School Meals in India – Tracking State Government Response to COVID-19
January-March 2021
Note: The report has been generated based on published newspaper articles, official media reports and phone calls to respective state government officials, UNICEF colleagues and other development partners. The information for Phase IV was collected between the 3rd week of February and the 2nd week of March 2021

Photo Credits: Received from Divan Mydeen, MDM Director, Andhra Pradesh/Mahesh Kumar Nayak, Assistant Director, MDM, Chhattisgarh
Background

The Mid-Day Meal Scheme (MDMS) is a flagship programme of the Government of India wherein hot cooked meals are provided to school children studying in Classes I to VIII (aged 6 – 14 years) across all government and government-aided schools with the aims of enhancing enrolment, retention, attendance and simultaneously improving the nutritional status of school children. In terms of numbers of children, India’s Mid-Day Meal (MDM) scheme is considered to be the world’s largest school meals programme.

In response to the COVID 19 pandemic, all the schools across India were closed in March 2020 as a precautionary measure to protect the children from the virus. As a result, provision of hot cooked meal in the school for the children was also stopped.

WFP has been monitoring the COVID-MDM response through tracking and documenting the response across States since March 2020 and this is the Fourth Report in the series. The objectives of this monitoring are:

- To map how the MDM was adapted and implemented across the country in response to COVID 19 Pandemic and school closures.
- To identify and share best practices in the responses amongst States/UTs in order for States to learn from each other and accordingly adapt their programmes.
- To share the best practices responses within India with other countries.

Summary of response during closure of schools by Government of India

To ensure regular supply of MDM to all eligible children, the National Food Security Act (NFSA) 2013 and the Mid-Day Meal Rules 2015 mandate that if MDM is not provided in school on any school day for any reason, the State Government shall pay a Food Security Allowance (FSA) to students’ by the 15th of the following month, consisting of:

- In-kind food grains (kgs) as per the entitlement of each child
- Cash equalling the prevailing cooking cost in the State.

The following is the timeline of actions by the National Government:

- **March 20, 2020** - Ministry of Human Resource Development (now the Ministry of Education) issued a guidance requesting States and UTs to provide either hot cooked mid-day meals in schools or the food security allowance to all eligible children.
- **April 30, 2020** - the Ministry of Education issues guidance requesting States and UTs to continue provision of MDM or food security allowance, during the summer vacations.
- **July 31, 2020** - The Ministry of Education issues a letter advising the States and UTs to provide the food grains and cooking cost to the children as per their entitlements. The letter also highlighted that all the schools would remain closed till 31st August 2020 and requested the concerned authorities in the States and UTs to ensure distribution of food grains and pulses, oil etc. (equivalent to cooking cost) by 10th August 2020, following all the social distancing guidelines.
- **September 15, 2020** – Advisory sent to all States and UTs to provide “food security allowance, to children to enable them to meet their nutritional requirements and safeguard their immunity during closure of schools.”
- **October 5, 2020** - the Ministry of Education issues detailed guidelines for the reopening of schools in a graded manner, providing the flexibility to the States and UTs to decide after October 15, 2020, in consultation with the schools management, and no student should be forced to attend school without their parents’ consent.
Copies of the guidance may be downloaded at the following links:

- [https://www.mha.gov.in/sites/default/files/MHANewguidelines_30092020.pdf](https://www.mha.gov.in/sites/default/files/MHANewguidelines_30092020.pdf)

Current State and UT level analysis of MDM implementation in response to COVID-19

The following are some of the major findings of the Jan-March 2021 COVID-MDM response tracking exercise.

- **Elementary classes are fully reopened in 10 States and UTs and partially reopened (only classes 6-8) in 15 States and UTs.**
- **MDM is functional in one form or another in 35 of 36 States and UTs with Telangana being the only State where MDM is not functional.**
- **7 States and UTs are providing hot cooked meals while 4 other States are providing a mix of hot cooked meals and food-security allowance (FSA)**
- **24 States and UTs are providing FSA in various forms - details are captured below.**
- **24 States and UTs have prepared SOP/Guidelines for opening of schools or functioning of MDMS.**
- **16 of the States and UTs are distributing dry rations at the schools, following the COVID 19 protocols to parents/children**

**Summary of State and UT responses during January-March 2021**

Below is an update of actions of all States and UTs regarding MDM implementation in the first quarter of 2021.

**Reopening of schools**

Schools in India gradually started reopening in December 2020 with many States and UTs opening the upper secondary (class 11-12) and secondary sections (class 9-10) first, followed by upper primary and primary classes.

As of March 2021, elementary classes (primary and upper primary classes, target group for MDM) are:

- **Fully reopened** in 10 States and UTs
- **Partially opened** (only classes 6-8) in 15 States and UTs and
- **Closed** in 11 States and UTs

As a precautionary measure, a few States and UTs have adopted some special measures regarding attendance of children such as in Uttar Pradesh, were children in Classes 1-8 attend schools only twice a week with only 50% attendance and in Puducherry, where children are coming to schools on alternate days, as per the roll numbers.
Functionality of Mid-Day Meal in schools

Since the first phase of lockdown (March 2020), many States and UTs have taken initiatives to keep MDM functional. During the tracking period (January-March 2021), MDM was found to be functional in various forms in nearly all States and UTs. During this period, MDM is deemed functional in the form of provision of hot cooked meal in schools, provision of FSA or a mix of hot cooked meal and FSA. The FSA provided by the States/UTs consists of dry ration as well as a combination of dry ration and cooking cost. The following is the status:

- 7 states are providing hot cooked meals. However, in 4 states namely, Uttarakhand, Meghalaya, Mizoram and Ladakh the government is using a mixed approach where a hot cooked meal is served to upper primary students while FSA is provided to primary students as schools continue to remain closed for these children. In Assam schools are providing hot cooked meals to elementary students attending classes and also providing FSA to absent students.
- In the remaining 24 States, FSA is being provided. In 8 of the 24 States, both dry food rations and cooking cost is being provided while in the remaining 16 states only dry food rations are being provided which may vary from only grains to a more nutritious food basket consisting of grains, pulses, oil, potatoes, eggs, salt, condiments etc.
- 1 state (Telangana) not functioning in any form.
Figure 2: State/UT specific status of MDM

Modality of Food Security Allowances (FSA) distribution

- 16 States and UTs are distributing through schools (following the COVID 19 protocols) to parents/children.
- 9 States have adopted a mixed model of distribution through schools or fair price shops or to doorstep.
- In most of the cases, 2-3 months of food grains and other food items are distributed at a time.

Preparedness for reopening schools

To date, 24 States and UTs (67%) have prepared SOPs or Guidelines for opening of schools or implementation of MDM.

- They mostly focus on issues such as roles and responsibilities of cooks-cum-helpers for cooking and serving of meals, maintaining hygiene in kitchen cum store, and generic preventive measures to be followed.
- Several have adapted the SOP issued by Ministry of Education for this purpose.
- In the 11 States and UTs where schools have reopened and MDM is being implemented, they all had prepared SOPs before resuming the MDM.
