricultural labourers, etc.) and which comprise two categories of aid:

- i. Free health care in the public health structures for needy families (150,000 beneficiaries), selected according to a poverty record drawn up on the basis of in-depth social surveys;
- ii. Health care at reduced rates in the same structures for families with limited incomes (a maximum of double the SMIG, depending on the composition of the family), which are not covered by any social security scheme (500,000 beneficiaries).

7.61 In order to benefit from this form of assistance applicants must meet two conditions. One relates to a ceiling on family income and the other relates to the absence of membership in any social security scheme.

7.62 The beneficiaries will receive the full range of care provided by the health and hospital structures under the responsibility of the Ministry of Health. The public health system has a network of healthcare institutions at the national, regional, district and local levels. It boasts of one basic (primary) health care centre for every 4,889 inhabitants that should be counted as a remarkable achievement.

### **Extension of Social Security**

7.63 The number of persons liable to be covered under a social security scheme was estimated in 1999 as 83 per cent of the population in employment. The remaining employed population not yet covered by social security legislation include casual and seasonal agricultural labourers, workers on development sites (unemployed persons employed in community work), domestic employees, home-helpers, religious officials and the unemployed.

7.64 The two social security schemes governing the formal sector, i.e., the public sector scheme and a scheme for income earners in the non-agricultural private sector, have registered the best social coverage. However, coverage of other sectors such as self-employed, agricultural and non-agricultural workers and agricultural labourers has not experienced equal success. In order to increase coverage in these schemes measures have been taken with varying success: inspection and compulsory affiliation procedures; free medical assistance subject to verification that the applicant was not insured under a social security scheme; and schemes being adapted to the needs of injured persons such as fishermen employed on small boats and self-employed fishermen.

7.65 The objective is to extend and improve coverage of social security by conducting studies and adapting schemes to the needs and financial capacities of the categories of persons; modifying the conditions for determining and recovering contributions taking into account the specific characteristics of the

populations concerned; and consulting the representatives of the target population and of employers at all stages during the establishment of the system.

**Table 7.1 Percentage of workers covered in various sectors**

Category	1989	1999
Non-agricultural income earners	73.2	97.2
Agricultural labourers	20.7	46.6
Non-agricultural self-employed	14.7	51.0
Agriculture self-employed	13.9	56.1
Miscellaneous	100.0	100.0
Total private sector including agr.	48.3	78.7
Total public sector	100.0	100.0
Total coverage of workers	60.0	83.9

## **Brazil**

7.66 Brazil is a middle-income country with a per capita income 2.7 times that of India in 2003 (7,790 in terms of PPP\$) and a population of 165 million. The country is characterised by one of the highest economic inequalities. Democratic forces gained strength in the 1980s and resulted in a new constitution in 1988 with specific provision for social security. A recent ILO study (Schwarzer and Querino 2002) has observed that, despite labour market informality, Brazil has reached remarkable benefit coverage among the elderly over the last decades. The two elements of this success are the Rural Social Security programme and the Social Assistance Pensions on which we focus our discussion.

7.67 At the outset it must be mentioned that as in India and elsewhere, there is a well-established social security system for all workers in the organised/formal sector of the economy. In addition, there are private social security funds (as well as those by public enterprises) membership of which is on a voluntary basis involving defined contributions or benefits.

7.68 Both the Rural Social Security Programme as well as the Social Assistance Pensions is covered under a general scheme called RGPS. It is managed by the Social Insurance National Council which has a tripartite co-administration including representatives of the trade unions, employers and beneficiaries. Its mandate is to provide social security for all residents in Brazil. By 2001, there were 30 million people covered under the RGPS including urban residents.

### **Rural Social Security Programme**

7.69 Although the rural pension scheme was started in the early seventies, the Rural Social Security Programme has gone through profound changes with the issuance of the new Constitution of 1988. The important changes are (a) the

right to an old-age pension was extended to the spouse, (b) the age limit for old-age pension was reduced by five years to 60 and 55 years for men and women respectively (as against 65 and 60 in urban areas), (c) the minimum benefit was fixed at an amount equal to one official minimum wage, and (d) enhancement of widow's pension.

7.70 Given the poverty and working conditions of rural workers, an innovative system for contribution was devised. Under this, individual beneficiaries were not required to make any monetary contribution from their earned income but required the first purchaser of rural production to pay a contribution of 2.2 per cent of the primary value of the produce. Another innovative feature is that the beneficiaries were required to document only the years of work instead of years of contribution to fulfil the minimum insurance period to qualify for a pension. It has been reported that this quantitative and qualitative enhancement of the rural scheme has had a deep social impact since the 1990s like poverty alleviation, access to and substitution of social services, improvements in quality of living such as in housing and reduced rural-urban migration.

### **Social Assistance Programme**

7.71 During the early nineties new legislation enabled changes in social policy and principles to guide such social policy. All the scattered government foundations were closed down in 1995 and a Social Assistance Secretary was created at the Federal Social Security Ministry with the responsibility of coordinating the formulation and execution of policies. Social assistance was to be decentralised, where the Federal, Regional and local levels would take part in a joint design of policies and co-financing, as well as the participation of different groups of civil society by means of the social assistance councils on the three Federal levels. On each level a basic document would be prepared to define social assistance policy, based upon a comprehensive diagnosis of local problems and needs. Between 1995 and 1998, several instruments were introduced, such as the creation of a National Social Assistance Policy, and the issuance of Basic Operational Norms to institute bipartite and tripartite administrative commissions, which were to promote dialogue between the three government levels, determine the scope of action of each level, settle financial issues, and implement the participative council scheme at the three levels.

7.72 Among the most important programmes are the "Continued Assistance Services" (SAC), which include different types of support. These are (a) home care for the aged and disabled, (b) social services for the disabled, (c) day care and nutrition for children, (d) cash transfer to send children to school who were working earlier and (e) social assistance pension for the aged. The eligibility for all these social assistance programmes was determined for those whose per capita family income is below one-half of the official minimum wage. However, since 1996, the fastest growing programme has been the social assistance pension scheme.

## **Social Assistance Pension Scheme**

7.73 The social assistance pension scheme, known as “*Benefício de Prestacao Continuada*” (BPC), has two target groups: (i) people aged 67 or more and (ii) disabled people, including those with genetic disability. In both cases it is required that the per capita family income of the benefit applicant does not surpass one-quarter of the legal minimum wage. No previous contribution to social security is needed to qualify for the BPC and the new disability definition includes a broader range of disabled persons, who had never been previously a target of specific public policies in Brazil. However, a BPC is only accorded to a person if in his/her family no further member receives another social security benefit or is enrolled among the unemployment insurance beneficiaries.

7.74 The BPC is paid out by the Social Insurance National Council (called INSS) at the same dates and using the same payment channels (commercial banks and post offices) as for normal pensions. The most important source used since 1996 for the BPC is the “*Contribuicao para o Financiamento da Seguridade Social*” (COFINS), one of the taxes earmarked by the 1988 Constitution to finance the social security budget. Due to the extreme difficulty in documenting the applicants income—which is informal or very irregular—the law requires that the BPC benefit candidate presents a declaration signed by an authority containing the information that the per capita family income of the candidate is within the allowed range. The applicant can submit their application directly to the INSS by using the standard application forms available at any INSS office or any post office. Once the reform of the social assistance pension came into force in 1996, a significant coverage extension was achieved. As of 2001, a total of 2.1 million people were covered under the social assistance pension scheme.

7.75 One of the major achievements of the new social security policy in Brazil implemented since the early nineties is the remarkable coverage of people with old age pensions. The ILO study mentioned above reports that 77 per cent of persons aged 60 and above collected a benefit from any one of the social security schemes as of 1999.

## **Concluding Remarks**

7.76 The international experience that we have briefly reviewed here suggests that a country need not wait till it is fully industrialised with high levels of per capita income to extend social security to those who have so far been excluded.

7.77 Each country has adopted such social security systems and means of financing dictated by its internal economic and political conditions. There is no ‘one-size-that-fits-all’ remedy for extending social security cover.

7.78 In countries that have embarked on extending social security cover, the initiative has come from the state in terms of design of the scheme and methods

of financing. This points to the critical role that the state will have to play in extending social security.

7.79 Large Asian countries such as China and Indonesia have embarked on extending the social security cover with significant initiatives. While the efforts are still in early stages, they provide important lessons for India and emphasize the need for extension of social security in an increasingly globalising world. India, therefore, cannot and should not wait in extending social security to those who have been excluded so far.

## Towards a Universal Social Security System

8.0 The effectiveness of a national minimum social security for all workers in the economy is predicated on the success of extending social security cover to unorganised workers. They constitute 91 per cent of total workers in the economy with 85 percent in the unorganised and 6 per cent in the organised sector. The contribution of the unorganised sector alone to the national income is around 60 per cent of the total. Given the high rate of growth of the economy exceeding 6 to 8 per cent per annum, it is time that a social security system with national coverage is put in place. In fact, the two earlier National Commissions viz., the National Commission on Rural Labour (1991) and the Second National Commission on Labour (2003) emphasised the importance of social security and made a number of recommendations some of which have been taken up for implementation. Before we go into the details of the social security system proposed by this Commission, we may briefly recapitulate the earlier recommendations.

8.1 National Commission on Rural Labour (NCRL) under the chairmanship of Dr. C. H. Hanumantha Rao discussed the issue of social security in great detail in Chapter 17 of the report. The Commission recommended that the following minimum social security benefits should be provided to the rural labourers by the state as a matter of high priority:

- a) **Old age pension:** Old age pension at Rs. 100 per month be paid to all males and females above age of 60 subject to income limits prescribed. Destitutes and handicapped persons, even if below the age of 60 be allowed to be eligible for old age pension as already allowed in several states.
- b) **Life insurance:** The coverage under Personal Accident Insurance and Social Security Schemes operated by GIC should be enlarged. In addition, in so far as unorganised workers are concerned, Group Life Insurance Scheme should be considered with the premium met by the state.
- c) **Maternity benefit:** All rural women above the age of 18 and belonging to families whose total annual income does not exceed Rs. 6,400 at 1990-91 prices be entitled, up to a maximum of two live births, maternity benefit for a period of 12 weeks for each birth and the amount of benefit be at the daily minimum wage rate for unskilled labour in agriculture.
- d) **Disability benefit (accident compensation):** Disability benefit, in respect of all cases of loss of earning capacity of 70 % or more and not

necessarily occupational or employment related, must be available, on par with old age pension and subject to the same income criterion, to all the eligible persons between the age group of 18 and 60 years. The efforts for rehabilitation of the disabled have to be considerably strengthened.

- e) **Minimum health care and sickness benefit:** Recommended a scheme of sickness benefit, to compensate for loss of earnings arising out of illness, under which all rural persons within the age group 18 to 60, on hospitalization in a recognized hospital, would be entitled to the benefit for a maximum of 90 days, at the rate of the daily minimum wage rate for unskilled labour in agriculture. The benefit be restricted to those from families whose annual income is less than Rs. 6,400 at 1990-91 prices.

8.2 The Second National Commission on Labour (NCL) also dealt with the subject of social security in great detail. The major recommendations and findings relating to social security are summarized as under:

- a) **Coverage:** All workers who are not covered under the social security laws can be considered as part of the unorganised sector for the purposes of providing social security.
- b) **Financing:** A combination of contributory and tax-based schemes to encourage the participation of the actors involved, particularly the workers.
- c) **Basic benefits:** The basic benefits should include (a) insurance against death or disability, (b) health insurance, (c) maternity cover, and (d) old age benefits. The coverage under death and disability may be comprehensive. In case of disability, the compensatory payment may be made periodically. Under old age benefits, a pension based on a savings-linked scheme may be evolved.
- d) **Organisation:** Recommended the constitution of a high-powered National Social Security Authority, preferably under the chairmanship of the Prime Minister of India. The functions of the Authority will be mainly to formulate the National Policy on Social Security and to co-ordinate the Central and State level programmes.
- e) **Delivery:** The mechanism of delivery should be based on two key principles: (a) it should be as decentralised and as close to the beneficiaries as possible; and (b) it should be tripartite or multipartite involving workers, employers, governments and other stakeholders. Recommended constitution of District/Area Level Committees, which may be tripartite or multi-partite as the need demands with necessary secretarial assistance. Appropriate organisational mechanisms are needed that will extend to the level of Panchayats.

- f) **Identity Cards:** To achieve recognition as a worker each person who is actually working should be given an official identity card. The identity card gives the worker a definite legal identity and recognition.
- g) **Constitution of Social Security Funds:** A Social Security Fund of India and a Social Security Fund of each State may be set up.

8.3 Following the recommendations of the Second National Commission on Labour, the Government of India formulated a pilot Unorganised Sector Workers Social Security Scheme 2004 for 50 districts which met with a very limited response. This scheme has been reviewed in Chapter 4. The Ministry of Labour & Employment also prepared a Unorganised Sector Workers Bill 2004, which contained measures relating to both Social Security and conditions of work and was sent to this Commission for review and recommendation.

8.4 At this point in time, the PMO forwarded a draft Unorganised Sector Workers' Social Security Bill received from the National Advisory Council. (henceforth NAC Draft) and directed the Commission to provide comments on the draft. The salient features of this draft are:

- a) **Coverage:** All workers in the unorganised sector and workers without any social security are to be covered.
- b) **Benefits:** The NAC Draft proposed health, life and permanent disability insurance plus maternity benefits without any contribution from workers. It also suggested an old age benefit scheme including pension but with contribution from the workers.
- c) **Financing:** The financing of the scheme was proposed to be realised mainly from: (i) levy and collection of cess, tax or fees, (ii) grants and loans from the Central and State Governments, and (iii) contribution from workers. The funds collected will go to one or more Welfare Funds to be constituted by the National Authority.
- d) **Organisation:** The NAC Draft proposed the constitution of a National Social Security Authority which was to be a corporate body. It would appoint 'Facilitation Agents' at the State-level for implementation of the scheme. At the district-level District Committees were to be constituted by the National Authority. At the local level selected organisations working among the unorganised workers were to be designated as 'Workers' Facilitation Centres'.
- e) **Delivery of services:** Given the fact that the organisational mechanism was that of a corporate model, the National Authority would have its network through the State-level Facilitation Agents to deliver the intended services.

8.5 The Commission has examined the proposals made by the abovementioned three national bodies. On the recommendations of the NCL, the Ministry of Labour & Employment had formulated the Unorganised Sector Workers Bill, 2004, which has been considered and reviewed by the Commission to formulate its views, after considering the comments of various stake holders on the 2004 Draft. A draft Bill on Social Security along with a separate draft bill relating to conditions of work and livelihood promotion, was prepared by the Commission and submitted to the PMO and Ministry of labour & Employment in August 2005. **On further consideration some more changes are suggested to the draft social security Bill in this report.**

### **Salient differences with earlier proposals**

8.6 The Commission's recommendations improve upon the earlier proposals in several significant ways. Some of the salient differences are the following:

- a) **Contributory nature:** The Commission has recommended a **contributory scheme** wherein the worker, employer and the government pays Re1/- each per day per worker. In case of BPL workers, the workers contribution is to be borne by the Central Government. The scheme is thus designed to be both viable as well as participatory in nature.
- b) **Universal minimum Social Security:** The Commission has provided for a universal scheme for **national minimum** social security comprising health, life and old age benefits. The State Boards have the flexibility to provide additional benefits over and above the national minimum, if additional finance is mobilised.
- c) **Old Age Pension for all BPL workers (60+)** The Commission has recommended an old age pension for all BPL workers above the age of 60 years.
- d) **Federal Structure:** The Commission recommends a **federal structure** and active involvement of the State governments through a National Social Security Board (NSSB) at the Centre, State Social Security Board (SSB) at the state level and Workers' Facilitation Centers (WFC) at the ground level. The structure proposed by the Commission utilizes the existing available infrastructure.
- e) **Multi stakeholder participation:** The NSSB and SSSB are proposed as representative bodies representing multi stakeholder's interest. At the grass root level the Commission has proposed the involvement of Trade unions, NGOs who have credibility among the workers and have past experience in this field, as well as the local body institutions.

- f) **Factual assessment of financial implications:** The Commission has undertaken detailed analysis to work out the financial implications of its proposals which have been made after considerable deliberation with various service providers and after weighing several alternative options.

### **Existing Models of Social Security**

8.7 Although a number of schemes and mechanisms for providing some social security cover to the unorganised/informal workers can be cited, as we have done in Chapters 4 and 5, it should be noted that they do not yet add up to any meaningful whole to this vast body of workers. The only scheme with some national coverage is the **National Social Assistance Programme (NSAP)** covering monthly pension to the old-aged destitute and relief in the event of death of the primary earner (with the Ministry of Rural Development), and a notional maternity benefit to the poor (now with the Ministry of Health and Family Welfare). This state-assistance is however not based on the worker status of the individuals but as poor citizens belonging to the category of 'destitutes'. *Given the fact that an overwhelming majority of them belong to the households working in the unorganised/informal sector, these social security benefits may be deemed as largely helping the erstwhile workers in this sector.*

8.8 The NSAP, implemented from 1995, provided for 100 per cent financial assistance from the central government to the states, and was estimated to cover 68.81 lakh beneficiaries under National Old Age Pension Scheme (NOAPS). The actual coverage as reported by the Ministry of Rural Development in 2005-06 under NOAPS was 72.8 lakh. The launching of the NSAP marks a turning point in the long march to securing a measure of social security to the working poor in the unorganised sector in India. For the first time, it recognised the legitimacy of the demand as well as the responsibility of the state to protect the poor in their old age. It also recognised this as a *national* responsibility wherein the benefits envisaged are delivered by the active involvement of the Central as well as the State governments.

8.9 However the programme also highlights some of the weaknesses of the approach. First of all, the eligibility criteria for old age pension includes a cut off age of 65 years or above. Given the average life expectancy of the Indian population around 62 years, this indeed is a rather stringent criterion. Moreover, the life expectancy of the labouring poor is likely to be lower than that of the non-poor and this again restricts the scope of such an important social security measure. Thirdly, till recently the monthly pension as well as other benefits were meager (Rs.75 per month), constituting just around one-fifth of the amount required to cross poverty line per capita per month. However, this has now been corrected with the announcement of the Finance Minister in his budget speech of February 2006 that the monthly pension will be raised to Rs.200, broadly equivalent to half the expenditure to cross the poverty line.

8.10 In our proposal, we argue that the time has come to go beyond 'social assistance' by bringing in the need to provide a measure of social security to all unorganised/informal workers. Financing and its management will be a major aspect for consideration but that need not be considered as a financial burden to the public exchequer. It has to be recognised that enduring models of social security arrangements for the informal workers are also the methods for expanding the basis of development, incomes and generation of resources. There will of course be cases where certain categories of informal workers need government's financial assistance but that needs to be treated as part of a larger national initiative as the one proposed here.

8.11 Although a number of schemes and systems are in operation, the main problem in providing social security to the informal workers is one of limited coverage of both regions (States) as well as segments of workers within regions. Taken in isolation, these existing models cover large numbers of workers but as a proportion of the country's vast army of informal workers they cover only a small share (around 5 to 6 per cent as per the estimates shown in chapter 2). Broadly speaking there are four models functioning currently in the country:

- a) **The Welfare Fund Model** (partly or fully contributory for workers in the unorganised sector based on a tripartite arrangement under the direct supervision of the state);
- b) **The Social Assistance Model** (cash payment to defined beneficiaries (means-tested) through budgetary provision);
- c) **Social Security Scheme Model** (schemes designed and implemented by governments or their agencies for defined categories of workers in the unorganised sector); and
- d) **The Mutual Help Model** (mainly through the contribution of workers or the poorer sections for some social security through mutual assistance but promoted and mediated by NGOs).

8.12 The Commission has looked into the various models stated above and has suggested its own model wherein it has incorporated important features from these models. These features include management of the fund by a National Board as well as making the scheme contributory or non contributory depending on the economic status of the workers. In our model there is active participation of organisations of informal workers such as trade unions as well as those, working for them such as voluntary associations and NGOs, for proper and successful implementation of its scheme.

## Need for an inclusive social security system

8.13 A large section of workers who are able to secure employment in the organised (formal) sector of the economy have generally also been able to secure some protective social security for themselves and their families. However, we need to repeat that more than ninety one per cent of India's workforce are informal workers working either in the unorganised informal sector (85 per cent) or in the organised formal sector (6 per cent). A large majority of them face the problem of 'deficiency' or capability deprivation (of basic needs) as well as the problem of 'adversity' (arising out of such contingencies as sickness and accidents). As we have seen in the last section, the social security schemes that are in place hardly cover even five to six per cent of the estimated total informal workers numbering 362 million (as of 1999-00). Except a small number of States with some social security cover for workers in the unorganised sector, majority of States do not have any cover especially to address such core concerns as health and maternity.

8.14 Workers in the informal economy, despite their significant contribution to national income, are continuously open to various types of risks and frequently face crisis situations. It is not difficult to see why the poor are among the most vulnerable in any society. A shock that has a relatively small impact on the non-poor can be a cause for great concern for the poor, since even marginal downward fluctuations in income can push them to destitution levels. Our brief review, given in Chapters 4 and 5, of central and state government initiatives, to address the social security needs of the population showed that there are very few schemes addressed specifically to the unorganised workers *qua* workers. Kerala and Tamil Nadu are the only states with some reasonable coverage of both old age pension for the aged poor and other protective social security schemes for the workers in the unorganized sector. Some states like Maharashtra, Gujarat, West Bengal, Punjab and Haryana have a number of schemes for the aged poor and vulnerable population, but no social security schemes specifically meant for the unorganised sector workers. A number of states do not seem to have any protective social security cover for the unorganised sector workers.

8.15 Thus there is a crying need to provide a measure of protective social security to **all the unorganised workers** in all parts of the country subject to certain ceilings on income as specified subsequently in the report. The Commission therefore is of the view that the time has come to initiate a protective social security system that is inclusive of all workers in the informal economy. There would be several limitations, including that of identification and implementation, if the intended initiative is not an inclusive one.

## **Need for a Federal organisational set up**

8.16 In the view of the Commission since a national level scheme covering the vast majority of unorganised sector workers is being proposed with active involvement of the State Governments specially in its implementation, it is desirable to have a National Board at the Centre and State Boards at the State level. *Being a federal administrative set up with uneven levels of experience in implementing social security schemes for the informal workers , such an autonomous set up, in the view of the Commission, should take into account the need for a 'federal structure' with built-in incentives for innovative organisational and other initiatives.* The administration and implementation of the scheme would be the responsibility of State Boards, with the help of WFCs at the grass root level. The Centre should actively participate in that process through NSSB and support the implementation by the SSSB through financing for a National Social Security Fund.

## **Contributory or Non-contributory?**

8.17 In the formal/organized sector, social security systems are usually based on contributions from the workers as well as the employers with or without subsidy from the government. As we have mentioned earlier, the characteristics of the unorganized/informal sector is such that this model may not be a practical one. Given the low earnings of the workers in the informal economy, there is a strong case for providing social security to the informal workers without contributions from workers. Moreover, the absence of identifiable employers (as in the case of self-employed poor) in many cases or the difficulties in collection from a large number of employers of small establishments makes it unattractive to have a system based on contributions from the 'employers' either. Ultimately, the burden falls on the government.

8.18 The Commission however feels that it would be useful to have some contributions from the workers because it gives them a sense of ownership and develops a stake in the effective functioning of the social security system. Similarly, one may argue, as we do in this Report, that contributions from the employers need not be exactly on the same lines as that of employers in the organized sector. Undoubtedly, the services of workers in the informal economy are directly or indirectly used by employers of every kind. It is not an exaggeration to say that the corporate sector has been the single largest beneficiary of the cheap labour of informal workers.. It uses the services of a significant section of informal workers either directly or indirectly through various types of subcontracting arrangements. Large number of employers of tiny and small establishments in the unorganised sector (such as in small production units, repair and maintenance shops, retail trade, etc.) use the labour of the workers directly. Households use the services of street vendors (both stationary and mobile) to pick daily items of consumption. In addition, they also use the services of a large number of workers as domestic servants, gardeners, etc.

Thus a contribution from the employers through a levy of tax or cess is an indirect method of collection of contribution for a social security system

8.19 Ultimately it is the responsibility of the Government to find mechanisms of financing the scheme beyond the amounts which can be collected from the workers and the employers. The Government will need to supplement the additional amount from budgetary provisions. The Commission has estimated the possible cost of financing such a national scheme and the maximum liability of the Central and State government, when the entire unorganized workers would be covered, which would be around 0.48 percent of the GDP. The Commission believes that an expenditure upto this amount by the Government in introducing such a national scheme is fully justified.

8.20 The Commission has therefore taken the view that a contributory system of social security, including that of the government, be initiated for workers in the informal economy.

8.21 Given the fact that Labour is in the Concurrent List of the Indian Constitution, and that the state-level initiatives are quite uneven, the Commission is of the view that there should be a **national minimum social security** with the flexibility to the state government to add on or strengthen the national minimum in their respective states. The constituent elements of such a national minimum have been identified as (a) Health benefits, (b) Life Insurance, and (d) Old age security in the form of an old age pension to poor workers belonging to BPL households, and a Provident Fund to other workers which can be combined with a scheme of unemployment relief. These are discussed below.

### **Health Security**

8.22 One of the major insecurities of workers is frequent incidences of illness and need for medical care and hospitalisation of the workers and other family members. The vulnerability of the poor informal workers increases when they have to pay fully for their medical care with no social support. There is a double loss of income due to inability to work and pay for the cost of treatment. There is also the societal loss of income in terms of output as well as inability to enhance productivity due to ill health.

8.23 Despite the expansion in the physical provisioning of health facilities, illness remains one of the most prevalent causes of human deprivations in India. India's failure to provide adequate health security to its population in general and the working poor in particular should be counted as one of the major failures in its quest for a balanced social and economic development. There is a pressing need for expansion of health Infrastructure throughout the country. The health insurance cover sought to be provided under our scheme shall supplement the efforts of the National Rural Health Mission to provide the necessary health infrastructure and shall act as an incentive for strengthening the same.

## **Maternity**

8.24 Death of the mother during or immediately after childbirth is mainly due to lack of proper medical attention. Among poor women with the additional burden of informal economic activity, where the conditions of work are strenuous, the chances of maternal mortality would be high particularly if proper health facilities are not obtained. Therefore, a crying need for women in the informal sector is maternity benefits. The Commission is aware that Ministry of Health and Family Welfare operates a maternity benefit scheme called Janani Suraksha Yojana (JSY) in which cash benefits of upto Rs 1300 in rural areas and Rs 800 in urban areas to women in BPL households for antenatal care and institutional deliveries are provided. This scheme could be over and above the scheme proposed by the Commission.

## **Life Insurance covering accidental and/or natural death**

8.25 The stress or shock created by the death of a breadwinner for informal workers' households with minimal resources is tremendous. Some cover for the contingency of natural or accident death should also form part of social security measure for the workers. Our scheme provides for a Life Insurance of Rs 15000 per beneficiary covering both the natural and accidental death.

## **Old Age Security**

8.26 Worry about old age has been a major concern of the informal workers. The protection afforded to the aged by their families should not be exaggerated, or used as an excuse not to provide old age security, for a variety of reasons, two out of which need to be emphasised. First, adults in poor households themselves face insecurity of work and income to lead a life of security and some dignity. Second, the presence of the poor aged adds to their burden and further deprivation of his family as a whole. Therefore some provision for social protection of the aged poor should be part of any national social security initiative so that it will enable the aged to contribute a part, however modest, to the household income and enhance the value of their presence and strengthen the family bond.

8.27 The Commission has proposed old age security as one of the elements of National Minimum Social Security. The Commission recommends non-contributory old age pension of Rs 200/- per month to all BPL unorganised workers. As regards non BPL workers the Commission recommends a scheme of contributory Provident Fund wherein at the age of 60, the worker has the option to withdraw the accumulated amount in his credit or purchase an annuity for life with the accumulated amount. An added feature for the non BPL workers is that the amount the scheme of Provident Fund is coupled with Unemployment relief by permitting the worker to withdraw a half or quarter of his contribution

depending on the period of unemployment, subject to a lock in period of 10 years.

8.28 The Commission has therefore recommended that the above-mentioned three elements form a National Minimum Social Security Scheme and be implemented with the backing of a national legislation. To this end, the Commission drafted a bill titled The Unorganised Sector Workers' Social Security (Draft) Bill, 2005 and submitted it to the Government of India. The Draft Bill was also sent to the state governments, trade unions and other stakeholders and placed in the public domain ([www.nceuis.nic.in](http://www.nceuis.nic.in)) for wider discussions (see Appendices for responses). After further consideration of the comments and suggestions received the Commission has reformulated the Bill as The Unorganised Workers' Social Security (Draft) Bill, 2006. The revised draft bill is given in Part II of the Report.

### **Salient features of the revised Draft Bill 2006**

8.29 In response to the need to introduce legislation in the parliament and as explained in Chapter 2, the Commission proposes a draft bill titled 'The Unorganised Workers' Social Security Bill, 2006' to the Central Government for its consideration and disseminated the same for wider public discussion. The salient features of the revised draft bill are discussed below.

### **Coverage**

8.30 As per the computations undertaken by the Commission by using NSS 55<sup>th</sup> Round Survey data on Employment- unemployment in Chapter 2, there were 340.3 millions workers in the Unorganised Sector. However, amongst these workers, about 4.02 millions workers were in receipt of social security benefits from their employers and therefore are considered as **formal workers**. At the same time, there were about 25.8 million workers in the organized sector who were either casual or unpaid family workers or not eligible for any social security benefits. These workers are thus considered as **informal workers**. The informal workers to be covered for the social security measures thus totals to 362 million. However, we exclude 85.58 million unpaid family workers and 20% of farmers who are not either marginal or small farmers totalling about 13.6 million, to arrive at the number of workers eligible for social security as 263 million in 1999-2000. Assuming an increase of 1.9% per annum as an upper bound, estimated workers in the year 2005-06 comes to 294 million rounded to 300 million. The details are given in the following table

**Table 8.1: Estimation of the total number of eligible workers**

Category	(Crore)
1. Total workers in the unorganised sector (1999-00)	34.0
2. less workers in the unorganised sector having social security	4.0
3. Workers in the organized sector having no social security	2.6
4. Total Unorganised/Informal workers (1)+(3)-(2)	36.2
5. Less: Contributing (unpaid) family workers	8.6
7. Less: Farmers other than Marginal and Small	1.4
8. Total workers eligible for social security: (4)-(5)-(6)	26.3
9. Estimated workers in for 2005-06	29.4
7. Rounded to	<b>30.0</b>

8.31 The Bill will cover all workers in the informal employment as defined in earlier chapter less contributing family workers and farmers other than small and marginal, having income less than Rs 6500/- per month. This will include self-employed workers (including small and marginal farmers), wageworkers and home based workers. In addition, informal workers in the organized sector without any social security cover (such as Badli workers and casual workers) will also be covered. The Income limit prescribed is that suggested by the Fortieth session of Indian Labour Conference. The Commission estimates that the incomes limit will suffice to cover about 90 per cent of the poorer informal sector workers, who do not have enough means to secure security for themselves. Thus the figure of 30 crore informal workers, used in the Commission's estimates represents an upper bound. It may also be noted that the income criterion may not be practically enforceable in a number of cases, and self-selection may be the main basis for inclusion/exclusion of workers in the Scheme.

### **Contribution**

8.32 The registered workers, employers and the Government will pay Re 1/- each, per day, per worker as contribution to the proposed National Social Security Scheme. This works out to Rs. 365/- each, per annum, per worker contributed by the three parties, amounting to a total of Rs. 1,095/- per worker. **It may be clarified that Rs.1,095 has to be suitably indexed to take care of inflation.**

8.33 The contribution of workers @ Re.1 per day per worker would be fixed. However, the State Boards may help to secure correspondingly higher benefits to those workers who would like to pay a higher contribution through additional schemes.

## **National Minimum Social Security Benefits**

8.34 Any worker registered with the National Social Security Scheme for the unorganised workers on payment of prescribed contribution shall be entitled to National Minimum Social Security benefits. These include:

- (i) Health benefits in the form of health insurance for self, spouse and children below the age of 18 years, sickness allowance, and Maternity benefits for women workers or spouse of men workers;
- (ii) Life Insurance to cover natural and accidental death.
- (iii) Old age security in the form of Old Age Pension for BPL workers above the age of 60 years, and Provident Fund cum unemployment insurance benefit to all other workers.

## **Organisational Structure**

8.35 The Commission considered two alternatives, while suggesting the organisational structure. The first one is based on the fact that social security is a subject in the Concurrent List of the Constitution and that both Central and State Governments have therefore the power to legislate on it. Besides, it was felt that a federated structure is more desirable in a country like India with the Centre taking upon the responsibility of overall direction and supervision while the State Governments act as the key implementing agencies. This is also intended to take care of State-specific situations in matters relating to administration. While the State level agency will have the key implementing role, local level organisations will be required to take care of registration, issue of identity cards, redressal of grievances and related functions. While designing such a federated organisational structure, the Commission has also recommended that both the national and state level bodies be of a representative character involving the stakeholders.

8.36 The second alternative could be in the form of setting up a corporate authority at the Central level with defined responsibilities to implement the National Social Security Scheme. In such a model, the corporate authority will have the freedom to design its regional and local level bodies for implementation of the programme.

8.37 The details of the first model recommended by the Commission are given in the chart. The Commission prefers the first model as there is proper decentralisation of work to the lower levels and is participatory in nature. The Commission views that the State Government should be actively involved in the implementation of the scheme which is provided in our model. The Commission also feels that there is no need to create a huge national bureaucracy separately

and the existing network of infrastructure should be used for delivery mechanisms, which is provided in our model.

8.38 At the national level, a National Social Security Board has been proposed. It will be mainly responsible for channelling the contribution of the Central Government to various schemes and to State Boards, policy formulation, supervision, and monitoring of the implementation of the National Social Security Scheme. NSSB would manage and administer the National Social Security Fund and work together with the State Social Security Boards to negotiate with the service providers and to provide Central Government assistance *pari passu* with the State Government and workers' contribution.

8.39 The main responsibility for implementation will be with the State Social Security Boards. They will have to decide on the appropriate organizational structure below the State level. Given the spread of the unorganised workers and the absence of visible employers in many cases, the local level organisation for registration, collection of contribution and assistance in delivery of benefits becomes crucial.

**National Social Security Board**

General Council and Executive Council

[Main functions: Managing the National Social Security Fund, Distribution of grants and technical assistance to State Boards, Monitoring and Supervision, advice the Central Government on policies]

**Secretariat of NSSB to be headed by a  
Full-time Chief Executive**

**State Boards**

**(Main implementing body at the state level)**

[Main functions: Managing the State Fund, Distribution of grants and provision of technical assistance to Welfare Boards and other members, and independent Workers Facilitation Centres, Monitoring and Supervision of members and independent WFCs. The State Boards may set up, wherever necessary district-level offices.]

**Secretariat to be headed by a  
Full-time Chief Executive**

**Workers Facilitation Centres**

The WFCs will be located in the Gram/Block Panchayats (rural areas) and Nagar palikas (in urban areas) and will report to the State Board or as directed by the State Board.

8.40 It will be the responsibility of the State Boards to see that the selected Workers' Facilitation Centres satisfy the conditions of past experience and credibility. The State Boards may frame such criteria as warranted by the local context. It may also decide on the financial and technical assistance to be extended to the Workers' Facilitation Centres.

8.41 A State Social Security Board will consist of member-organisations such as Workers Welfare Boards, Departments/agencies of government acting as employers of unorganised sector workers (e.g. *anganwadi* workers) and workers organisations and non-governmental organisations providing social security to workers in the unorganised sector. The Bill has proposed the formation of Workers Facilitation Centres as was done by the NAC draft. However in our model they would be appointed by the State Boards making them as far representative as possible. Two preconditions for designation of an organisation as Workers' Facilitation Centre are as under:

- (i) Past experience and capability to handle the work, and
- (ii) Credibility among the unorganized/ informal workers.

8.42 The State Board may entrust the responsibility to the member organizations designated as Workers Facilitation Centres, as provided for in the Bill for assistance in registration, collection of contributions and delivery of benefits. The territorial coverage of such Centres (e.g. Village Panchayat, Municipal Ward) should be clearly specified. Wherever suitable organisations for designation as WFCs do not exist, Workers Facilitation Centres may be created within Gram Panchayats in rural areas and Nagar Palikas in urban areas under the responsibility of a designated official. These Workers' Facilitation Centres within the local self-government bodies will report directly to the State Social Security Board.

### **District Committee**

8.43 A district-level committee shall be constituted as the registering authority for the National Social Security Scheme. The District Committee will have the District Collector/Magistrate as the Chairman and the District Labour Officer as its Convenor and Nodal Officer.

8.44 The District Committee will be the authority for issue of the Unique Identification Social Security Number (UISSN) and the Identity Card for the registered unorganised workers/families.

8.45 In order to coordinate, supervise and monitor the functioning of Workers Facilitation Centres and service the functioning of the District Committee, the State Boards may create, if necessary, district-level offices. State Governments may consider restructuring the existing offices such as the Employment

Exchanges and entrust them the work relating to this scheme instead of creating new offices.

### **Existing Social Security Schemes**

8.46 The Draft Bill explicitly states that the proposals contained in it are not intended to replace the social security benefits that are in place in some States as well as some occupations through Central Government schemes. The main objective of the Draft Bill is to provide **a national minimum social security** to the unorganised workers. If the benefits under the national minimum coincide with similar benefits under existing schemes, the State Governments may merge them, if they so desire, and retain others as 'add-ons' provided by them. Under the Draft Bill the State Governments will receive a substantial share of the government contribution from the Government of India. This could act as an incentive to State Governments to increase the size of the benefits or add new benefits. In fact, a number of State Governments have, in addition to old age and life insurance, such social security benefits as assistance for education of children, funeral expenses and so on.

### **Resolution of Disputes**

8.47 There shall be Dispute Resolution Councils for resolution of disputes relating to the non observance of provisions of this Act, arising amongst the unorganised workers, employers, Workers' Facilitation Centres and State Boards in each state, which shall be constituted in the manner prescribed by the State Government. The Dispute Resolution Council should preferably be situated within the District Committee.

## Implementation and Financial Requirements

9.0 The National Social Security Scheme proposed by the Commission is based on defined contributions. These contributions are meant to be utilised as premia for insurance to cover (a) sickness, (b) life insurance, and (c) old age security. As per the defined contribution, of Rs.3 per worker per day (contributed equally by the worker, employer and the Government), a sum of Rs.1,095 will be available per worker per year. This may be split into three premiums; sickness & maternity, life insurance and old age security. In the scheme of things suggested by the Commission, it will be the responsibility of the State Social Security Boards to negotiate with the concerned insurance agencies, with the help of the National Social Security Board, and decide on how best to apportion the contribution and secure the best possible deal. The Commission has suggested a division consisting of Rs.380 for sickness and maternity cover and Rs.150 for life insurance and Rs.565 for old age security. These figures were arrived at in consultation with insurance agencies.

### Health and Maternity Insurance cover

9.1 The Commission suggests an annual premium of Rs.380 per worker based on preliminary discussions with public sector insurance agencies. A single policy is expected to cover a typical family of five members. The minimum benefits presently stipulated are:

- a) Hospitalisation cover up to Rs.15 thousand;
- b) Maternity benefit of Rs.1,000 (maximum) per delivery;
- c) Personal accident cover in the event of death of earning head of family (Rs.25,000); and
- d) Sickness cover for the registered worker during hospitalization (Rs.50 per day for a period of 15 days).

9.2 The details of the scheme proposed by the Commission are given in Table 9.1. The National Board and the State Boards may negotiate with the insurance agencies to ensure the above-mentioned minimum health and maternity benefits. As of now, there are four general insurance agencies in the public sector with different health insurance policies.

**Table 9.1: Premium Chart for a comprehensive Health insurance scheme for unorganised workers**

	Item	Benefits
1	Reimbursement of Hospitalization Expenses For an <b>average family</b> of five on <b>floater basis</b> . (subject to standard terms and conditions of Group Medi-claim Policy)	Rs.15,000/- (Rs 10000 for any one illness)
2.	Maternity benefit (women worker or wife of male worker) per family per policy period. Actual or as per maximum limit of Rs.1,000/-	Rs.1,000/-
3.	Personal Accident cover for Earning Head of family – <b>Death</b> benefit only (Subject to standard terms )	Rs.25,000/-
4.	Sickness cover for Earning Head of Family (during hospitalization) for 15 days (excess of 3 days) during policy period	Rs.50/- per day
	<b>Net premium per family on floater basis (excluding Service Tax)</b>	Rs.380/-

*Note:* (1) Age Group: 3 months to 60 years; (2) Family means earning head, spouse and up to maximum three dependent children; (3) Floater basis: The hospitalization benefit can be availed of individually or collectively by members of the family; (4) Hospital: All designated hospitals where facility for treatment as in-patient is available; (5) Claim settlement: Through Third Party Administrator (TPA) or directly by insurance agency.

9.3 The Commission is aware that a scheme for maternity benefit is being provided by the Ministry of Health and Family Welfare for BPL households. Since the Commission proposed to cover all unorganised workers this may be over and above the existing scheme.

9.4 Since the proposed National Security Scheme has a separate provision for life insurance, the State Boards may negotiate with the insurance agencies for coverage of other risks such as accidents leading to personal disability.

9.5 The registered worker will be eligible for the benefits as prescribed in the health insurance policy of the agencies with whom the State Boards have entered into an agreement. Although the experience of the general insurance agencies with regard to health insurance services is rather limited, the Commission's discussions revealed that they may be willing to consider a fixed policy (as opposed to annual policy) for a longer period say, five years provided the claim-to-premium ratio does not exceed a certain maximum, say 70 per cent

in a year. In case the claim is less than this ratio, the insurance agencies are willing to offer a lump sum discount to the concerned State Boards. Alternatively, however, if the claim ratio exceeds this ceiling, the insurance agencies will have to be compensated by the State Boards.

9.6 For a maximum of 70 per cent claim-to-premium ratio, assuming that each illness requiring hospitalisation leads to a claim of the maximum allowable (Rs.10,000 per illness), the percentage of policy-holders requiring hospitalisation and receiving compensation up to the limit of risk cover, works out to 2.67 per cent. This is considerably higher than the current hospitalisation rate in India (1999-00) estimated at 1.67 per cent of (based on the NSSO) the population. Moreover the hospitalisation rate was only 0.95 per cent for the poorest quintile, rising to 2.01 for the second richest and 3.45 per cent for the richest quintile only. The Commission therefore views it as unlikely that improved risk cover would lead to the maximum stipulated claims to premium ratio being exceeded. Accordingly, the insurance agencies may be persuaded to provide a cover for at least 5 years, without much loss to the State Board.

9.7 The normal health cover under the scheme shall be up to the age 60 years. However, the State Boards should negotiate the scheme with the insurance agencies in a manner that would allow the worker to avail the health cover for self/or spouse even beyond 60 years on payment of reasonable amount of contribution.

9.8 The State Boards should also negotiate in a beneficial manner for the workers where both the husband and wife are workers and choose to register in the social security scheme. In such case, it is reasonable to expect the insurance agencies shall enhance the benefits *pari passu*.

9.9 The registered workers shall avail of the services prescribed from the public health care system (public health centres, community health centres and general hospitals) and designated non-government health care institutions (private, cooperative and charitable hospitals), as decided by the State Boards. However, for the risk envisaged in Table 9.1, this would require health care facility with a minimum number of beds (the current norm or the norms stipulated by the insurance agencies being 15). The State Governments shall ensure adequate health infrastructure to meet the additional demand if any, in consultation and coordination with the Ministry of Health, Government of India. The National Rural Health Mission is expected to strengthen the health infrastructure in the rural areas. However, the Commission recognises that designated facilities may not exist within a reasonable distance (say 20 km) in some areas. In such cases, 5 per cent of the hospitalisation charges may be chargeable for transportation purposes for reimbursement to the workers/family.

9.10 The social security identity cards issued to the worker/family shall allow him/her to avail of the prescribed facilities on the basis of either a cashless

system or reimbursement of expenses. The Commission is of the opinion that a cashless system is the more appropriate one for the informal workers. For such a system to function effectively, it is desirable that whenever rates are chargeable, the National Board/State Boards and the Insurance Agencies may agree on a schedule of rates so that the possibility of moral hazard on the part of the hospitals could be reduced. The insurance agencies already have the experience of working with a cashless system.

9.11 The Commission has recommended the insurance route for covering the health care requirements of the workers not as a substitute to the existing services provided by the public health care institutions. In fact, by providing risk cover for hospitalisation, we expect the insurance system to work as an incentive to the designated public health care institutions to strengthen their infrastructure and provide the needed services if they are allowed the chargeable element of the cost of treatment of the registered workers. This may require certain reforms at the State level and the State Boards are expected to ensure this under the scheme.

### **Life Insurance**

9.12 The suggested annual premium for life insurance is Rs. 150 per worker per annum. This is expected to provide a benefit of at least Rs.15,000. The benefit could be negotiated with insurance agencies.

9.13 Given the fact that the Department of Posts (DoP) has considerable experience in marketing and servicing Postal Life Insurance schemes at costs that are lower than insurance agencies, it should be possible to secure a better deal for the unorganised workers with defined contributions through the Department. Moreover, the Department of Posts has a network of infrastructure in the form of Post Offices that number more than 150 thousand connecting all localities in rural and urban areas in the country. This should strengthen the delivery of services in every nook and corner of the country. The Commission's discussions with the Department of Posts have revealed that it has considerable experience in providing insurance service. In fact, the Postal Life Insurance (PLI) was started more than 120 years ago (in 1884) which is now available for persons in government and other public sector employment. This indeed is a restriction imposed by the Central Government and the Commission is of the view that there is no sound argument for continuing the same. However, the DoP was permitted to introduce a Rural Postal Life Insurance (RPLI) scheme in 1995 offering five different insurance schemes. The aggregate number of active insurance policies serviced by the Department of Posts (as on 31.3.2004) is 4.87 million that includes 2.67 million RPLI policies. The aggregate sum assured is Rs.28,203 crore.

9.14 Apart from the wide network of offices, the postal insurance schemes are more effective than similar schemes offered by insurance agencies. Moreover,

the bonus declared is also reported to be higher since the Department of Posts does not book profit from this business. The Commission therefore recommends that the Department of Posts or any other insurance provider giving similar benefits as the NSSB deem fit could be entrusted with the business of providing life insurance under the proposed National Social Security Scheme for unorganised workers.

9.15 In order to enable the Department of Posts to come out with a suitable scheme, the Commission recommends that the department be allowed to design a new insurance product, if necessary, in the form of a group insurance scheme. Elsewhere in this chapter we have dealt with the collection of contributions (for various schemes) and its book keeping by the Department of Posts (see Paras 9.46 to 9.49).

### **Old age security**

9.16 Two types of old age security are suggested here. These are:

(a) Provident Fund to all APL workers (who are required to contribute to the national social security scheme), with unemployment insurance where necessary and

(b) Monthly old age pension to all poor (BPL) old aged (60+) workers,

### **Provident Fund for contributing workers**

9.17 As observed in para 9.0, a premium of Rs 565 is available per worker per year for old age security, either in the form of pension or contribution towards Provident Fund. The Commission has considered both these options for all workers and has recommended a Provident Fund for all registered workers above the poverty line and a pension for all old aged (60+) workers in BPL households.

9.18 The calculations of the Commission show that even if one were to consider pensions at 2400 per year (i.e. Rs.200 per month) to contributing workers, this would depend upon the age of entry of workers into the scheme. The Commission's discussions with the Life Insurance Corporation suggest that the return on investment could be between 5.5 to 6 per cent per annum, which is a conservative estimate. This is mainly due to the restrictions on the type of investment as per the Insurance Regulatory and Development Authority (IRDA). This will fall short of Rs.200 for those workers entering scheme at around age 39 and above; while less conservative estimates (assuming a return of 10 per cent) show that this age will be around 43. *This would mean that those workers above the age of around 40 years would not be in a position to secure a minimum pension of Rs.200 per month.*

9.19 Taking the above into account, the Commission recommends the institution of a Provident Fund for the contributing informal workers who are above the poverty line (estimated at 77 per cent). This will ensure that all those who contribute will get a terminal benefit on completion of 60 years of age.

9.20 The Commission further recommends that the workers be given an option, on attaining 60 years of age, to either take the accumulated corpus in their PF or purchase an annuity. This will give an option to those who are desirous of having an old age pension.

9.21 In addition, the Commission also recommends that the PF may also be designed as an **Unemployment Insurance** by permitting the workers to withdraw up to half of his contribution depending on the period of unemployment. However, a minimum lock-in period of ten years is recommended.

9.22 Discussions with the Unit Trust of India revealed that a PF scheme can be managed by a mutual fund organization. However, the mutual fund organization will not be in a position to guarantee a minimum return as per the regulations of the Securities and Exchange Board of India. However, the experience of the last several years suggests that the annual return has been well above ten per cent. The expected benefits of a PF assuming an annual average return of ten per cent at different age at entry have been worked out in Table 9.2.

9.23 The Commission therefore recommends a minimum guaranteed return of ten per cent to the workers under the proposed PF. This is to ensure that the informal workers, who are much poorer than the workers in the organised sector, get a return higher than the Employees Provident Fund. If the proposed PF experiences a short-fall, it will have to be covered by the State Boards. To make this operational, the mutual funds should transfer the excess realisation of promised 10 per cent to State Boards. If the accumulated sum on that account falls short of the outgo on account of a minimum 10 per cent return to the employees in any year, the National Social security Fund (NSSF) will provide for the difference. The State Boards may declare bonus for the workers every five years if there is a balance left on this account.

**Table 9.2: Provident Fund accumulation for a worker at different age of entry with an annual premium of Rs. 565 assuming a yield of 10 per cent per annum**

## **Old age pension for poor (BPL) workers**

9.24 For poor workers, it is desirable that they are entitled to a minimum level of protection regardless of the year of inception of the scheme and number of years of their contribution. In the case of BPL workers, the Commission has through out taken the view that their contribution towards the premia shall be payable by government. The Commission has suggested a premium of Rs.565 per worker per annum towards old age security of the informal workers. However, as noted in Para 9.18, with this premium, the pension available to the old-aged worker would depend on the age of entry and the corresponding years of contribution and no minimum old age protection can be guaranteed.

9.25 The Commission has carefully considered the various options through which a minimum level of protection may be available to all old aged poor workers. It has noted that the Government of India already funds the National Old Aged Pension Scheme, under which destitute old-aged persons, above the age of 65 years are being provided a monthly pension of Rs. 200 per month. The Central allocation for the Scheme has been enhanced to Rs 1430 crores in the 2006-07 budget, and the Finance Minister has considered it desirable that States use additional resources to enhance the monthly pension to Rs. 400 per month.

9.26 The Commission has analysed the implications of extending the National Old Aged Pension Scheme to all old aged poor workers above 60 years of age. In order to arrive at the estimates of the numbers of old aged BPL workers for the years 2006-07 to 2010-11, the following assumptions have been used. The share of the aged (60+) in the total population is assumed to remain constant in the next few years at 7.47 percent as per 2001 Census. The ratio for the BPL informal worker population has been taken to be 0.23, based on the poverty ratio among informal worker households in 1999-00, and the average Workforce Participation Ratios is taken to be the same as that for the prime age (35-55 years) general population in 1999-00 (700 per thousand persons). These are admittedly somewhat crude estimates since both the longevity among the poor workers and the Work Force Participation rates are likely to be different from the general population. The estimates of the old aged poor workers so derived are given in Table 9.3. The Table also estimates the total financial cost of providing these workers a monthly pension of Rs. 200 per month.

9.27 The calculations of the Commission presented in Table 9.3 show that if one were to grant pension at the rate of Rs 200 per month to all BPL (unorganised) workers aged 60 and above it would cost the Government Rs 3,244 crore in 2006-07 increasing to Rs 3434 crore in 2010-11.

**Table 9.3 Number of Eligible BPL old aged workers (60+) and Costs of Pension (@ 200 pm)  
(Rs in Crore)**

	2006-07	2007-08	2008-09	2009-10	2010-11
<b>Estimated Number of old aged workers (60+) (crore)</b>	1.35	1.37	1.39	1.41	1.43
<b>Pension @2400/year/BPL 60+workers</b>	<b>3244</b>	<b>3292</b>	<b>3340</b>	<b>3387</b>	<b>3434</b>
<b>Centre</b>	<b>3244</b>	<b>3292</b>	<b>3340</b>	<b>3387</b>	<b>3434</b>
<b>State</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>0</b>

Note: The BPL worker does not pay anything but his contribution is paid by the centre taking its share to 5/6<sup>th</sup> of Rs 565 while the remaining of the total premium of Rs 565 comes from the state.

9.28 The Commission recommends payment of a minimum pension of Rs.200 to all the poor (BPL) aged informal workers on completion of 60 years of age. This can be done by expanding the NOAPS, which at present is confined only to those above 65 years and are identified as destitute. The proposed pension amount roughly works to one-half the amount required (on a per capita per month basis) to cross the poverty line at 2005 prices. However, the amount of pension in excess of Rs 200 per month may be topped up if the state governments so desire.

9.29 In recommending a pension for all old aged poor workers, the Commission notes that there is an overlap as many of the workers so identified may be destitutes and eligible for old-age pension under the existing NOAPS. Moreover, the prime age work force participation rates (WPR) also represent an upper boundary as the WPR is lower in other working ages. Hence the Commission's estimates represent the upper bound as far as costs to provide pension to the BPL workers is concerned. The Commission, however, believes that pension cover should extend to all aged poor and not just be limited to informal workers. This is not only morally justified but also more efficacious for implementation reasons.

### **Financial Requirements for Social Security of Informal Workers**

9.30 **Health and Insurance.** As has already been described, Rs. 530 per worker per year is earmarked for provisioning of Health and Life cover for all workers although the contribution on behalf of the BPL workers is paid by the Central and State Governments. The financial implications for the Central and State Governments as well as total expenditure for providing Health and Insurance for all to the workers are presented in Table 9.4.

**Table 9.4: Financial implications of Health and Life Insurance for all (Rs Crore)**

	2006-07	2007-08	2008-09	2009-10	2010-11
<b>Total number of workers</b>	<b>6</b>	<b>12</b>	<b>18</b>	<b>24</b>	<b>30</b>
<b>BPL workers</b>	1.38	2.76	4.14	5.52	6.9
<b>APL workers</b>	4.62	9.24	13.86	18.48	23.1
<b>Expenditure on health and life insurance for All @530 per worker per year</b>	3180	6360	9540	12720	15900
<b>of which:</b>					
<b>1) APL workers Contribution</b>	816	1632	2449	3265	4081
<b>2) Governments Contribution</b>	2362	4725	7087	9449	11811
<b>Centres share</b>	1834	3668	5501	7335	9169
<b>States</b>	528	1057	1585	2114	2642
<b>Of which</b>					
<b>For BPL Workers</b>					
<b>Centre</b>	610	1219	1829	2438	3048
<b>States</b>	122	244	366	488	610
<b>For APL Workers</b>					
<b>Centre</b>	1224	2449	3673	4897	6122
<b>States</b>	407	813	1220	1626	2033

Note: The APL workers pay one-third of Rs 530 as his contribution while the remaining is shared between the Governments (centre and state) in the ratio of 75:25. The BPL worker does not pay anything but his contribution is paid by the centre taking its share to five-sixth of Rs 530 while the remaining of the total premium of Rs 530 comes from the state.

9.31 **Old-age Security.** As per the Commission's recommendations, the workers belonging to Above Poverty Line households would participate in the Provident Fund cum unemployment insurance scheme while BPL workers would be provided a pension of Rs. 200 p.m. through an extended National Old Age Pension Scheme (NOAPS).

9.32 For APL workers, the premium earmarked for old age pension (i.e. Rs.565 per worker per annum) is to be used for the Provident Fund. The lump sum that can be given to the worker on attaining age 60 will depend on the yield and the age at entry. Assuming that all APL workers (assuming an APL ratio of 77 per cent) among the 30 crore workers join the scheme in a span of five years (at the rate of 20 per cent per year), then the total accumulation of the PF scheme would range between Rs. 2,610 crore in 2006-07 to Rs 13,052 crore in 2010-11. Of this the share of the Central Government would range between Rs.1,306 crore to Rs. 6,532 crore for the two years respectively. The APL workers contribute Rs 870 crore in 2006 while in 2010-11 it goes up to Rs 4351 crore. Table 9.5 presents the implications of PF for APL workers.

9.33 For BPL workers, the estimate of workers likely to be eligible for pension, and the total financial cost (to be borne by the Centre) has already been

discussed in Para 9.27 and in Table 9.3. The relevant figures are reproduced in Table 9.5.

9.34 Thus, of the total projected financial requirement for Old Age Security of all workers in Year 1, Rs 870 crores will be borne by contributions from (APL) workers, Rs 4,550 crores by the Central Government, and Rs 435 crores by the State government. In year 5 (2010-11), the total financial requirement will rise to Rs. 16,486 crores, of which will Rs 4,351 crore will be borne by contributions from (APL) workers, Rs 9,966 crores by the Central Government, and Rs 2,177 crores by the State government.

**Table 9.5: Financial implications of Old-age Security (Rs in Crore)**

	2006-07	2007-08	2008-09	2009-10	2010-11

**9.36 Total Financial Contributions:** The total financial contributions from the workers, State and Central governments (inclusive of contribution by employers), as estimated by the Commission, are presented in the Table 9.7 given below.

**9.37 (i) Total contribution:** The rate of contribution to the social security scheme has been proposed as one rupee each per day (or Rs. 365/- per year) for worker, employer and government respectively. This works out to Rs.1,095/- per worker per year. The total ranged from Rs 6570 crore in 2006-07 to Rs 32850 crore in 2010-11, on the assumption that phasing (registration) of workers of 30 crore workers will be at the rate of 20 per cent per year and achieve 100 per cent in five years. Since, however, the Commission has recommended an old age monthly pension of Rs 200 per month to all poor (BPL) workers above the age of 60 years, then the old age security contribution (Rs 565/worker/year) from both the centre and state governments on account of BPL workers would get substituted by the expenditure of the Centre towards the pension of old aged BPL workers. The total contributory element would therefore be Rs 5,790 crore in 2006-07 and would increase to Rs 28,952 crore in 2010-11 while the total envisaged expenditure would be Rs 9,034 crore in 2006-07 increasing to Rs 32,385 Crore in 2010-11.

**9.38 (ii) Workers' contribution:** The total workers contribution at the rate of Re. 1/- per day, per worker would have amounted to Rs.10,950 crores in the year 2010-11. However, under the proposal, the BPL workers do not contribute any amount, while the APL worker contribute at the rate of Rs 365 per year which amounts to total of Rs 1686 crore in 2006-07 and increases to Rs 8432 crore in 2010-11.

9.39 **(iii) Employers' contribution:** The employers' contribution will be limited to cases where they can be clearly identified. This works out to just 17 percent of the workers, the remaining workers are either agricultural labourers or self-employed in non-agriculture or workers without a specific employment status. The net contribution from the employers of 17 per cent of the workers is estimated at Rs. 1,862 crore. Given the large number of small-scale employers, the cost of collection of employer-contribution for 17 per cent of workers might prove to be prohibitive. In such a case, the practical way out for the Government is to pay the entire contribution of employers and recoup them through appropriate fiscal measures such as a social security tax. As such we have charged this contribution under the government i.e the centre and state in the ratio 3:1.

9.40 **(iv) Governments' contribution:** The Central Government would bear the contribution of all BPL workers who are assumed to be 23 per cent of the total workers towards life and health insurance. In addition, the contribution of the government will be divided between the Central Government and the State Government in the ratio of 3:1 (75 paise and 25 paise per day per worker), respectively and the employers' share for 100 percent of workers will also have to be paid by the Central and State Governments in the ratio of 3:1. The Central Government shall also provide a pension to old aged (60+) BPL workers.

**Table 9.7: Distribution of total contribution (Rs in Crore)**

Contribution by	2006-07	2007-08	2008-09	2009-10	2010-11
1) APL workers	1686	3373	5059	6745	8432
2) Centre	3140	6280	9420	12560	15701
3) States	964	1928	2892	3856	4819
4) Total Contribution ( 1+2+3)	5790	11581	17371	23161	28952
5) Expenditure by centre towards pension to old aged BPL workers	3244	3292	3340	3387	3434
6) Total Outlay of Scheme (4+5)	9034	14873	20711	26548	32385

#### **Phasing of the Coverage and Expenditure:**

9.41 The scheme envisages the coverage of 30 crore unorganised workers fully. However, considering the large number of workers, it is expected to cover them in a phased manner over a period of 5 years. It is expected that there would be an annual coverage of 6 crore workers. The coverage of the old BPL workers (60+) workers for pension is additional to these numbers. Thus the financial implications in the first five years would be as shown in Table 9.8.

**Table 9.8: Phasing of the Coverage and Expenditure of Centre and States  
(Rs. In Crore)**

Year	Number of Workers (Crore)			Central Government Expenditure Towards		State Government Contributions	Administrative Expenses	Costs as percentage of GDP mp	
	APL	BPL	BPL old Aged	Contributory Schemes	Pension of old BPL workers			Centre + Admin exp	Centre and states + admin exp
	1	2	3	4	5	6	7	8	9
2006-07	4.62	1.38	1.35	3140	3244	964	290	0.17	0.20
2007-08	9.24	2.76	1.37	6280	3292	1928	579	0.24	0.29
2008-09	13.86	4.14	1.39	9420	3340	2892	869	0.30	0.36
2009-10	18.48	5.52	1.41	12560	3387	3856	1158	0.35	0.43
2010-11	23.10	6.90	1.43	15701	3434	4819	1448	0.39	0.48

Note: i) Figures indicate the financial expenses as a percentage of GDP including administrative costs @ five percent of the contribution expected in each year. ii) GDP at market prices is expected to grow at 8 per cent p.a in the next five years while the direct taxes at 20 per cent and indirect taxes at 8 per cent.

iii) Administrative expenses col. (7) are calculated at 5 percent of total contribution as of central government (col 4), state (col 6) and of APL workers.

9.42 As pointed out in Para 9.29, the financial estimates presented here represent an upper bound and are based on figures of the total number of informal workers. In actual fact, the Commission's proposed income ceiling of Rs.6,500/- per month would make roughly 90 per cent of informal workers eligible for the scheme lowering actual cost below the estimated ceiling. If the employers did contribute on behalf on 17 percent workers as mentioned in Para 9.39, the contribution of the central and state government would reduce by as much as Rs 1862 crore in the year 2010-11.

### **Administrative expenses**

9.43 The Draft Bill has suggested up to five percent of the total contribution as administrative expenses. This works out to Rs.1,448 crore in the year 2010-11 when all workers are enrolled in the social security scheme. This is considered as too low going by the experience of some of the Welfare Funds. Initially, the costs are likely to be higher as there will be set up costs for the National Board as well as the various State Boards. In addition, provision for giving grants to the proposed Workers Facilitation Centres will have to be taken into account. As such, a review of the ceiling for administrative expenses may be undertaken at the end of the third or fourth year of the scheme.

## **Registration of Workers**

9.44 The following steps are envisaged to ensure the registration of workers under the scheme:

- a) The Workers' Facilitation Centre will disseminate information on available social security schemes for the workers, who would fill the registration forms. Workers' Facilitation Centre will help the workers, if necessary, to fill in the application form for registration in the Social Security Scheme.
- b) The Workers' Facilitation Centre, wherever required, will do identification of the worker.
- c) The Workers' Facilitation Centre will forward the application received from the workers to the District Committee.
- d) The District Committee will allot, for each of the applications received, a Unique Identification Social Security Number (UISSN) and an Identity Card to the worker/family and the same will be forwarded to the concerned Workers' Facilitation Centre.
- e) On receiving the Identity Cards, the Workers' Facilitation Centre will distribute it to the concerned workers.

## **Agreements with Insurance Agencies**

9.45 It will be the responsibility of the State Boards to enter into agreements with insurance agencies/India Post/Mutual Funds for the provision of social security benefits through a process of negotiation and competition. The State Boards will have to specify the manner and mode of payment of premia to the concerned organisations. Given the vast postal network in the country, no significant additional costs are expected in the collection of premia and delivery of benefits. It will be the responsibility of the National Board to assist the State Boards in their negotiation with the insurance and/or other organisations. In addition, the National Board will ensure that the minimum benefits prescribed are adhered to in all the States.

## **Mechanism of Collection of Premia and Disbursement of Benefits**

9.46 It will be the responsibility of the State Boards to decide upon the modality of collection of contribution of workers, and distribution of benefits. Based on its deliberations the Commission recommends that the contributions from workers, State Governments and the Central Government may be collected by the Department of Posts (DoP). From the point of the informal workers, the wide network of Post Offices would enable them to pay their contributions on a regular basis as stipulated by the National Board. Depending on the number of workers

enrolled, the corresponding contribution of the State and Central Governments may also be made to the Department of Posts. The collected amount will be credited to the accounts of the State Boards maintained by the Department of Posts.

9.47 The Post Offices where the workers will remit their contribution will be given a Savings Account Pass Book by opening a Savings Account. This will enable the workers to access their benefits through the Post Offices by way of credit in their Savings Accounts. It is pertinent here to note that the Post Office banking system has 141 million accounts (savings, recurring, time deposit, PPF, etc.) with a total deposit of Rs.2, 01,183 crore.

9.48 Whenever disbursements to social security providers (such as Post Office for life insurance, general insurance agencies for health insurance and Provident Fund manager for PF) are due, the concerned State Board will direct the DoP to make payments on its behalf. In this way, the DoP will act as the book-keeper of the national social security scheme. The National Social Security Board will have the power to lay down such guidelines as are necessary for the transactions of funds under the scheme.

9.49 The Workers' Facilitation Centres will assist the individual informal workers in their dealings with the Post Offices, wherever necessary. They will also maintain an account of the registered workers, payment of contribution and receipt of benefits, etc.

### **Financing National Minimum Social Security**

9.50 The Commission is aware that, worldwide, the concern for extending social security to the hitherto excluded is on the increase. This is particularly so in the context of globalisation and liberalisation which have increased the sense of insecurity among the workers the world over. However, it must be pointed out that industrialised countries have maintained high level of public social security expenditure measured as a percentage of GDP. It is around 18 per cent for OECD member countries and around 25 per cent for EU member countries.

9.51 Developing countries have considerably lagged behind the industrialised countries. However, the trend has been one of increase in social security expenditure as a percentage of GDP though there is considerable variation across countries. During 1996, public the social security expenditure as a percentage of GDP in India was 2.6 (including 0.9 for health), whereas it was 3.6 for China and 4.7 for Sri Lanka.

9.52 Social security expenditure does not entirely depend on the level of per capita income or that is what the current distribution of such expenditure in different countries show. What is found is that "the level of social security spending varies substantially between countries with similar GDP per capita.

Clearly, the level of social expenditure (measured as a percentage of GDP) does not – at least exclusively – depend on the level of GDP. Thus there are poorer societies, which decide to devote a similar percentage of their GDP to social security expenditure to that spent by societies which are far better off. *This indicates that social spending is also to a large extent a matter of political choice [emphasis added]*” (ILO 2001:81).

9.53 As we have argued in this Report, the extension of social security to the unorganised/informal workers is not merely a matter of social equity but also a developmental goal with a view to strengthening their capabilities in an increasingly competitive context. The economic environment for such an extension is also favourable with a growth performance of six to eight per cent per annum.

9.54 Experience worldwide also shows that there is no alternative to the state playing a major role in guaranteeing a minimum of social security. This may be in the form of direct contributions on behalf of those who cannot do so or as financial guarantor, or ultimate underwriter, of social security schemes. In the context of India, the Commission is of the view that the role of the state is indispensable especially in extending social security to the hitherto excluded workers in the informal economy.

9.55 The contributions have been defined at the rate of Rupee one per day contributed by the worker, employer and the government. In view of the absence of employer for a significant proportion of the workers and the difficulties in collecting the contribution from those employers who are identifiable, the defined contribution will turn out to be Rupee one per worker and Rupees two by the government. However, the periodicity of collection of such contributions will have to be decided by the State Boards in consultation with National Board by taking into account the practical aspects.

9.56 In addition, the Central Government will pay the contribution of workers who belong to the Below Poverty Line households that works out to 23 per cent of the workers eligible for the National Minimum Social Security. The Central Government will also bear the cost of a minimum monthly pension to poor (BPL) informal workers.

9.57 It should be noted that all calculations including the contributions are worked at 2006-07 prices.

9.58 As we have noted earlier, there are two types of contributions to the proposed Social Security Fund. One is the contribution collected from the workers. The other is the contribution paid by the Central and State Governments. There are different ways of mobilising the required resources for such a national scheme. The Central Welfare Funds as well as those set up by the States rely on imposition of a cess on the concerned output. This might have

been an appropriate method for identifiable occupational categories. The other method could be the imposition of a general tax for the purpose. We leave it to the Government to devise appropriate mechanisms for funding this scheme.

9.59 Since the Indian Economy has been growing at more than 7 per cent per annum in the last 3 years so an 8 per cent was the rate of growth assumed for the next 5 years given the current expectations of the future trends. The GDP (at market prices) for the year 2006-07 has been derived implicitly from the budget. Secondly, we assume that direct taxes grow at the rate of 20 per cent per annum and the indirect taxes are assumed to grow at 8 per cent per annum. Given the average rate of around 5 per cent inflation in the Indian economy, these rates tantamount to 25 per cent and 13 per cent in nominal terms for direct and indirect taxes respectively. In the past 3-4 years, direct taxes have grown over at a rate of 25 per cent while indirect taxes have increased at a rate above 15 per cent.

9.60 If the increase in expenditure by the Central government were to be financed through increase in taxes alone, the increase in the Tax-GDP ratio would only be marginal -- from 11.30 per cent to 11.47 per cent in the first year, 2006-07 and 14.12 per cent to 14.51 per cent in the fifth year, 2010-11. However, it should be noted that the Tax-GDP ratio in India is one of the lowest including countries in Asia. .

9.61 As per these calculations, the first year's contribution of the Central government will be Rs.6,674 crore including administrative expenses, which will increase to Rs.20,582 crore in the fifth year including administrative expenses of Rs.1,448 crore. As a percentage of GDP, the additional financial requirements works out to 0.17 per cent in the first year and 0.39 per cent in the fifth year (see table 9.8). As a percentage of gross tax, the additional financial requires works out to 1.51 per cent in the first year and 2.74 per cent in the fifth year. The Commission's examination of the entire financial requirements of both the Centre and State taken together shows that these requirements, as a percentage of Gross Domestic Product at market prices rise from 0.20 per cent in 2006-07 to 0.48 per cent in the year 2010-11 (ibid). Over the corresponding period for the entire additional expenditure burden of Centre and States to be financed through Central taxes, the Tax-GDP ratio of the centre is estimated to increase from 11.50 per cent to 14.60 per cent of Gross Domestic Product at market prices.

## Responsibilities and Responses

10.0 The various stakeholders in the context of the legislation on social security are Government of India, State Governments, Employers, National Social Security Board, State Social Security Boards, Workers Facilitation Centres and unorganised workers, Trade Unions and other organisations of unorganised workers, and civil society organisations, working for the welfare of unorganised workers. The duties and responsibilities of the stakeholders are discussed forthwith.

### **Government of India and National Social Security Board.**

10.1 In order to operationalise the social security scheme, it would be necessary to enact a legislation at the Central level. As a part of this legislation, the National Social Security Board for Unorganised Workers (NSSB) as well as National Social Security Fund (NSSF) shall have to be created. The National Board may comprise of the representatives of the State Boards, existing Central Welfare Boards, national level trade unions of unorganised sector workers, national level voluntary associations of unorganised sector workers and national level organisations of the employers in the unorganised sector. The National Board would be responsible for formulation of policies and guidelines at the national level.

10.2 The National Social Security Board for Unorganised Workers will formulate the National Social Security Scheme comprising of old age security, health benefits and life and accident insurance. The National Board shall also frame rules for proper administration of the scheme and the Act. The Government of India shall make adequate financial arrangements. The National Board will be responsible to allocate funds to the State Boards in proportion to the number of registered workers in each of the States.

10.3 The Government of India in consultation with the National Board would decide and declare by appropriate notification regarding the phasing of the scheme. The entire coverage of unorganised workers may be spread over a period of five years.

10.4 As part of their responsibilities the National Board will enter into negotiations with the Insurance companies/Mutual Funds/India Post for working out a scheme in regard to old age security in the form of a provident fund cum unemployment insurance with an option to purchase an annuity for life on attaining the age of 60 years. It will also negotiate with insurance agencies for providing health cover to the workers.

10.5 The Government of India shall in consultation with the National Board and the Central Welfare Boards be responsible for deciding the continuance or otherwise of the existing social security schemes.

10.6 The National Social Security Board will be responsible to give the unique code for issue of Identity cards to the State Boards. The mechanism of allotting individual identification code shall be framed by the National Board and the State Boards should issue the cards with unique numbers as per the number scheme devised by the National Board.

10.7 The National Social Security Board will be responsible for interaction with the concerned Ministries, State Governments and other agencies for strengthening the health care system so that adequate medical facilities are made available to the workers at a reasonable distance. The National Board has to also work closely with the National Rural Health Mission for the above purpose.

### **State Governments and State Social Security Boards**

10.8 It would be the responsibility of the State Government to operationalise the social security scheme at the State level, through creation of a Social Security Board for Unorganised Workers as well as a Social Security Fund. The State Board will comprise of the representatives from the Workers Welfare Boards, Unions and other concerned organisations.

10.9 As regards the schemes operated by the existing Welfare Boards, the State Government along with the State and the National Board shall have the responsibility to decide the continuance or otherwise of the existing social security schemes.

10.10 The State Government will be responsible to set up District Committees for acting as the registering authority of the workers. These offices of the District Committee may be used as an arm of the State Board at the district level for proper and effective implementation of the scheme. The State Board shall be responsible for issue of identity card with unique identification number to the worker/ worker's family. The modalities for issuing unique numbers will be decided between the National Board and the State Board. The State Government shall constitute at least one Dispute Resolution Council in each district for resolution of disputes. The manner of filing a complaint before the Dispute Resolution Council will have to be determined by the State Government.

10.11 The State Social Security Board will be responsible for collection of contributions under the scheme at the State level. It will finalise the periodicity and modality of such collection through the network of Post Offices and/or banks.

10.12 The State Board shall be responsible for devising appropriate criterion for identification of the Workers' Facilitation Centres (WFC), which may be designated gram panchayats or other organisations like NGOs etc. keeping in view their institutional credibility as well as experience in managing social security schemes. It is also important that adequate financial assistance is provided for setting up of the WFCs and for recurring costs of maintenance. This may be given as grants to be divided between the Central and State Governments. The State Board shall monitor and control the activities of the WFCs so that they function in an effective manner. The State Board shall stipulate norms for the evaluation of the work done by the Workers' Facilitation Centres.

10.13 The State Board shall be responsible for finalising the most appropriate and advantageous scheme for the workers. The National Board shall provide technical help, assistance and broad guidelines to the State Boards regarding the various benefits, which could be negotiated by the State Board with them. The ultimate responsibility of finalising the scheme shall however vest with the State Board.

10.14 The State Board shall be responsible for delivery of the social security benefits as envisaged by the Act. It shall interact with the National Board and the concerned agencies for ensuring the delivery of the benefits. This may include existing delivery mechanisms like Welfare Boards or through tie-ups with institutions such as India Posts. The claim of registered workers for social security benefits shall lie solely against the State Board and it shall be the responsibility of the State Board to settle the dues, if any. Necessary arrangements would therefore have to be worked out to ensure that the benefits are properly delivered to the beneficiaries.

### **Workers Facilitation Centres (WFC)**

10.15 The WFCs shall be responsible for the identification of the beneficiaries and the proper maintenance of records pertaining to the social security benefits made available to them. The WFCs would also be responsible for (a) the distribution of the Identity Cards issued by the District Committee to the workers concerned and/or their families, (b) disseminating information on available social security schemes amongst the workers, (c) facilitating the filling and processing of application forms, (d) forwarding of application forms for registration of workers, and (e) ensure the payment of contributions by the workers and employers to the social security schemes. They also have to monitor the delivery of social security benefits in cooperation with institutions designated to deliver such social security.

## **Trade Unions and other organisations of unorganised workers and Civil Society Organisations working for the welfare of unorganised workers**

10.16 The recommendations of the Commission provide for representation of National/ State level Trade Unions and other organisations of unorganised workers and civil society organisations in the NSSB/ SSSB. The aforesaid organisations could also be designated as WFCs by the State Boards wherein their responsibilities would be same as mentioned in the foregoing Para. Where these organisations are not designated as WFCs, they shall be responsible for creating awareness among the unorganised workers under the social security scheme. They will also have to interact with State and Central Governments to help initiation of the schemes and monitor their functioning through their representation in such bodies. They shall provide local level assistance in registration of workers through the WFCs.

### **Responses**

#### **Ministries of Government of India**

10.17 The social security provisions were sent to the relevant ministries of the central government. A tabulation of the main points of the comments received from the various Ministries is as per **Appendix 9** enclosed.

#### **State Governments & Union Territories**

10.18 A tabulation of the main points of the comments received from the various State Governments and Union Territories is as per **Appendix 10** enclosed. It would be relevant to mention that a few State Governments have given their views in the 40<sup>th</sup> session of The Indian Labour Conference held at Vigyan Bhawan, New Delhi on 9-10 December 2005. The views of the State Governments as circulated during the conference and/or commented in the conference is as per **Appendix 11**.

#### **Trade Unions**

10.19 The Central trade Unions have generally been of the view that the Commission has correctly bifurcated the twin aspect of Social Security and Conditions of Work and Livelihood Promotion. A brief summary of the comments of the Trade Unions is as per **Appendix 12** enclosed.

#### **NGO's, Academics and others**

10.20 Comments have been received from various NGO's academics and others who have generally concurred with the Bills of the Commission. A brief summary of the comments received from various NGO's academics and others are as per **Appendix 13** enclosed.

## Follow up Measures

10.21 After the submission of the draft Bill on Social Security by the Commission, a series of meetings, discussions and presentations have been made at various fora. Public discussion has also taken place especially in the print media.

10.22 The draft Bill was discussed at various levels of the Government and it was decided that a Committee of Secretaries would go into the details and modalities of implementation.

10.23 Discussion of draft Bill also took place in the 40th session of The Indian Labour Conference held at Vigyan Bhawan, New Delhi on **9-10<sup>th</sup> December 2005**. The draft Bill was circulated along with the other two draft Bills namely, one drafted by the Ministry of Labour & Employment, and the other drafted by some members of the National Advisory Council. A committee on Social Security for Unorganised Sector Workers examined the three Bills and passed the following resolutions in regard to the Bills that were ratified in the plenary session of the conference. The resolutions are as under:

- Enactment of comprehensive legislation covering social security aspect and the service conditions of unorganised sector workers should be expedited.
- All unorganised workers including home-based, wageworkers, migrant workers and self-employed workers whose average monthly earnings do not exceed Rs. 6500/- per month should be covered.
- The social security scheme should be designed prior to introduction of the legislation.
- The floor level social security schemes like life and accident cover, health insurance and maternity benefit should be funded by the Central Government.
- There should be tripartite Social Security Boards at the Centre and in the States/Unions Territories to formulate/review the schemes under the legislation.
- The implementation of the schemes should be left to the State Governments through its machinery including Panchayati Raj Institutions and local bodies.
- The administrative and infrastructure expenditure under the proposed legislation should be borne by the Central Government for the initial period of five years.

- The social security benefits being provided under the existing Central or State Boards may be integrated at the option of State Governments or the Union Territories with the schemes under proposed legislation.
- A tripartite Working Committee should be set up by the ILC to examine all the four draft Bills i.e. one drafted by Ministry of Labour & Employment, two by the National Commission for Enterprises in the Unorganised Sector and the one forwarded by the National Advisory Council and prepare one final draft Bill taking into account the recommendations/suggestions from all stakeholders.

## Summary and Recommendations

11.0 The National Commission on Enterprises in the Unorganised Sector (NCEUS) has been set-up to recommend measures considered necessary for enhancing the competitiveness of the unorganised sector in the emerging global environment and generation of large scale employment opportunities on a sustainable basis. An important term of reference of the Commission has been to review the social security system available for labour in the informal sector and make recommendations for expanding their coverage. The Commission was also asked to comment and if necessary revise a draft Bill titled “the Unorganised Sector Workers’ Bill, 2004”, prepared by the Ministry of Labour and Employment which arose from the recommendations of the Second Labour Commission. In addition, the Commission was also asked to comment on another draft Bill that was considered by the National Advisory Council. The Commission’s report and the draft Bill is a result of detailed analyses of all dimensions of social security for unorganised workers, including a review of the existing proposals.

11.1 This report has been prepared on the basis of extensive consultations with the Ministry of Labour, State Governments, industry representatives, trade unions, NGOs and professional experts and the feedback received from them (Chapter 1).

11.2 On the issue of a uniform definition of unorganised sector the Commission, after deliberating on a number of alternatives, adopted the following definition:

“All unincorporated private enterprises owned by individuals or households engaged in the production and sale of goods and services and operated on a proprietary or a partnership basis and employing less than 10 persons”.

11.3 However, the unorganised sector is an enterprise-based concept and it does not reflect the characteristics of the jobs or employment relationships. It is possible that some workers in the organized sector do not enjoy any job security, work security or social security. In order to identify such categories of workers, it has been considered necessary to complement the definition of unorganised sector with a definition of unorganised/informal employment in line with the existing international definitions. The Commission thus adopted the following definition of unorganised or informal employment:

“Unorganised Workers are all those who are working in the Unorganised Sector defined earlier and the workers in the formal sector without any employment security and social security provided by the employer”.

11.4 Given the congruence of the Commission's definition of unorganised sector and unorganised employment with that of the internationally used terms of informal sector and informal employment, the two are used interchangeably through the report.

11.5 By using the above definitions, the Commission estimated the number of informal workers in the informal sector in India as on 1.1.2000 at 340 million and the total informal workers in the economy (i.e. informal workers in the informal sector plus informal workers in the formal sector) at 362 million. The latter is referred to as informal employment. The above figures constituted 86 and 91 per cent respectively of the total employment in the country. The most important characteristic of the informal employment, as far as the workers are concerned, is the absence of any form of protection. An overwhelming majority of them have no facility for covering such risks as ill health, accidents and death, and old age. *It may be mentioned that the Commission has used this definition (unorganized/informal workers) to deliberate on the question of social security, rather than adhere to an enterprise based concept.*

11.6 According to the Commission, the social security problems of informal workers may be divided into two sets of problems. The first one arises out of deficiency or capability deprivation in terms of inadequate employment, low earnings, low health and educational status and so on that are related to the generalised deprivation of poorer sections of the population. The second arises out of adversity in the sense of absence of adequate fallback mechanisms (safety nets) to meet such contingencies as ill health, accident, death, and old age.

11.7 The Commission is of the view that absence of a meaningful social security arrangement is not merely a problem for individual workers and their families. It also has wider implications for the economy and society. From an economic point of view, it debilitates the workers' ability to contribute meaningfully to his/her efficiency and thus to increase production and productivity. Low earning power coupled with vulnerabilities lead to poverty that reduces the aggregate demand in the economy. Socially it leads to dissatisfaction and disaffection especially when a small segment of the society is well endowed and seen to be prospering. The indirect costs of the absence of social security might well be increasing social costs through policing and management of crimes and illegal activities, widespread ill health and a variety of related social problems.

11.8 This report has thus focused on the protective social security for workers in the informal economy though the complementarities of promotional social security that should form a part of an overall and integrated social policy are well recognised by the Commission.

11.9 Although the country does not have a formal social policy, it has a long-standing and universal social development agenda arising out of the Directive Principles enshrined in the Constitution. In addition, it also has several target-oriented and long-standing programmes with the objective of eradication of poverty and deprivation. There is need to locate the evolving/proposed national social security system within the framework of the existing (and also evolving) national social/human development programmes for the poor and the larger framework of universal social/human development programmes.

11.10 Presently, the social security framework in the country is operating at three levels. At the first level are the universal programmes and schemes for basic social/human development such as the mission for literacy, schooling, health care services, drinking water and sanitation, technical training, etc. that should be viewed as foundational to any sound social and economic development policy. These programmes address the issue of creation and enhancement of human capabilities through creating entitlements to all citizens funded by the public exchequer. The effectiveness and advancement of these functions of the state are often a pre-requisite for the effectiveness of specific protective social security policies and schemes such as the one proposed here.

11.11 At the second level is the social/human development schemes that are intended to provide a measure of socio-economic security to the poorer citizens irrespective of their status as working or non-working poor. The underlying idea here is to meet both promotional and protective needs of some sections of the population in their basic social security needs. Over time, a number of programmes have come to stay in the country like Integrated Child Development Scheme, Development of Women and Children in Rural Areas, Mid-Day Meal Scheme for schooling children, Public Distribution System, housing for the poor, and National Social Assistance Programme and the recently introduced National Rural Employment Guarantee programme. To address the social security concerns of specific groups, sub-targeting is often resorted to as in the case of old age poor, widows, child labourers, physically and mentally challenged, etc.

11.12 The third level should, according to the Commission, constitute a social security system for the unorganised/informal workers. This should address both deficiency and adversity. The social security concerns arising out of deficiency relate to access to credit/finance (especially for the self-employed), loans for upgrading skills, loans for housing, children's education, etc. The adversity arises out of various contingencies such as absence of social security cover for ill health, accidents/death and old age. These fall under the category of protective social security, which is the focus of the report (Chapter 2).

11.13 There are a number of international conventions that address these issues. The International Convention No. 102 includes nine core contingencies that lead to stoppage or substantial reduction of earnings of the workers. A review of micro studies in India showed that informal workers were concerned

with five major risks towards their security. The occurrence of any of these major risks lead to a substantial financial shock to the households of informal workers often leading them to borrow money on onerous terms. These risks were listed as major illness of a member of the family, birth of a child, accident or injury leading to temporary or permanent disability and loss of working days, old age and unemployment.

11.14 Formal workers in India have recourse to social security measures. Informal workers who are, as mentioned earlier, more than 91 per cent of the workforce have limited or no formal social security cover which increases their vulnerability during times of illness, old age, unemployment and untimely death. The absence of social security mechanisms is a critical factor in the worsening of the condition of these households, many of whom are already very poor (Chapter 3).

11.15 There are a number of social security programmes being implemented both by the Central and State Governments for the benefit of unorganised workers. In general, the model that has been adopted in most of these programmes has been that of Welfare Funds. There have also been a few schemes implemented by the Central Government either directly or through insurance companies. Separate legislations have been enacted by the parliament to set up five Welfare Funds to be administered by the Ministry of Labour to provide housing, medical care, social security, education and recreational facilities to workers in selected mining operations, beedi-making and production of feature films (called cine workers). All these funds are financed out of proceeds of cess levied under respective Cess/Fund Acts on manufactured beedi, feature films, export of mica, consumption of limestone and dolomite, and consumption and export of iron ore, manganese ore and chrome ore, etc.

11.16 The National Social Assistance Programme (NSAP) is a programme of a cash-transfer nature in the country which was launched with the objective of protecting the poor and destitute persons in events of insecurities during old age, death of breadwinner and maternity. The scheme is hundred percent centrally funded to ensure that a measure of social protection, albeit limited, is available to the poor and old persons throughout the country. The NSAP, by its very character, has made it possible to extend a scheme of social assistance to states, which did not have one so far. The Gram Panchayats and Municipalities play an important role in the identification of beneficiaries, its monitoring and disbursement of funds. The programme currently covers two benefits (i) National Old Age Pension Scheme (NOAPS), and (ii) National Family Benefit Scheme (NFBS). By launching this scheme, the government recognized that a social security measure of this nature demands national attention and initiative.

11.17 Apart from the NSAP discussed above, a number of Central government schemes for social security have been in operation over a period of time. These have been targeted at the poorer sections of the society and selected

occupational groups and are mostly contributory in nature. Some of these schemes discussed in the report are the Varishta Pension Bima, Group Health Insurance Scheme (GHIS), Janashree Bima Yojana, Universal Health Insurance Scheme and Krishi Samajik Suraksha Yojana. (Chapter 4)

11.18 At the state level there are a number of social security initiatives. However, those are found to be uneven both in terms of coverage of states as well as workers. With the exception of a few, most social security initiatives do not cover sickness. They mostly cover such requirements as accidental death and injury, maternity and some financial assistance for education of children. One of the major insecurities of workers is frequent incidences of illness and need of medical care and hospitalisation of the workers and other family members.

11.19 Even in states such as Kerala with a number of statutorily backed Welfare Boards and Funds, there is considerable scope for rationalisation of contributions and benefits. There is also the need for bringing down the costs of administration. Professional management systems are also required for management of funds and strengthening the delivery mechanisms.

11.20 Given the number of schemes (both in terms of Welfare Funds and schemes) addressed to specific categories of workers, there is a case for establishing a state-level board that will, inter alia, extend social security coverage to all the workers. At the same time, such a state-level body can also take care of the implementation of national level schemes. It is with this in mind that the Commission has proposed an authority at the national level as well as at the state level (Chapters 5 and 8).

11.21 Though there are a number of schemes implemented both by the Central and State Governments, the total coverage is estimated to be about 21 million workers. In other words only about 6 percent of the unorganised/informal workers in the country are covered under any of the social security measures. It is further estimated that small and large NGOs in the country provide some social security cover to about two per cent of the workforce in the unorganised sector.

11.22 The most common form of security cover provided by the NGOs is health security. This is done mainly through providing a health insurance cover in any of two ways. First, the NGO acts as an intermediary between the provider of insurance and the community. The second method is more common where the NGO itself provides the insurance cover. In most cases the insurance covers hospitalization and additional expenses of medicine.

11.23 The clear relation between provision of insurance and availability of health infrastructure is brought out. This is clearly important when considering any national level health insurance programme. Unless the health infrastructure is strengthened particularly in the rural and remote areas, a health cover would be

meaningless. The maximum NGO presence in such social security coverage is in the southern states of Andhra Pradesh, Karnataka and Tamil Nadu and the western states of Maharashtra and Gujarat (Chapter 6).

11.24 The Report has examined the international experience in the area of social security by studying (a) the historical experience of western countries, and (b) the recent experience of developing countries, in extending social security. Many countries are in fact following a model that combines social security arrangements while striving to enhance aggregate economic growth and this would apply to developing countries.

11.25 The historical experience suggests that there is hardly an effective alternative to the role of the state in providing a modicum of social security especially to the poorer sections of the population. A process of industrialization and an increasingly urbanised economy and society has accompanied the process of evolution of social policy in Europe.

11.26 The report examines the experience on social security of developing countries such as China, Indonesia, Tunisia and Brazil. China's social security system may be viewed in the context of urban and rural social security. The social security for the poor in urban China is based on household income and other indicators of the quality of living. Counties in all provinces have some form of rural old age pensions. The contributions come from beneficiaries, local governments as well as the central government. Another protective cover given by China is to meet the contingency of natural disasters. This is given to the affected population in the form of cash or kind. Health insurance through Community Medical Schemes (CMS) is being encouraged and the government is providing a part of the contribution. In fact, the contributions are in the nature of "10+10+10" i.e. equal contributions of ten yuans by the beneficiary, local government and the central government.

11.27 Indonesia has come out with a National Social Security Reform Bill. This new Indonesian National Social Security System will be established in accordance with what is called 'the three pillar approach'. These are: (1) social assistance for citizens who lack the financial means or access to their basic needs (like natural disaster, social unrest, illness, old age or loss of employment). It will be financed by state budget or by community funds; (2) a compulsory social insurance scheme, financed by employers and employees; and (3) a voluntary private insurance, in which a person may opt to take out additional insurance. In Tunisia, which has covered 83 per cent of its workers under some form of social security, the Social Development and Social Assistance Programmes are intended for low-income categories and persons who are not covered by any social security schemes. These are run essentially either by the State or by associative bodies. In Brazil there is a well-established social security system for all workers in the organised/formal sector of the economy. In addition, there are private social security funds (as well as those by public enterprises) membership

of which is on a voluntary basis involving defined contributions or benefits (Chapter 7).

11.28 The Commission examined the recommendations of three national bodies that had advocated the establishment of a national social security scheme for the unorganised workers. The National Commission on Rural Labour (NCRL1991) under the chairmanship of Dr. C. H. Hanumantha Rao discussed the issue of social security and recommended minimum social security benefits such as Old age pension, Life insurance, Maternity benefit, Disability benefit (accident compensation), Minimum health care and sickness benefit. Similarly the Second National Commission of Labour (NCL 2002) while covering the aforesaid benefits also suggested the constitution of a high powered National Social Security Authority and a Social Security Fund at the national and state levels. Following the recommendations of this Commission, the government formulated the Unorganised Sector Workers' Bill 2004 covering both social security and conditions of work. The National Advisory Council (NAC 2005) also prepared a draft Bill titled 'The Unorganised Sector Workers' Social Security Bill' for the Unorganised sector. The NAC draft proposed social security benefits without any contribution from workers (except for old age pension) and the financing was proposed to be realised mainly from levy and collection of cess, etc. The NAC also proposed the constitution of a National Social Security Authority as a corporate body. (Chapter 8)

11.29 The National Social Security Scheme now proposed by the Commission is based on defined contributions. These contributions are meant to be utilised as premiums for insurance to cover (a) hospitalisation, (b) maternity, life insurance and (c) old age security. As per the defined contribution of Rs. 3 per worker per day (contributed equally by the worker, employer and the Government), a sum of Rs.1,095 will be available per worker per year. This may be split into three premiums; hospitalization, maternity and sickness allowance, life insurance, and old age security. In the scheme of things suggested by the Commission, it will be the responsibility of the State Social Security Boards to negotiate with the concerned insurance agencies, with the help of the National Social Security Board, and decide on how best to apportion the contribution and secure the best possible deal. The Commission has suggested a division of the annual premium of Rs. 1095 into a premium of Rs.380 for health benefits and maternity cover, Rs.150 for life insurance, and Rs.565 for old age security.

11.30 A single policy on health and maternity is expected to cover a typical family of five members. The minimum benefits being envisaged are: hospitalisation cover up to Rs.15,000; maternity benefit of Rs.1,000 (maximum) per delivery; personal accident cover in the event of death of earning head of family to the tune of Rs.25,000; and sickness cover for the registered worker during hospitalization at Rs.50 per day for a maximum period of 15 days. The State Social Security Boards are expected to negotiate with the insurance provider regarding nature and extent of benefits, taking into account the state

specific contexts, in order to ensure the best possible cover to the registered worker.

11.31 The social security identity cards issued to the worker/family shall allow him/her to avail of the prescribed facilities on the basis of either a cashless system or reimbursement of expenses. The Commission is of the opinion that a cashless system is the more appropriate one for the informal workers.

11.32 As regards old age security, the Commission has recommended the following two alternative benefits: (a) Monthly old age pension of Rs.200 per month to all poor (BPL) old aged (60+) workers, and (b) Provident Fund to all other workers (who are required to contribute to the national social security scheme). A premium of Rs.565 is available per worker per year to all above-poverty line workers for old age security, towards Provident Fund which the worker can also use to purchase an annuity available from the age of 60 years.

11.33 The Commission recommends that the PF may also be designed as an Unemployment Relief by permitting the workers to withdraw up to half of his contribution depending on the period of unemployment. However, a minimum lock-in period of ten years is recommended.

11.34 While the scheme will be contributory in nature with workers, employers and government contributing at one rupee per day or Rs.365 per annum, in practice it will be between workers and government at Re.1 and Rs.2 per day respectively. This is because only 17 per cent informal workers (in non-agriculture) have identifiable employers and as such their contribution will have to be paid by government and recouped through tax/cess. BPL workers will be exempt from their contributions which shall be paid by Central government on their behalf. The remaining government contribution shall be shared by the Central and State governments in the ratio 3:1. In addition, as indicated in para 11.32, the BPL workers shall be provided an old aged pension. The cost of the pension shall be borne by the Central government and shall substitute the contribution of governments towards their PF contribution (Rs.565/worker/(year).

11.35 The National Social Security Board will formulate and implement the scheme at the Central level, while State Social Security Boards will do the same at the state level. Worker Facilitation Centres which may be NGOs, trade unions, or Panchayat Raj Institutions will facilitate the scheme, including the registration of workers. The actual registration of the workers as well as issue of identity cards will be the responsibility of a District Committee which would liaise between the State Board and the WFCs. It is envisaged that all eligible workers shall register under the scheme in five years.

11.36 In 2006-07, the contribution of the Central government will be Rs.6,674 crore including administrative expenses, which will increase to Rs.20,582 crore in 2010-11. As a percentage of GDP, the additional financial requirement of the

Central government works out to 0.17 per cent in the first year and 0.39 per cent in the fifth year. As a percentage of gross tax, the additional financial requirement works out to 1.51 per cent in the first year and 2.74 per cent in the fifth year. The Commission's examination of the entire additional financial requirements of both the Centre and State taken together shows that these requirements, as a percentage of Gross Domestic Product at market prices rise from 0.20 per cent in 2006-07 to 0.48 per cent in the year 2010-11(Chapter 9). It may be mentioned that, for various reasons elaborated in the Report, these figures are to be considered as upper limits to the proposed contributions/expenditures. Further, it will be up to the Central and State governments to devise ways to collect the employer's share, or to raise the required amount through appropriate social security tax or cess.

11.37 The implementation of the social security scheme entails various responsibilities on diverse stakeholders in the context of the legislation on social security. The Central government would enact an enabling legislation and arrange for and operationalise the scheme through the creation of a National Social Security Fund and a National Social Security Board. The State Governments shall be responsible for creation of a Social Security Board for Unorganised Workers as well as a Social Security Fund. The State Government will be responsible to set up District Committees for acting as the registering authority of the workers.

11.38 The State Board shall be responsible for devising appropriate criterion for identification of the Workers' Facilitation Centres (WFC), which may be designated gram panchayats or other organisations like NGOs and trade unions keeping in view their institutional credibility as well as experience in managing social security schemes. The WFCs shall be responsible for the identification of the beneficiaries and the proper maintenance of records pertaining to the social security benefits made available to them. They also have to monitor the delivery of social security benefits in cooperation with institutions designated to deliver such social security. (Chapter 11)

11.39 To provide legislative backing for the national minimum social security scheme proposed here, the Commission has drawn up a comprehensive draft Bill for consideration of the Government of India. Such a legislative back-up will make the scheme a right-based one for the unorganised workers in the country. It will thus initiate a much needed process of inclusion of the unprotected labour in the country in so far as a modicum of protective social security is concerned. (Part II)

## **Statement of objects and reasons**

The unorganised sector of the economy in India is the largest sector in terms of employment of the workforce. It consists of agriculture and such related activities as forestry, livestock and fishing as well as non-agriculture. The workers may be broadly divided into self-employed and wage workers. Wage workers may be sub-divided into those (a) working in the unorganised sector, and (b) working in the organised sector without any social security cover. Around ninety percent of the workers in India are neither covered by any formal system of social security nor regulation of conditions of work. This Bill is intended to provide a measure of social security to the workers in the unorganised sector. This Bill proposes a model that will be inclusive in nature and provide for clearly demarcated division of responsibilities between the Central and State Governments. It mandates the Central and State Governments to implement a National Social Security Scheme.

## **UNORGANISED WORKERS SOCIAL SECURITY BILL, 2006.**

### **A BILL**

*to provide for social security and welfare of unorganized workers and to provide for other matters connected therewith or incidental thereto.*

*BE it enacted by Parliament in the fifty-fifth year of the Republic of India as follows:-*

# Chapter I

## PRELIMINARY

### 1. Short title, extent, commencement and application:

- (1) This Act may be called Unorganised Workers Social security Act, 2006.
- (2) It extends to the whole of India.
- (3) It shall come into force on such date as the Central Government may, by notification in the official Gazette, appoint.

### 2. Definitions:

For the purposes of this Act, unless the context otherwise requires, -

- a) "**Agriculture**" would include the following occupations:
  - (i) Farming, including the cultivation and tillage of soil etc;
  - (ii) Dairy farming;
  - (iii) Production, cultivation, growing and harvesting of any horticultural commodity;
  - (iv) Raising of livestock, bee-keeping or poultry;
  - (v) Fishing and/ or fish farming;
  - (vi) Any practice performed on a farm as incidental to, or in conjunction with, the farm operations (including any forestry or timbering operations and the preparation for market and delivery to storage or to market or to carriage for transportation of farm products);
  - (vii) Growing fodder or thatching grass or for grazing cattle.
- b) "**Central Government**" means the Government of India;
- c) "**Employer**" means a natural or juridical person, or an association of such persons, by whom any unorganised worker is engaged or employed either directly or otherwise, for any remuneration;

- d) "**Home based worker**" means a person involved in the production of goods or services for an employer in his / her own home or other premises of his / her choice other than the work place of the employer, for remuneration irrespective of whether or not the employer provides the equipment, materials or other inputs;
- e) "**Identity card**" means a card issued to a worker carrying unique social security number issued by the authorised agency of the State Board;
- f) "**National Board**" means the National Social Security Board for unorganised workers;
- g) "**Registered Worker**" means an unorganised worker registered for social security under this Act;
- h) "**State Government**" means the Government of a State in the Indian Union;
- i) "**State Board**" means the (name of the State) State Social Security Board for unorganised workers;
- j) "**Self employed worker**" means any person who is not employed by an employer, but directly engages himself / herself in any occupation in the unorganised sector, subject to a monthly earning of Rs.6,500/- or such limits as may be notified from time to time, or, subject to such ceiling on land cultivated as may be notified from time to time by the State Government;
- k) "**Unorganised Sector**" consists of all unincorporated private enterprises owned by individuals or households engaged in the production and sale of goods and services and operated on a proprietary or a partnership basis and employing less than 10 persons".
- l) "**Unorganised worker**" means a self employed worker or a wage worker in the unorganised sector and includes wage workers in the organised sector without any social security cover;
- m) "**Wage worker**" means a person employed for a remuneration in the unorganised sector or in the organised sector without any social security cover, directly by an employer or through any agency or contractor, irrespective of place of work, whether exclusively for one employer or for one or more employers, whether simultaneously or otherwise, whether in cash and/ or in kind, whether as a home based

worker, or as a temporary or casual worker, or as a migrant worker, or as a outworker, or, workers employed by households including domestic workers, with a monthly wage of not more than Rs 6500/- or such limits as may be notified from time to time, but does not include an unpaid family worker.

### **3. Rules of evidence:**

In this Act, notwithstanding anything contained in the Indian Evidence Act, 1872, the burden of proof that compliance with the provisions of the Act and the Scheme has been effected shall be entirely on the employer and the units of the Board wherever applicable.

***[Explanatory Note: This section facilitates shifting of the burden of proof from the workers to the employer. This is a departure from the normal practice and ordinary rules of evidence, which places the burden on the plaintiff.]***

## **Chapter II**

### **SOCIAL SECURITY BENEFITS**

#### **4. Framing of Schemes**

(1) By this Act, the Central Government shall formulate a scheme to be called National Social Security Scheme for the unorganised workers consisting of the following national minimum social security benefits:

- (i) Health benefits in the form of health insurance for self, spouse and children below the age of 18 years, sickness allowance, and Maternity benefits for women workers or spouse of men workers;
- (ii) Life Insurance to cover natural and accidental death.
- (iii) Old age security in the form of Old age pension for BPL workers above the age of 60 years and Provident Fund cum unemployment insurance benefit to all other workers.

(2) In addition to the national minimum, the Central Government may frame such schemes as it may deem necessary or finance such schemes of the State Governments as it may find appropriate subject to availability of finance by such means as mentioned in Section 5 and may include those listed under (3) below.

(3) The State Government may formulate such unorganised worker based schemes as it may find appropriate to (a) strengthen the national minimum social security by way of its own contribution, and/or (b) design and implement additional social security benefits through its own schemes. These may include:

- a) Provident fund schemes;
- b) Employment injury benefit scheme;
- c) Housing schemes;
- d) Educational schemes for children of workers;
- e) Skill up gradation of workers;
- f) Funeral assistance;
- g) Marriage of daughters; and
- h) Any other schemes to enhance the socio economic security of unorganised worker.

## **Chapter III**

### **NATIONAL SOCIAL SECURITY FUND FOR UNORGANISED WORKERS**

#### **5. Constitution of a National Fund**

The Central Government shall create a National Social Security Fund to which contributions shall accrue from the following sources:

- a) Grants and loans from the Central Government;
- b) Contributions from workers, employers and Governments for the specified national minimum social security shall be as under:
  - (i) Re. 1/- per day by the worker, provided that for those below the poverty line the contribution shall be made by the Central government;
  - (ii) Re. 1/- per day, per worker, by the employer, provided that where the employer is not identifiable, the contribution shall be shared by the Central Government and the respective State Governments in the ratio of 3:1;
  - (iii) Re. 0.75 per worker, per day, by the Central Government, and Re. 0.25. per worker, per day by the State Government.

*[Explanatory note: The contribution of Central and State Governments in (iii) above is in accordance with the practice of Government contribution to social security schemes in the organised sector]*

- c) Any tax or cess that the Central Government may impose for the purpose of providing social security for unorganised workers;
- d) Any tax or cess that the Central Government may impose on commodities and/or services in lieu of employers' contributions (which are either difficult to collect or appropriate employers in the unorganised sector are not directly identifiable).

In addition to the above, contributions may also accrue from the following sources:

- e) Contributions from the national financial/developmental institutions; and
- f) Any voluntary contribution from individuals or institutions.

#### **6. Existing Welfare Boards:**

All eligible unorganised workers shall be entitled to register and obtain benefits under the national minimum social security scheme, which shall be in addition to the social security benefits provided by the existing Welfare Boards created by the Central or State Governments, if any. Schemes which are in existence and operated through the Welfare Boards may be continued by the respective Governments in the existing form or in any other way as they deem fit.

#### **7. Exemption from Income Tax**

All financial contributions made by individuals and institutions to the National Social Security Fund will be exempted from the payment of income tax under the Income Tax Act.

#### **8. Utilisation of the National Fund**

All contributions accruing to the National Board shall be credited to the Fund, which shall be applied for meeting the following:

- a) *Expenses on social security schemes of the Central Government;*
- b) Grants to the State Boards, including for the purposes of the functioning of the Workers' Facilitation Centres;

- c) Expenses on the administration of the scheme, subject to a ceiling of 5% of the contribution of the Central and State Governments as specified in section 5;
- d) Investment in permitted schemes;
- e) Any other item in connection with the administration of this Act.

## **Chapter IV**

### **NATIONAL SOCIAL SECURITY BOARD FOR UNORGANISED WORKERS**

#### **9. Establishment and incorporation**

With effect from such date as the Central Government may, by notification appoint, there shall be established for the purposes of this Act, a Board to be called the National Social Security Board for unorganised workers.

#### **10. Functions of the Board**

The National Board shall provide the following functions:

- a) administration of this Act and formulation of policies at the national level, and shall have such powers as may be laid down to direct, co ordinate, supervise, and monitor the functioning of State Boards and the Central Welfare Boards;
- b) review the working including auditing of the State-level Social Security Boards and the Central Welfare Boards every four years and make suitable recommendations to the Government(s) concerned for further improvement;
- c) manage and maintain the National Social Security Fund and provide financial assistance to State Boards;
- d) advise the Central Government on policy matters relating to social security, health and safety and welfare of unorganised workers;
- e) assist in capacity building of the State Boards, and collect, compile and publish statistics relating to the unorganised sector and undertake such promotional activities as may be decided from time to time.

#### **11. Composition of the Board**

(1) The National Board for unorganised workers shall be constituted by the Central Government consisting of the following member organisations:

- a) State Boards for unorganised workers;
- b) Central Welfare Boards for unorganised sector workers administered by the Ministry of Labour and Employment;
- c) national-level unions of unorganised sector workers;
- d) national-level voluntary associations of unorganised sector workers including self-employed with an explicit social security scheme for its members; and
- e) national-level organizations of employers in the unorganised sector (such as organizations of tiny and small scale industries, farmers organisations) and government/public institutions with a stake in the welfare of the unorganised sector workers such as the All India Handicrafts Board, All India Handloom Board, Central Social Welfare Board, Department of Women and Child Development, and Department of Small Scale Industries.

(2) The Central Government shall decide the number and names of such organisations to be represented on the National Board.

(3) The National Board shall work through a General Council and an Executive Council.

## **12. General Council**

(1) The Union Minister for Labour and Employment shall be the Chairperson of the General Council.

(2) The Secretary to the Government of India, Ministry of Labour and Employment, shall be the Member-Secretary of the General Council.

(3) There shall be a General Council for the Board consisting of one representative from each of the member-organisations.

(4) The General Council shall meet once a year within six months of the last day of the previous financial year.

(5) The General Council shall discuss and review the functioning of the National Board in the light of the annual report for the preceding year. It shall also provide a platform for members to articulate their views, ideas and problems with regard to the unorganised sector in general and social security issues in particular and shall give broad policy directions to the Executive Council.

### **13. Executive Council**

(1) The Board shall have an Executive Council with the Secretary to the Government of India, Ministry of Labour and Employment, as its Chairperson and a full time Chief Executive Officer to be designated by the Central Government as its *ex-officio* Member-Secretary. In addition, the Central Government shall nominate the members to the Executive Council as per the following:

- a) Two representatives of the organisations of wageworkers in the unorganised sector, which are members of the National Board;
- b) Two representatives of organisations of self-employed workers in the unorganised sector, which are members of the National Board;
- c) Two representatives of organisations of employers in the unorganised sector that are members of the National Board;
- d) One representative from any one of the Central Welfare Boards;
- e) One representative each of the Government of India from the Ministry of Agriculture, Finance, Health and Small Scale Industries;
- f) Six representatives of the State Boards;
- g) One expert in the management of insurance products and services;
- h) One experts in the area of social security and related issues in the unorganised sector; and
- i) One expert in the management of finances.

(2) The tenure of the members shall be for a period of three years. The Executive Council shall meet as often as required but not less than twice a year.

***[a, b, c, and f may be based on the principle of rotation amongst the member-organisations.]***

### **14. Secretariat of the Board**

The National Board shall have a secretariat with adequate professional and other staff. The staff of the National Board shall be governed by the Central

Government rules and regulations existing from time to time. The annual budget of the National Board shall be prepared by the Secretariat and placed before the Executive Council for approval.

## **Chapter V**

### **STATE SOCIAL SECURITY BOARDS FOR UNORGANISED WORKERS**

#### **15. Establishment of State Boards**

(1) Each State shall have a State Board to implement the national minimum social security as well as design and implement state level social security and welfare programmes for unorganised workers. The State Governments shall constitute the State Boards within one year of the date of commencement of this Act. The State Boards shall have the following as its members:

- a) Workers Welfare Boards (both existing and newly designed) providing social security and welfare to the unorganised sector workers;
- b) Organisations which are registered as trade unions/cooperatives/charitable societies, engaged in the provision of social security for unorganised sector workers subject to such qualifying criteria as the State Government may lay down;
- c) Departments or agencies of the State Government acting as employers of the unorganised sector workers (e.g. Public Works department, forest department, or those employing anganwadi workers, khadi workers, etc.); and
- d) Representatives of organisations of self employed unorganised sector workers;
- e) Representatives of employers organisations in the unorganised sector;

(2) The State Government shall decide the number and names of such organisations to be represented on the State Board.

(3) The State Board shall work through a General Council and an Executive Council.

#### **16. State Fund:**

(1) The State Government shall create a State Social Security Fund to which contributions shall accrue from the following sources:

- (i) Grants and loans from National Board and the State Government;
- (ii) Any tax or cess that the State Government may impose on commodities and/or services in lieu of employers' contributions (which are either difficult to collect or appropriate employers in the unorganised sector are not directly identifiable);
- (iii) Contribution toward additional social security scheme (if any) formulated by the State Board;
- (iv) Contributions from the national financial/developmental institutions; and
- (v) Any voluntary contribution from individuals or institutions;

(2) All financial contributions made by individuals and institutions to the State Social Security Fund will be exempted from the payment of income tax under the Income Tax Act.

(3) All contributions accruing to the State Boards shall be credited to the State Social Security Fund which shall be applied for meeting the following:

- a) Expenses on the implementation of the national minimum social security and additional social security schemes of the State Government;
- b) Grants to the Welfare Boards and the Workers' Facilitation Centres;
- c) Expenses on the administration of the State Board as per the annual budget approved by the Executive Council;
- d) Investment in permitted schemes;
- e) Any other item in connection with the administration of this Act.

## **17. Functions**

The State Boards will have the following functions:

- a) administration of this Act at the state level including ensuring maintenance of individual accounts of the registered workers and records of receipt of contribution from individual employers;
- b) implement the national minimum social security for unorganised workers through appropriate organisational arrangements, and to stipulate norms for the evaluation of the work done by the Workers' Facilitation Centres;
- c) To collect the contribution from the registered worker and the employer and to credit it to the account(s) as directed by the National Board;

- d) implement social security schemes, in addition to the National Social Security Scheme, that the State Board may design in consultation with the State Government;
- e) provide financial assistance to other member-organisations implementing social security programmes;
- f) advise the State Government on policy matters relating to social security, health and safety and welfare of workers;
- g) create awareness among the unorganised workers about the need for social security registration and the existence of various social security schemes;
- h) collect, compile and publish statistics, with the help of statistical organisations, regarding workers and their conditions of work, and employers who engage these workers at the Panchayat/Municipal, District, State levels with such details as gender and age, nature of occupation, level of earnings, etc.;
- i) review the working of the Welfare Boards and other implementing agencies on the basis of annual reports and statements of audited accounts or specially commissioned reports and make suitable recommendations to the government(s) concerned for further improvement;
- j) assist in capacity building of Workers Welfare Boards and Workers' Facilitation Centres;
- k) initiate innovative approaches, through interaction across sectors and constituencies, for the enhancement of welfare, working conditions and productivity of unorganised workers; and
- l) Submission of annual report to the National Board within four months from the last day of the previous financial year along with an audited statement of accounts.

**18. General Council:**

(1) There shall be a General Council for the State Board consisting of one representative from each of the member-organisations. The Minister for Labour in the State concerned shall be the Chairperson of the General Council. The Secretary to the State Government concerned, Department of Labour, shall be the Member-Secretary.

(2) The General Council shall meet once a year within six months of the last day of the previous financial year.

(3) The General Council shall discuss and review the functioning of the State Board in the light of the annual report for the preceding year. It will also provide a platform for members to articulate their views, ideas and problems with regard to the unorganised sector in general and social security issues in particular and shall give broad policy directions to the Executive Council.

### **19. Executive Council:**

(1) The State Board shall have an Executive Council with the Secretary of the State Government concerned, Department of Labour, as Chairperson and an official designated by the State Government as Chief Executive Officer, who shall be the ex-officio Member-Secretary, after taking the view of the General Council of the State Board concerned. In addition, the State Government shall nominate the members to the Executive Council as per the following:

- a) Two representatives of the organisations of wageworkers in the unorganised sector, that are members of the State Board;
- b) Two representatives of organisations of self-employed workers in the unorganised sector, that are members of the State Board;
- c) Two representatives of organisations of employers in the unorganised sector that are members of the State Board;
- d) One representative from the National Board nominated by it;
- e) One representative each from the Departments of Agriculture, Finance, Health and Small Scale Industries of the State government;
- f) Not more than six representatives of the State level Workers Welfare Boards or organisations providing social security to the unorganised sector workers that are members of the State Board;
- g) One expert in the management of insurance products and services;
- h) One expert in the area of social security and related issues in the unorganised sector; and
- i) One expert in the management of finances.

(2) The tenure of the members shall be for a period of three years. The Executive Council shall meet as often as required but not less than twice a year.

***[a, b, c, and f may be based on the principle of rotation amongst the member-organisations.]***

(3) Appropriate rules for appointment and removal from office of the chief executive shall be framed by the State Government.

## **20. Secretariat of the Board:**

The State Board shall have a secretariat with adequate professional and other staff. The staff of the State Board shall be governed by the State Government rules and regulations existing from time to time.

## **Chapter VI**

### **REGISTRATION OF UNORGANISED WORKERS**

#### **21. Eligibility for registration and for social security benefits:**

(1) Every unorganised worker shall be eligible for registration subject to the following conditions:

- a) He/she should have completed 18 years of age; and
- b) a self declaration confirming that he/she is an unorganised worker.

(2) Every registered worker shall be eligible for national minimum social security benefits only if payments of regular contributions have been made.

#### **22. Unique Identification Social Security Number**

Each registered worker shall be eligible for receiving a Unique Identification Social Security Number in the form of an Identity Card issued in the name of the State Board. With a view to prevent duplication of identity, the Identity Card shall also carry the registration number of the ration card of the worker. In the absence of a ration card, the registration number on the voter's card shall be entered in the Identity Card.

### **23. District Committee for registration of workers:**

A district-level committee shall be constituted as the registering authority for the National Social Security Scheme. The District Committee will have the District Collector/Magistrate as the Chairman and the District Labour Officer as its Convenor and Nodal Officer. The District Committee shall include:

- a) Two representatives of workers' organisations such as unions, associations or co-operatives in the unorganised sector;
- b) Two representatives of organisations working among the unorganised sector workers who do not have organisations of their own;
- c) Two representatives of employers' organisations in the unorganised sector;
- d) One representative of the Zillah Parishad and one from amongst the Nagar Palikas ; and
- e) A representative of the State Board.

### **24. Identity card:**

This Identity Card shall be issued under the authority of the District Committee based on a formal application for registration from workers and forwarded by the Workers' Facilitation Centre with its recommendation. The District Committee shall send the Identity Cards to the Workers' Facilitation Centre for distribution to the workers concerned.

### **25. Portability of registration**

The Identity Card issued by the District Committee to workers shall remain valid even in the case of migration to another district in the country and the new address can be changed on application to the District Committee concerned.

### **26. Cessation of registration**

(1) The validity of the Identity Card shall be for a period of three years from the date of registration and can be renewed. If it is not renewed within one year of expiry, the worker will cease to be eligible for the benefits of the scheme. Renewals would be allowed on payment of arrears of contribution, if any.

(2) In the event of death, the Identify Card shall become invalid after the settlement of claims and the name of the worker shall be removed from the list of registered workers.

## Chapter VII

### DELIVERY OF SOCIAL SECURITY BENEFITS

#### 27. Implementation Machinery

(1) The member-organisations of the State Boards shall be responsible for the delivery of mandatory social security benefits as decided by the State and National Boards. If adequate member-organisations do not exist, the State Boards shall decide the manner in which social security benefits shall have to be delivered to the registered workers.

(2) The State Boards may decide on such delivery mechanism as may be feasible under local conditions. This may include existing delivery mechanisms as Welfare Boards or through tie-ups with local organisations like banks, post-offices and insurance companies.

#### 28. Workers' Facilitation Centres:

(1) In order to extend coverage and reach the unorganised workers in remote areas the State Boards may designate any one or more of the following at the local level as Workers' Facilitation Centres (WFC) for purposes of facilitating registration of workers:

- a) Existing Worker Welfare Boards and their local offices;
- b) Local Panchayati Raj Institutions (PRI) or urban local bodies;
- c) Organisations of workers including trade unions, associations and cooperatives in the unorganised sector;
- d) Self-Help Groups; and
- e) Non-profit organisations working among the unorganised sector workers.

(2) Such designated Workers' Facilitation Centres shall perform the following functions:

- a) Disseminate information on available social security schemes for the workers;

- b) Facilitate the filling, processing and forwarding of application forms for registration of workers;
- c) Obtain registration from the District Committee and deliver the Identity Cards to the registered workers;
- d) Facilitate the registered workers to enrol in social security schemes;
- e) Act as an authorized intermediary in collecting contributions from the workers and employers to the social security schemes and remit them with the designated institutions;
- f) Ensure the delivery of social security benefits in cooperation with institutions designated to deliver such social security (insurance companies, Post Offices, Departments of the State/Central Government and other institutions concerned).

(3) The Workers' Facilitation Centres shall be entitled to charge such fees as may be decided by the State Board for the performance of its functions. Wherever required, it may also receive personnel recruited or deputed by the State Board for purposes of administration.

#### **29. Premium and Compensation/Benefits:**

(1) The National Board shall decide the amount and manner of payment of contribution by the workers to the National Social Security Schemes. It shall however be the responsibility of the State Boards to remit the contributions of registered workers and employers to the National Board.

(2) For schemes initiated by the State Boards, the State Board concerned shall decide the contributions of workers and employers.

(3) The claim of registered workers for social security benefits shall lie solely against the State Board and it shall be the responsibility of the State Board to settle the dues, if any.

## **Chapter VIII**

### **DISPUTE RESOLUTION BODIES AND THEIR CONSTITUTION**

#### **30. Resolution of Disputes:**

The State Government shall constitute at least one Dispute Resolution Council in each district for resolution of disputes relating to the non observance of provisions of this Act, arising amongst the unorganised workers, employers, Workers' Facilitation Centres and State Boards.

### **31. Reference of disputes:**

(1) Any unorganised worker or employer or organisation representing such worker or Workers' Facilitation Centres or State Boards may raise a dispute relating to the non-observance of provisions of this Act by filing a complaint before the Dispute Resolution Council in the manner prescribed by the State Government.

(2) Upon reference of such dispute, the Dispute Resolution Council shall at the first instance proceed to arrive at a conciliated settlement to the satisfaction of all parties. Upon failure of such conciliation proceedings, the Dispute Resolution Council shall adjudicate on the matter as expeditiously as possible.

(3) Where the dispute pertains to any matter covered by any other existing law, the Dispute Resolution Council shall forward the complaint to the appropriate authority created under the relevant Act for adjudication and such reference shall be treated as a valid complaint under such Act.

(4) The Dispute Resolution Council shall have the same powers as are vested in a civil court under the Code of Civil Procedure, 1908 (of 1908).

### **32. Consequences of contravention of provisions of this Act:**

Whoever contravenes any provisions of this Act or the rules made there under, other than those made punishable under any other law, shall be punishable with imprisonment for a term which may extend to one year, or with fine which may extend to five thousand rupees, or with both, and in case of continuing contravention, with additional fine which may extend upto one hundred rupees for every day during which such contravention continues. The Dispute Resolution Council shall be authorised to give the fine so collected either in whole or in part to the aggrieved party.

## **Chapter IX**

### **MISCELLANEOUS**

### **33. Accounts and Audit:**

- (a) The National Board and the State Boards shall maintain proper accounts and other relevant records and prepare annual statements of accounts in such form as may be prescribed.
- (b) The National Board shall furnish to the Central Government, before such date as may be prescribed, the audited copy of the consolidated account of itself and the Funds together with the auditor's report.

### **34. Power to make Rules:**

The Central and the State Government shall have the power to make rules for the purposes of carrying out the objects of the Act.

### **35. Savings:**

This law shall not affect the functioning of any other State or Central Acts providing for substantially similar or superior benefits to the unorganised workers.

# APPENDICES

## Appendix 1

### Past and Present Composition of the Commission

The composition of the Commission is as follows:

**Professor Arjun Sengupta,** Chairman  
Chairman,  
Centre for Development and Human Rights,  
New Delhi

Chairman  
[From 20.09.2004 to 01.07.2005]  
[From 17.11.2005 till date]

**Professor K. Jayashankar,** Full Time Member  
[Former Vice Chancellor, Kakatiya University],  
Warangal, Andhra Pradesh.

Full Time Member  
[From 01.12.2004 to 9.03.2006]

**Professor K. P. Kannan,** Full Time Member  
Fellow and Director,  
Centre for Development Studies,  
Ulloor, Trivandrum 695011, Kerala.

Full Time Member

### Tabulation Of Replies Received From Ministries Of Govt. Of India On The Unorganised Sector Workers Social Security Bill, 2005 Drafted By The Commission

Ministry	Comments received	Views of NCEUS
<b>Ministry of Finance (Dept. of Revenue)</b>	Matter is being processed	Noted.
<b>Ministry of Finance (Dept. of Economic Affairs)</b>	Only Clauses 4 (ii) and 4(iv) deal with health insurance and life insurance.	Logistic problems addressed. Mechanism of premium collection [Para 11 of the Explanatory Note (EN)], facilitation with the insurance companies, method of availment of medical services and settlement of bills provided for in Para 4(ii) of EN.
	No objection in having these schemes, but logistic problems needs to be addressed.	
	Nodal agencies may be Panchayati Raj Institutions, NGO, SHGs or any other bodies working at the grass root level.	
<b>Ministry of Home Affairs</b>	Composition of the State Advisory Committee (Section 12) includes Minister of Labour as its Chairman. As only two Union territories are having Council of Ministers, the words, “or the Administrator as the case may be” be added after the words “Minister of Labour”.	Suggestion accepted.
<b>Ministry of Communications &amp; IT (Department of Information Technology)</b>	No Comments. However if the services of this department are required in utilising IT for more effective implementation of these bills, the same can be made available.	Noted.
<b>Ministry of Personnel, Public Grievances &amp; Pensions (Dept. of Personnel &amp; Training)</b>	No Comments	Noted.
<b>Ministry of Non-Conventional Energy Sources</b>	No Comments	Noted.
<b>Ministry of Information and</b>	No Comments	Noted.

<b>Broadcasting</b>		
<b>Ministry of Urban Employment &amp; Poverty alleviation</b>	No objection to the Bill	Noted.
<b>Ministry Of Health &amp; Family Welfare- Dept. of AYUSH</b>	No Comments	Noted.
<b>Ministry of Agriculture (Dept. of Agriculture &amp;Cooperation)</b>	Concurs with the proposals in the two bills	Noted.
<b>Indian Council of Agricultural Research, Dept. of Agricultural Research &amp; Education</b>	No Comments	Noted.
<b>Ministry of Food Processing Industries</b>	Suggest one Bill, instead of two Bills.	Decision to have two Bills taken after consultation with stake holders
	No need to keep wage ceiling for definition of wage workers.	Decision taken after consultation with stake holders
	In Chapter III, Section 7(2), a time limit should be prescribed for resolution of workers dispute and onus of bringing proof against the claim of the worker should be on the employer.	It may be desirable to give a time limit for resolution of disputes. Onus of proof covered under section 3
	Workers covered under existing schemes if any need not be covered under the proposed Bill.	Views of the Commission are stated in section 6 of the Bill.
	Social Security Funds at the National and State levels may be pooled into one fund.	Decision taken after consultation with stake holders
	Contribution of Rs. 1.00 per day by the worker seems to be on higher side. No need for Government to contribute.	Decision taken after consultation with stake holders
	<b>Ministry of Social Justice &amp; Empowerment</b>	Adequate representation of workers belonging to Scheduled Castes may be ensured in the proposed State Advisory Committee.

<b>Ministry of Communications &amp; IT (Department of Posts)</b>	No objection to the proposed draft bills.	Noted.
	The functions of the WFC spelt out in Section 28(2) of the draft Bill are all items of work that the post office is already undertaking, or is capable of doing, given its reach, easy accessibility, intimate knowledge of the local environment and people, its ability to access anyone at his/her address and its role in facilitating communication. It is the only the Central Government presence throughout the country, even in the remotest areas. The work that the post office is undertaking to register voters on behalf of the Election Commission, or to verify addresses for Municipal Corporations, etc., are cases in point. The post office has also traditionally been a source for issuing Identity Cards to citizens- a role it continue to perform even today, where required, given its capabilities to identify any citizen at his/her address. Therefore, it is suggested that the Commission may consider identifying the post office among the potential centres that can function as WFC.	
	To facilitate better coordination and oversight of this work at the District level, the Divisional Superintendent of Post Offices could be considered for inclusion in the District Committee for registration of workers, to be constituted as per the provisions of Section 23 of the draft Bill.	
<b>Ministry of Mines</b>	PSUs under this Ministry are in the Organised Sector and therefore, the Ministry has no specific comments in the matter.	Noted.
<b>Ministry of Rural Development</b>	No objection to the draft Bills.	Noted.

## Appendix 10

### Tabulation Of Replies Received From State Govts/ UTs On The Unorganised Sector Workers Social Security Bill, 2005 Drafted By The Commission

State Government/ Union Territory	Comments received	Views of NCEUS
<b>Chandigarh</b>	The bills are quite elaborate and comprehensive	Noted.
<b>Dadra and Nagar Haveli</b>	The enactment shall be enforced in this territory.	Noted.
<b>Lakshadweep</b>	No comments	Noted.
<b>Goa</b>	In Sub Section 2 of section 21 definite period be defined for regular contribution.	Noted.
	As regards Section 22, passport Number if any may be incorporated in the identity card.	No Objection.
	The Government of Goa, has enacted a new State legislation namely "The Goa Employment (Conditions of Retirement Benefits) Act, 2001 under which retirement benefits are guarantee to all workers who have not completed 240 days of continuous employment.	Noted.
<b>Haryana</b>	The Bills in their present form appear to be very difficult to implement.	Noted.
	No information regarding the size of the unorganised sector- difficulty of collection of contribution to fund – financial implications of the State Government..	
	The Bill is not supported by the Haryana Government in its present form.	
<b>Kerala*</b>	Welcomes the Social Security Bill.	Noted.
	The proposed Bill should ensure that existing Social Security Benefits provided by the State Governments are not withdrawn.	
	A conference of Labour Ministers of the States be convened to finalise the Bill	
<b>Rajasthan</b>	No comments on Social Security Bill.	Noted.
<b>Arunachal Pradesh</b>	No comments to offer on the proposed bills	Noted.

\* Response given to the Commission during the course of the meeting with the Minister of Labour, Government of Kerala on 14<sup>th</sup> October, 2005.

## Appendix 11

### Tabulation Of Relevant Portions Of The Speeches Of Prime Minister Of India & Various Ministers Of The State Government At The Indian Labour Conference Held At Vigyan Bhawan, New Delhi On 9-10<sup>th</sup> December 2005

<p><b>PRIME MINISTER DR. MANMOHAN SINGH</b></p>	<p>The United Progressive Alliance was forged on the platform of a new unity between different sections of our society and based on the principles of equality, welfare and social justice. The National Common Minimum Programme declares emphatically that the UPA Government is firmly committed to ensure the welfare and well-being of all workers, particularly those in the unorganized sector who, as the previous speakers pointed out, constitute 93% of our workforce. Our Government remains committed to giving a new deal to the working people to ensure that they receive their due share from the fruits of social and economic development.</p> <p>I am also happy to report that our Government has already brought forward several legislations aimed at addressing issues dear to the working sections of our population, both men and women, in cities and in villages, in industry and in agriculture. However, I do recognize the fact that we have some distance to travel in addressing all the concerns of our working people. I would like to reiterate here once again our sincere commitment to do so.</p> <p>This Conference is discussing issues pertaining to social security for unorganized sector workers. Our Government has taken a very important step in this direction by enacting the National Rural Employment Guarantee Act. It is the single most important social security benefit being extended to the rural labour since Independence. Our Government has also launched the National Rural Health Mission that seeks to provide health security for our rural areas. We have taken major initiatives in the field of education to eliminate illiteracy and provide basic education. Taken together, all these initiatives of our Government will, I believe, enhance the income security and welfare of the poor, particularly those in the rural areas.</p> <p>Our Government is presently examining alternative approaches to the welfare of workers in the unorganized sector and is considering different drafts of a possible Bill for Unorganized Sector Workers' Social Security. <b>I am grateful to</b></p>
---	---

	<p><b><u>all those who have contributed to the wide-ranging discussion on the proposed legislation. There should be a meaningful discussion on all aspects of this bill, including its administrative feasibility and financial viability. This we are committed to promote.</u></b></p>
<p><b>KERALA</b></p>	<p>Kerala has made tremendous progress in extending social security coverage to workers in the unorganized sector through the mechanism of tripartite Welfare Fund Boards. Now the Central Government has proposed the Unorganised Sector Workers Bill to provide social security net to the workers in the unorganized sector. Three drafts for the legislation prepared by three different bodies have come up for discussion here. <b><u>We had convened a meeting of the various stake-holders in our state to evaluate the draft Bill. Many of the suggestions which have been raised in the meeting are covered in the draft bill prepared by NCEUS and we are of the view that this draft is more comprehensive. We urge the Government to enact this draft Bill with necessary modifications.</u></b></p>
<p><b>PUNJAB</b></p>	<p>The Government of India has drafted the Unorganised Sector Workers' Social Security Bill, 2005. The objective of the bill to provide minimum level of protection and welfare and well being of the workers in the Unorganised Sector who constitute 93% of our workforce is laudable. This is appreciable attempt of UPA Government headed by S. Manmohan Singh Hon'ble Prime Minister to provide social security to workers, working in the Unorganised Sector. The Government of Punjab endorses the spirit of this bill.</p> <p>However the Government feels that the definition of unorganized sector workers as given in Section-2(o) of the draft bill might create some practical problems while implementing this bill, because only those workers can avail the benefits under this bill who are not availing benefits under the ESIC Act and PF Act. It has been observed that factories and industrial establishments including contractors' establishments employ casual workers for a few days and as per the provisions of the Provident Fund Act 1952 their PF is deducted. Majority of these are migratory workers. Therefore, any casual workers will move in and out of this definition of unorganized sector worker. This will create difficulty in implementing social security schemes for unorganized sector workers. Therefore, it is suggested that provisions should be made in the draft bill that such kind of workers continue to get benefits under this bill.</p>

	<p>Similarly with reference to section 21(b) (ii) contribution of employees it is stated that State Government may not be in a position to levy cess or tax or fee for this purpose. Government of India would be in a better position to do so. Therefore, this provision should be deleted, so that the specified Authority under the provisions of the Bill does not make recommendation which can not be implemented.</p> <p><b><u>However the Unorganised Sector Workers' Social Security Bill, 2005 circulated National Commission for Enterprises in the Unorganised Sector has taken care of above objections and it is a better draft bill.</u></b></p>
<p><b>ANDHRA PRADESH</b></p>	<p>The Government of Andhra Pradesh is, for quite some time, working very seriously on the Social Security and Welfare of Unorganised Workers and prepared a Draft Bill. Confronted with Three Bills on the same subject, we made an in depth analysis of all the Bills vis-a vis our state Draft Bill and presenting now our views to the Ministry of Labour.</p> <p><b><u>Briefly stated, we concur with the Bill proposed by the National Commission on Enterprises in the Unorganised Sector for two reasons.</u></b> One, it is our considered opinion that the Central Government should be a Policy Body and create a National Fund and the State Governments should be Implementing Agencies. Secondly, there shall be a provision for sector-specific Cess or Tax, like Cess on Motor Vehicles Tax for Schemes intended for Transport Workers right from Rickshaw Pullers to Truck Drivers including Self employed, to supplement the Contributions of Workers.</p> <p><b><u>Moreover, we have few suggestions to make. Firstly,</u></b> the two Bills proposed by National Commission on Enterprises in Unorganised Sector should be codified into one; and <b><u>secondly</u></b> there shall be Fifth element under National Minimum Social Security providing for some Sustenance Allowance for a very limited period in case the unorganized worker is forced to be out of employment due to circumstances beyond his control, like Fire Accidents, Tsunami etc.,</p> <p><b><u>Similarly,</u></b> though it may appear attractive to say that the worker's contribution should be Rupee One per day, in practice it is very difficult to collect and to account for. Further, the contributions of workers, employers and the State Government may be permitted to be received and accounted for by the State Governments themselves and the National Board may direct the</p>

	<p>State Government or the State Board, wherever it is, to pay the proportionate amount of premium etc., towards National Minimum Social Security Benefits. This will put the things straight and result in operational convenience.</p> <p><b><u>The two key contents of the Second Bill proposed by the National Commission on Enterprises in Unorganised Sector, viz., Conditions of Work and the Protection and Promotion of Livelihood of Self-employed persons may straight-away be incorporated in the Schemes framed under the First Bill. This is more suitable and relevant for the Service Conditions of Unorganised Workers depending upon their nature of employment and sector of employment. The second part is the Government's responsibility in the nature of Guiding Principles and hence can better be a part of the Scheme.</u></b></p>
<p><b>WEST BENGAL</b></p>	<p>One of the Agenda for the Conference is "Social security for unorganised sector workers including the agricultural sector workers covering their service conditions, social security and other benefits". The Union Govt. for the last three years has been actively considering to extend the social security benefits to the unorganised sector workers. A plethora of draft Bills have already been framed by the Union Govt. Initially, the Union Govt. drew up a draft Bill for the unorganised sector workers in the year 2003. The said draft Bill was subsequently replaced by another draft Bill viz., Unorganised sector Workers Bill 2004. Our State Govt. communicated its views on the said Bill in details to the Govt. of India. There were lot of anomalies in the said draft Bill which were pointed out in our views. The most important thing is that the State Govt. communicated its objection in sharing payment of contribution of the registered unorganised sector workers in respect of whom the employers could not be identified. Subsequently, the Union govt. has drawn up another Bill viz., Unorganised Workers Social security Bill, 2005. On prima facie examination on this draft Bill it appears that in the matter of implementation of the said Bill, the State Govt. does not have a major role to play save and except in certain areas such as levy of cess/tax on goods produced or service rendered, making contribution in the Supervisory Board by way of its representation in the said Board and also by way of making grants and loans such sum of money as the State Govt. may consider fit for being utilized for the purpose of the proposed Act. Even in this Bill the maximum amount which the State Govt. may impose as levy or cess has not been prescribed in said Bill. Thus it is very difficult to make specific comment on this point.</p>

Secondly, it is reiterated that the State Govt.'s exchequer would not probably permit sanction of any grant towards implementation of the proposed Act. In addition, the proposed draft Bill also does not clarify certain anomaly with regard to the benefits rendered or to be rendered by certain other statutory Boards like Building and Other Construction Workers Welfare Board, Beedi & Cigar Workers Welfare Board etc.

Of late in the Agenda note it is found that another two draft Bills prepared by the National Commission for Enterprises in the Unorganised Sector (NCEUS) are also placed for consideration in this Session. These two Bills are: (I) Unorganised Sector Workers Social Security Bill, 2005, and (II) Unorganised Sector Workers (Conditions of Work and Livelihood Promotion) Bill, 2005.

On scrutiny of the first Bill viz., Unorganised Sector Workers Social Security Bill, 2005, it appears that certain portions of the social security measures for unorganized sector are proposed to be implemented by the Central Govt. through creation of a National Fund and National Board and some portions to be implemented by the State Govt. through creation of a State fund and the State Board. In this Bill too there has been mention of sharing of expenditure towards contribution of workers @ Re.1/- per day in respect of those unorganized workers whose employers are not identified, by the Central Govt. and the State Govt. in the ratio of 3:1 and in addition the State Govt. is required to pay one-fourth of the contribution of all unorganized workers towards the National Social Security Fund by the State Govt. In this connection it is further reiterated that the State Govt. may not be in a position to share such financial burden.

As regards the schemes proposed to be implemented by the State Govt. under this Bill, it may be mentioned that our State Govt. had already introduced a Social Security Scheme for unorganized workers, viz., state Assisted Scheme of Provident Fund for Unorganised Workers (SASPFUW) w.e.f. 1.1.2001 in order to provide some sort of social security measures to workers engaged in the unorganized sector units employing less than 20 workmen and also the workmen employed in the self-employed occupations. A workman between the age of 18-55 years having a family income not exceeding Rs. 3,500/- per month and employed in the listed unorganized sectors and self-employed occupations, is eligible to be covered under this Scheme. Under the Scheme each eligible worker is to contribute

	<p>a sum of Rs. 20/- per month towards his provident fund Account and the State Govt. gives an equal amount of Rs. 20/- as Matching Contribution towards such P. F. Account. The State Government also bears the interest payable annually on such P.F. Account. It is encouraging to note that up to September,2005, about 6,45,290 workmen in the unorganized units and self-employed occupations have already been enrolled as beneficiaries under this Scheme. So far a sum of about Rs. 26 crores have been collected as subscriptions from the enrolled subscribers and the State Govt. had already granted Matching Contribution towards Provident Fund of the unorganized workers to the extent of about Rs. 20 crores up to March,2005. In implementing the Scheme, the State govt. feels that the Central Govt. should come forward and finance the State govt. by way of grant for implementation of such scheme or in other schemes that might be floated under the proposed legislation. Incidentally, it may be mentioned that the implementation of such welfare schemes also requires additional manpower which again puts a burden on the State Exchequer by way of creating provisions for additional manning.</p> <p style="text-align: center;"><b><u>Detailed views on this proposed Bill as well as on the second Bill viz., Unorganised Sector Workers (Conditions of Work and Livelihood Promotion) Bill, 2005, will be communicated to Central Govt. shortly.</u></b></p>
<p><b>GOA</b></p>	<p>At the outset I express my deep gratitude to the Standing Labour Committee for the suggestion made to include this sensitive subject of social security as an item in the Agenda for the Indian Labour Conference (ILC).</p> <p>The Indian economy has faced ripples in the past and now the economy is facing convulsions on account of globalization, which has left indelible impact upsetting the plans and equations. In this past paced economy and society the welfare of the working class in the unorganized sector should receive utmost attention. Labour welfare is a total concept. It should encompass not only the intrinsic aspects of welfare from retrenchment to retirement but also ensure social and economic protection to the workers and their family members after superannuation.</p> <p>I would not like to dwell at length on the existing legislation and the proposed legislation on social security and consume the valuable time of this August body. There is comprehensive legislation on the subject and steps have been</p>

initiated to enact more progressive legislation, which is elaborately mentioned in Notes of Agenda. However, it has been time and again reiterated at different fora that the mechanism of delivery of benefits should be toned up in a manner to provide responsive approach.

Very often the beneficiaries under the E.S.I. Scheme and Provident Scheme have to sweat out to receive the benefits at times when the same are badly needed. I come across instances where the benefits of compensation under the ESIC scheme are belatedly paid. In the same way workers and their dependents in dire state, especially widows find it difficult to derive pension benefits when they need the same. We are staying in a money economy wherein we require money every step. **Sudden sickness or loss of an earning member cause traumatic situation for the family members. The machinery should respond to the desperate beneficiaries quickly and deliver the goods effectively.**

I am aware that very often lip sympathy is given to the workers of the unorganized sector by the co-workers who through their collective strength receive periodically benefits both qualitative as well as monetary.

I do not mean to say that we have to ignore the demands of the workers in organized sectors in improving their quality of life. **However more and more attention is to be focused by the Govt., employers, Trade unionists, Social thinkers and NGO's on proper and effective delivery of benefits to the workers in unorganized sector.**

I would like to focus on the other vital beneficial aspect of social security measures. Today we find there is unprecedented exodus from traditional occupations, especially agricultural sector. This is mainly attributed to insecurity of employment and inadequate means of livelihood. I say that Social Security measures have a role in this sphere. Having an effective network of social security benefits shall ensure relief at times when on account of vagaries of nature, there is crop loss.

In Goa, youth are deserting the traditional occupations of agriculture, toddy tapping, coconut plucking, artisan works, etc. At times when employment opportunities have totally dried out, one should make efforts that the youth should not desert their traditional occupations. To wean them from demonstration effect of white-collared jobs, social security measures should go to their doorstep and help them to have firm roots in traditional

	occupations with innovating approach.
<b>KARNATAKA</b>	<p>It is most unfortunate that more than 90% of the workforce which is in the unorganised sector have no legislative protection. Liberalization and globalization has further compounded the situation by adding to the numbers of unorganised workers, through closure, downsizing and contractualisation. I support the recommendation of the Second National Commission for Labour regarding and umbrella legislation to provide for basic minimum service conditions, and social security to these workers. We had ourselves drafted the Karnataka Unorganised Workers Welfare Bill, but soon realized that implementation required enormous financial resources which cannot be achieved without substantial involvement of the Central Government. We then undertook a study which was done by the Institute of Socio-Economic Change in Bangalore to ascertain the aspiration and needs of these workers, and their willingness to contribute to these schemes. We are encouraged by the results of the study which indicate that the larger percentage of these workers not only wish to have a social security net but are also willing to contribute towards that effort. <b><u>I must also mention here that our social security scheme Yeshaswini which is in its third year of implementation has been lauded as one of its kind in the country, offering as it does, full cover for surgical procedures to its agriculturist members.</u></b></p> <p>Our detailed views on the various efforts of the Central Government to frame an enabling legislation for regulating the conditions of service, and for providing social security to this deprived sector, have already been communicated. I do not wish to go into details here, but would like to touch upon some major issues.</p> <p>The most important issue is the matter regarding financing of schemes for the unorganised sector. While some contribution may be expected from workmen, the larger part will have to come from other sources. Since employer-employee relationships are not easy to establish here, contribution from employers, even if prescribed, may not be forthcoming. The Central Government and state Governments will therefore have to pitch in, in a big way. In the draft unorganised Sector Workers bill, 2004, the contribution of the employer is to be paid by the State Government when he is not identifiable. Since this will be the position in the majority of cases, it will cast a great burden on the State's financial resources. We feel that the Central Government will have to assume the larger share of the burden</p>

	<p>as State Governments may not have the wherewithal to do so. In this context, it is worth examining whether some of the existing schemes offering social security benefits to certain categories of beneficiaries cannot be remodelled as schemes under this legislation so that their funds may be applied here. We are also not averse to specific cesses being levied to find funds for this purpose, as has already been done for construction workers through the Building and other Construction Workers' Welfare Cess Act, 1966.</p> <p>Another issue which bothers us in the sustainability of the schemes. <b><u>In the two draft Bills proposed by the National Commission for Enterprises in the Unorganised Sector, benefits like old age pension, health coverage and maternity benefits have been proposed as obligatory under the scheme. We agree that this should be so-however, if our target is to cover the entire sector, the quantum of contribution proposed in the legislation seems grossly inadequate.</u></b> I feel these matters should be looked into before the legislation comes into being. As regards what should constitute the unorganised sector, both wage workers as well as self-employed should form part of it. An income restriction on the self-employed is also acceptable.</p> <p>I would conclude this subject by only saying that we should give this enabling legislation priority in our scheme of things, so that benefits can accrue speedily to the workmen in the unorganised sector.</p>
<p><b>HIMACHAL PRADESH</b></p>	<p>The Government of Himachal Pradesh is of the view that legislative measures need to be taken to ensure social security for unorganized sector workers excluding agriculture excluding agriculture sector workers.</p> <p>Our State Government has already submitted its point of view on the draft of Unorganized Sector Workers Bill, 2003. Since our State Government has been implementing various welfare programmes/schemes and social security schemes and social security schemes for the wellbeing of weaker sections of society, these may be adopted with necessary modifications under Section 23 of the proposed Bill. Our State Government welcomes the Unorganized Sector Workers Social Security Scheme, 2004 which was launched on a pilot basis in 50 districts including the capital district of each State. However, this scheme has not taken off yet.</p>

	<p>In Himachal Pradesh, the most important segment of unorganized labour are the large number of construction workers engaged in the construction activities of hydro electric power projects, road construction and other construction works. Therefore, the Building &amp; Other Construction Workers (RECS) Act, 1996 has a lot of potential in our State for the safety, health and welfare of construction workers. The Himachal Pradesh Draft State Rules, 2005 under the Act have been framed with the consultation of Expert Committee, constituted under the Act and are under active consideration of the State Government.</p> <p>In view of incidents of cloud bursts, flash floods and hazards involved in tunnelling operation in the hydro electric power projects, the State Government of Himachal Pradesh had started a special drive to ensure 100% registration of contractual labour involved in construction activities and issuing them Employment Cards in an amended form with photograph, permanent address and next of kin details. All contractual workers engaged in construction activities have been issued these Employment Cards, which they are required to carry with them while working at the construction site. This initiative has been taken for the welfare of this segment of unorganized workers so that the contractors do not disown their workmen and do not evade their liabilities of compensation in the event of any natural calamities.</p>
<b>MEGHALAYA</b>	<p>We welcome the decision of the Government of India based on the recommendation of the 2<sup>nd</sup> National Commission on labour to bring a legislation to the unorganized labour namely, the Unorganised Sector Workers Bills as it is the move in the right direction and also as this legislation is more relevant to small State like Meghalaya, where large number of workers are in the unorganized sector and can be provided social security which are instrument in alleviating hardships arising out of poverty.</p> <p>In so far as framing of central legislation for agricultural workers, it may be stated that the economy of the state is basically agrarian. The land tenure system is peculiar in the region since the land belongs to the people. There is no big employers, the number of Agricultural labour is very small and scattered all over the state. As such any legislation by the Central or State Governments for agricultural labour based on the Kerala, Agricultural Workers Act will therefore, be very difficult to apply and implement in the state, because of the peculiar conditions attributed above. However, we believed that</p>

	<p>the Unorganized Sector Bill proposed by the Government of India as well as the Minimum Wages Act, 1948 will provide labour welfare to the agricultural workers.</p>
<p><b>ARUNACHAL PRADESH</b></p>	<p>As regard unorganised labourers, I have already mentioned in my introductory speech that all the labourers of our state are workers of the unorganised sector and therefore it is not practicable to enforce and implement fully the provisions of the relevant labour laws for the benefit and welfare of these unorganised labourers. As such, the enactment of a separate law for the unorganised labour is urgently necessary. In this regard, the initiatives of the Ministry of Labour, Government of India, for the introduction of an unorganised sector worker Bill 2005 is praiseworthy. The State Government is looking forward for the early enactment of this bill. <b><u>We have already informed the Ministry of our views that if this Bill is enacted, the State Government will make efforts to enforce and implement the provision of this Act for the benefit and welfare of the unorganised sector workers if the central government provides 100% financial assistance for creation of necessary infrastructures for implementation of the proposed bills/enactments.</u></b></p>
<p><b>ASSAM</b></p>	<p>I would like to mention that right to social security is one of the basic human rights. The ultimate object of the social security is to assure every worker the means of livelihood and basic economic security. Social security programmes in India at present provide for only medical care, sickness benefit, the employment injury benefit and the old and survivors benefit in the form of provident fund and pension. All these benefits are provided to the organized workers through the different labour legislations in the country. These programmes are yet to extend for the benefit of unorganized workers in the country.</p> <p>It is observed that the proposed draft law has endeavoured to provide the safety net for all categories of unorganized, workers, which is welcome and laudable.</p> <p>Any law for unorganized workers should cover all workers those who have not been able to organize themselves on their common objectives on account of constraints like casual nature of employment, ignorance and illiteracy, small and scattered size of employments etc.</p> <p>Due to complexity of various problems of the unorganized sectors it has not been amenable to any statistical accuracy and</p>

the precision in the same sense as the organized sectors. The unorganized sectors suffer from seasonality of employment. Majority of the rural workers do not have appropriate avenues of employment. And those who are employed are not gainfully employed in the true sense. The work place of the unorganized labour is scattered. The workers are to do the same job in different branches for which it is hard for them to live together in the same areas.

As the economy of Assam is basically agrarian and hence, about 93% of the total labour force in the country is in the unorganized sectors. Assam being the land of agriculture, about 80% of the workers are engaged in the unorganized sector including agriculture. At present there are more than 69 lakhs unorganized workers working in various unorganized sectors/occupation in the State. It is also a pertinent point to mention that due to lack of Industrialization in the State a sizeable number of workers are compelled to work in the unorganized sectors with a very poor remuneration. From the available statistics and data it appears that the unorganized workers in the State are living below poverty line. Hence I strongly reiterate that it is high time to formulate policy/programmes for the socio-economic protection of the unorganized workers in the country as a whole.

We appreciate the initiative taken by the Union Labour Ministry in drafting two legislation i.e. the Unorganized Sector Workers Bill, 2004 and the Unorganized Sector Workers' Bill, 2005 to provide for social security and welfare of unorganized sectors' workers and to provide for other matters connected therewith.

The steps taken by the Government for providing effective measures towards safety and security of unorganized labour is to be appreciated. **Our Government is examining the latest two drafts Bills and the endorsement on the two Bills will be given in due course with minor modifications. Considering the complex sociological scenario in the State it must be ensured that only genuine citizens of the country as defined under law should avail of the benefits and be issued identity cards.** This crucial aspects needs to be incorporated in the proposed legislation covering definition/eligibility criteria etc. **The definition of employer and wage earner needs to be defined properly considering the issue of migration of different categories of workers to the State of Assam.**

	<p>The proposed legislation should also have an enabling penal provision providing for cognisance of offences like in other labour legislations.</p> <p>As such Assam had already taken the initiative and drafted a legislation viz., the Assam unorganized Workers' Welfare Bill, 2004 for providing socio-economic protection to the unorganized workers in the State. However, the enactment of the same would be reconsidered in the light of the proposed Central legislation.</p> <p>In the context of the social security programme in the State I would also like to mention that the Assam Gratuity Fund Scheme formulated in 1993 has been made effective from the current year for the Social security of the plantation workers in the State. The Scheme has been inaugurated by the Hon'ble Chief Minister of Assam on 2<sup>nd</sup> October, 2005, the day of "Gandhi Jayanti"</p>
<b>UTTARANCHAL</b>	<p>There was no specific comment on either of the draft Bills placed for discussion in the Agenda of the Conference. However, they considered it utmost important that there should be immediate legislation on Social Security.</p>
<b>RAJASTHAN</b>	
<b>GUJARAT</b>	

## Appendix 12

### Tabulation Of Replies Received From Trade Unions On The Unorganised Sector Workers Social Security Bill, 2005 Drafted By The Commission

Trade Union	Comments received	Action taken by NCEUS
<b>AICCTU, AITUC, BMS, CITU, HMS, INTUC, TUCC, UTUC, UTUC-LS</b>	<p>The two drafts by the NCEUS have correctly bifurcated the twin aspects of Social Security and Conditions of Work and Livelihood of the unorganized sector workers, with further distinctions between agricultural and non-agricultural workers. There is a need to synthesise the two draft Bills of the NCEUS with the revised draft Bill of the Ministry of Labour (forwarded with the June 2005 communication) and dovetail the unanimous inputs provided by the CTUs into it.</p>	Noted.
	<p>In the definition of the word “employer”, “contractors” as employers and “principle employer” also should be included and appropriately defined.</p>	Definition of Employer in the Bill takes care of this suggestion.
	<p>The salaries, allowances and other remuneration of the members, officers and employees of the Board and any other expenses of the Board, should be borne by the Central Government.</p>	Noted.
	<p>Similar provisions, as above, should be incorporated in relation to establishment of State Boards.</p>	Noted.
	<p>The composition of the Board should expressly provide for representatives of the Central Trade Union Organizations, to be nominated by them.</p>	See Section 11(1)(c)
	<p>If NGOs are to be associated, any academicians or expert working with the NGOs can be considered as associate member or consultant.</p>	Noted.
	<p>There should be provision for initial allocation of funds by the Central Government for the successful launch of the schemes.</p>	Noted.

	The entire cost of administration of the Act (s) should be borne by the Central Government at least for the first five years after which the position could be reviewed and revised.	Noted.
	The minimum basic welfare and pensionary benefits like minimum pension per month, etc should be incorporated in the Bill itself.	Noted.
	Wherever the employer is not identifiable, the contribution of the employer should be borne by the appropriate Government or the Board or shared by the Central and State Government on a 3:1 ratio.	Already suggested in the Bill. See Section 5(b)(ii)
	Central Government should allocate at least 3% of the GDP annually for social security, to be progressively increased.	Noted.
	There should be dispute resolution mechanism in the Act itself for resolving the grievances of the unorganized sector workers.	See Chapter VIII
	Contributions from workers cannot be as a percentage of wages but should only be a specified nominal amount towards registration/annual renewal fee.	See Section 5
	There should be appropriate provisions for refund of contribution by the workers on leaving the scheme as well as for portability of the contribution on their migration to other schemes.	Can be worked out by the National and State Boards.
	Imposition of penalties, for offences under and/or contravention of the provisions of the act(s), should be incorporated in the draft Bill itself.	See Section 32
<b>Bharatiya Mazdoor Sangh</b>	Enacting two separate legislations for the unorganized sector workers is not justified. A comprehensive law covering all aspects of workers, and requirements is necessary.	Decision to have two Bills taken after consultation with stake holders
	The proposed Bills shall cover the self employed worker and workers whose employer cannot be identified. A list of jobs, prepared in this light is annexed.	<b>See Section 2(l)</b>

	The expenditure on the establishment of Boards of all levels and the Facilitation Centres shall be borne by the governments.	<b>This is implied in the Bills.</b>
	<b>Agriculture:</b> to include Floriculture, Vegetables farming, rearing of sheep & goats piggery.	<b>See Section 2(a)</b>
	<b>'Employer'</b> to include: or, any person Central or a State Govt. or Corporation financing any unit of employment or service.	Decision taken after consultation with stake holders
	<b>'Unorganised sector'</b> to include: or, incorporated enterprises, project financed, promoted, sponsored by Central or State Governments and their corporations and units.	Decision taken after consultation with stake holders
	<b>In Section 5: (i)</b> In respect of wage workers, the contribution shall be on the basis of Monthly aggregate wage.  (ii) In respect of self employed workers and workers whose employer cannot be identified, the rate of contribution shall be on a notional income, to be decided by Social Security Boards.	Decision taken after consultation with stake holders
	<b>In Section 11: (i)</b> Tripartite representation on the Board. (ii) Remove the words" from any of the following" in the first sentence.	Noted.
	<b>In Section 26:</b> If the non-renewal of the validity of Identity Card in due to loss of employment the worker shall not be made in eligible. Payment of Arrears shall be waived.	Noted.
	<b>In Section 28:</b> Workers' facilitation centres shall be tripartite bodies. The expenses of the facilitation centres be borne by the governments and the worker and the welfare fund be spared from this expenditure.	Noted.
<b>National Centre for Labour</b>	The long Title of the draft Bill speaks about the 'welfare' of the unorganized sector workers. Is there any need for deletion of 'welfare' from the long Title?	NO.

	In Sec. 2 Omissions to define (i) Appropriate Government, (ii) Family.	Phrase appropriate Government not used in the Bill. 'Family' shall be defined.
	Employer definition similar to that of under the Apprentices Act.	Decision taken after consultation with stake holders
	'Unorganized Sector'. This definition was attempted by the Commission perhaps keeping in view only the agricultural operations.	See Section 2(k)
	"Unorganised Sector Worker" The salary limit of Rs. 5000 for the worker should be deleted.	Noted.
	<p>The social security measures specified under Sec. 4 (1) should be quantified in following manner:</p> <p>*Old Age Pension: 50% of the prevailing National Minimum Wage.</p> <p>*Disability Benefit: 50% of the prevailing National Minimum Wage.</p> <p>*Maternity Benefit: Equivalent to the prevailing National Minimum Wage basing on the provisions of the Maternity Benefit Act.</p> <p>*Death and Disability: Insured to the extent of Rs. One lakh (Presently) subject to a variation of inflation rate.</p>	Noted
	Health Insurance: similar to the provision under the Universal Insurance Scheme introduced by Govt. of India. The premium under this Scheme should be paid by the concerned Board.	Noted
	The social security measures and welfare measures need a clear distinction in sub sec. (3) of Sec. 4.	Noted
	<p>The specified social security measures under sub sec. (1) of Sec. 4 should include:</p> <p>(i) Unemployment Benefit.</p> <p>(ii) Provident Fund Schemes.</p>	Noted

	3% of the total Revenue of the Central Government should be allocated to this Fund.	Noted
	<p>The Three Tier structure of the Authority should be done away. And the mechanism should be under the following model:</p> <p><b>National Level:</b> 'CENTRAL SOCIAL SECURITY BOARD to frame the Schemes under the Act and the Administration of the Act with multi party constitution.</p> <p><b>State Level:</b> 'STATE SOCIAL SECURITY BOARD to frame the Schemes under the Act and the Administration of the Act with multi party constitution.</p>	The formulation suggested presupposes that the state Boards have vast network of local level offices. Considering the financial implications of this, Workers' Facilitation centres have been suggested by NCEUS.
	The Disputes Resolution Councils must be of Tripartite Bodies.	Power of composition to State Boards-implicit.
<b>Centre For Unorganized Workers Trade Union</b>	Suggestions, additions and deletions will be forwarded at the earliest to you. .	Noted.

## Appendix 13

### Tabulation Of Replies Received From NGOs, Academicians & Others On The Unorganised Sector Workers Social Security Bill, 2005 Drafted By The Commission

NGO/Academicians/ others	Comments received	Action taken by NCEUS
<b>Working Women's Forum</b>	Various occupations cannot be grouped under a single category. For example: agriculture and fish workers.	Bill is for all U.S. workers irrespective of occupation.
	How can one ensure collection of Re.1 per day, per worker from the employer?	See Section 5(b)(ii)
	How will social security or insurance be provided for workers who continue to work beyond 60 years?	Shall be considered while negotiating the schemes.
	What is going to be the mechanism for enforcement?	See chapter VII
	inadequate health infrastructure in rural areas- scope for corruption	Implementation problems to be addressed by the Boards.
	Coverage of social security benefits inadequate- periods of unemployment and major expenditures like education, housing, loss due to natural calamities etc should be included.	May be considered subject to availability of finance.
	Special problems of women like maternity, childcare and social security measures for specific health-related issues have to be taken care.	Maternity benefits already considered. Others may be negotiated by the Boards.
	Limiting the income to Rs.5000/- per month would lead to corrupt practices.	Noted.
	Need to involve the Panchayats, municipalities, NGOs, civil society initiatives and trade unions.	See Section 28.
	Need to include unpaid family labour e.g. Contributory family worker.	Decision taken after consultation with stake holders

<b>World Bank : Philip O' Keefe</b>	The objectives of the Bill are supported by the Bank.	Noted.
	The Bill represents significant progress from the earlier MOL draft.	
	Bundling of health, disability, maternity, life and pension insurance is very ambitious.	Suggestions for separate premiums for different benefits are being worked out.
	States appear to have discretion to choose not only the relative balance between the different core forms of insurance, but also to add non- core benefits.	Minimum benefits are being defined in the implementation scheme.
	What are the incentives to workers to register under the scheme?	National Minimum Social security benefits backed by legislation. Workers organisations are expected to create awareness & help workers to register.
	What are the incentives to employers under the scheme?	Bill envisages only 17% identification of employers. However Government may decide to levy Cess or Tax in lieu of employers' contribution.
	The draft Bill defines contributions but not benefits.	It is important that the scheme for implementing the Act defines the minimum benefits, where upper limit is left open for negotiations by the Boards.
	Analysis by Bank staff of urban health insurance claims shows that hospital benefits alone cost insurers around Rs. 1,000-1,100 per person per year, not including marketing, distribution and administration.	Contributions worked out after consultation with Insurance companies.
Is contribution in real terms or nominal terms?	Real terms.	

	Modes of benefit delivery to be specified	Being worked out as a part of implementation scheme.
	Administrative costs of 5% of total contribution are too low.	Government may review based on initial year's experience.
	Insurance based health cover would have impact on funding for health sector and cost of health cover for uninsured poor.	It is expected that budgetary allocation for strengthening the health infrastructure is likely to increase following the commitment of the Government as well as recommendation of National Commission on Macro-Economics and Health.
	Fiscal implications of the scheme are not possible for estimation, if there are other subsidies involved.	Noted.
<b>SEWA</b>	Central government contribution only for workers below poverty line only is fraught with problems, primarily because the list of BPL persons excludes many very poor people whose names simply do not get onto this list for various reasons.	Bill suggests a uniform contribution of Re1/- per worker by the Government. In addition, contribution of workers below poverty line to be borne by the central Government.
	The bill will ensure minimum social security coverage with small contributions, which are not likely to evince interest from income groups other than those from the working poor.	Minimum benefits suggested by the Bill are more than schemes run by voluntary organisations.
	In 5b (i) and (ii), we should not specify the exact contribution by the worker and employer (Re 1 per day), as this may vary across states, given the financial positions of those from whom contributions are to be taken. Many workers cannot afford to contribute Re. 1 per day.	Noted

	5b (iii) regarding contributions by both the central and state governments is welcome.	Noted
	This bill should be linked with the new REGA	No specific suggestion in the Bill.
	The mechanism to ensure implementation of social security benefits for workers needs careful attention.	Noted
<b>S. Mahendra Dev in 'The Hindu' dated 26.09.2005</b>	Fixing income limit of Rs.5,000 may lead to targeting errors and corruption.	Noted
	Involve Panchayati Raj institutions in implementation machinery.	See Section 28.
	Health care infrastructure needs strengthening	Noted
<b>Centre for Civil Society</b>	The inclusion of "self-employed" is a welcome step.	Noted
	<i>Need to define term "Employment" as: "Employment includes a service or vocation not only where there is an employer-employee relationship but also where the person is engaged in any self employed vocation."</i>	See section 2(l)
	Insertion of Clause in Section to specify that engaging in any vocation even post sixty years does NOT disqualify an unorganized sector worker from attaining pension and old age benefits of the Workers' Facilitation Centre.	Bill does not provide for this.
<b>Hannan Mollah</b>	In the section of dispute settlement, provision for an officer, not below the rank of Asst. Labour Commissioner, as Conciliation Officer, should be there. Besides, for enquiring on disputes, the provision of Inspectors should be there.	Noted
	A provision for tribunal should be there for referring dispute not settled by the Conciliation at Council level, as appellate authority.	Noted
	Provision for Appeal should be incorporated	Noted
	Penalties should be elaborated as in my bill.	See Section 32
